

CONTENTS

Preface	V
Introduction	VII
Contributors	IX
FERMENTATION	
Antibody Production with Airlift Fermentors <i>J. R. Birch, K. Lambert, P. W. Thompson, A. C. Kenney and L. A. Wood</i>	1
Monoclonal Antibody Production in Stirred Reactors <i>J. D. Macmillan, D. Velez, L. Miller and S. Reuveny</i>	21
Microcarrier Cell Culture <i>R. Fleischaker</i>	59
ENCAPSULATION	
Cellular Microencapsulation for Large-Scale Production of Monoclonal Antibodies <i>R. Rupp, K. Gilbride and M. Oka</i>	81
Entrapment of Cultured Cells in Agarose Beads <i>K. Nilsson</i>	95
BIO-REACTORS	
An Automated Hollow Fiber System for the Large Scale Manufacture of Mammalian Cell Secreted Product <i>M. D. Hirschel and M. L. Gruenberg</i>	113
Continuous Cell Culture with Fluidized Sponge Beads <i>R. C. Dean, Jr., S. B. Karkare, P. G. Phillips, N. G. Ray and P. W. Runstadler, Jr.</i>	145
Perfusion Cell Culture System Based on Ceramic Matrices <i>B. K. Lydersen</i>	169
PLANT CELL CULTURE	
Large Scale Plant Cell Culture <i>G. F. Payne, M. L. Shuler and P. Brodelius</i>	193
REGULATORY CONSIDERATIONS	
Safety Considerations for Cell Culture-Derived Biologicals <i>A. S. Lubiniecki</i>	231
Index	249
