

TABLE OF CONTENTS

Foreword	5
Preface	6
Chapter 1 WHAT IS THERMOFORMING?	
Introduction	13
History	13
Markets	15
Some Definitions	18
Methods of Forming	21
One-Step Forming	22
Multiple-Step Forming	24
Other Variations	27
Modern Thermoforming Machinery	30
Heating Sources	30
Sheet Transport	30
Forming Platform	31
Vacuum System	32
Pressure System	34
Process Control	34
Trimming and Cut Parts Handling	34
Advanced Techniques	35
References	36
Appendix 1.1 ABBREVIATIONS FOR POLYMERS REFERRED TO IN THE TEXT	37
Chapter 2 POLYMERIC MATERIALS	
Introduction	39
Network Nature of Polymers	39
Addition and Condensation Polymerization	41
Aliphatic and Aromatic Polymers	42
Molecular Weight and Molecular Weight Distribution	43
Molecular Weight and Properties	44
Morphology and Properties	44
Molecular Orientation	47
Chain Mobility and Polymer Stiffness	47
Stress-Crack Resistance	48
Gas Permeation	48
Copolymerization	49
Blends	49
Plasticizers	49
Additives	50
Fillers	50
Laminates	51
Stress-Strain Behavior of Plastics	51
Thermal Properties	52
Thermal Conductivity	54
Thermal Diffusivity	55
Thermal Expansion Coefficient	55
Infrared Spectra of Polymers	57

Material Property Deterioration upon Regrind	61
References	62
Appendix 2.1 MECHANICAL PROPERTY LOSS IN REGRIND	63
Chapter 3 HEATING THE SHEET	
Introduction	65
Energy Absorption by Sheet	65
Heat Transfer Modes	67
Radiation Heating	70
Black Body Radiation	71
Grey Body - Emissivity	74
Constant Heat Flux - An Interesting Application	76
Real Heaters - Efficiencies	77
Radiation Heat Transfer Coefficient	80
Convection Heat Transfer Coefficient	81
Rod Heaters	83
Radiant Heater Efficiency	84
Edge Losses	84
Pattern Heating	85
Thin-Gage Sheet - Approximate Heating Rates	87
Heavy-Gage Sheet - Internal Temperature	88
Equilibration	91
Transparent Materials	92
Guidelines for Determining Heating Cycle Times	94
Thin-Gage Guidelines	94
Heavy-Gage Sheet Guidelines	94
References	95
Chapter 4 STRETCHING THE SHEET	
Introduction	97
What is Stretching?	97
Polymer Hot Strength	99
Stress-Strain-Rate-of-Strain	100
Basic Understanding	105
Solid Mechanics Behavior	107
A Material Parameter, $\phi(T)$	110
Practical Aspects of Stretching	113
Bursting Conditions	114
Sheet Sag	115
References	116
Appendix 4.1 BIAXIAL STRETCHING OF AN ELASTIC MEMBRANE	118
Chapter 5 COOLING AND TRIMMING THE PART	
Introduction	120
Cooling Heat Balance	120
Cooling the Formed Shape	121
Interfacial Resistance	125
Heat Transfer to Coolant	126
Heat Transfer Through the Mold	127
Sum of Resistances	128

Net Heat Balance on Mold	130
Trimming Basics	132
Multiple-Edged Tool (Toothed Saw) Performance	135
Abrasive Wheel Cut-off	136
Shear and Compression Cutting	138
Nibbling	145
Thermal Trimming	146
Brittleness and Orientation	147
Trimming – A Summary	147
Shrinkage	148
Drilling	150
References	154

Chapter 6 MOLD DESIGN

Introduction	155
Prototype Tooling	155
Wood	155
Plaster	156
Plastic Molds	158
White Metal Prototype Molds	161
Nickel Molds	163
Production Tooling	164
Aluminum Molds	164
Steel Molds	164
Other Mold Materials	165
Vent Holes	165
Number of Vent Holes	167
Other Types of Vents	167
Surface Treatments	168
Surface Texture	170
Plug Assist Design	170
Clamping Mechanism	172
Sheet Supports	172
Difficult Molds	173
References	173

Chapter 7 PART DESIGN

Introduction	175
Elements of Parts Design	175
Prototyping	180
Fine-Tuning the Process	180
Draw Ratios	191
Rim and Lip Material	196
The Cone	199
Thickness Equations for Other Shapes	202
Prestretching and Material Properties	206
Finite Element Method	210
Computer-Aided Design in Thermoforming	213
References	215
Appendix 7. I DRAW RATIOS FOR TRUNCATED CONE	216

Chapter 8 THE ECONOMICS OF THERMOFORMING

Introduction	219
Material Quality - Some Definitions	221
Virgin	221
Dimensions	222
Orientation	222
Moisture	223
Cap Sheet	223
Sheet Appearance	224
Linear Surface Marks	224
Holes, Pits and Lumps	224
Color Quality	225
Surface Appearance	225
Processing Economics "Rules-of-Thumb"	225
Global Production Costs	226
Manufacturing Efficiencies	229
"Steady-State" Example	231
Learning Curves	233
Isolated Venture Cost Analysis - Preliminary Items	234
New Venture Economics Applied to Thermoforming	244
Entrepreneurial Risk	251
The Incremental Operation	252
Comparative Process Economics	255
References	260
 Appendix A COMMON CONVERSIONS - US-to-EUROPEAN METRIC	 261
Appendix B LIST OF SYMBOLS	262
Appendix C GLOSSARY	271
AUTHOR INDEX	275
SUBJECT INDEX	278
BIOGRAPHY	299
