Contents

1. **Relativity in Astrometry, Celestial Mechanics and Geodesy** 1
   - 1.1 Astrometry 1
   - 1.2 Celestial Mechanics 12
   - 1.3 Geodesy 25

2. **Newtonian and Relativistic Space-Time** 32
   - 2.1 Newtonian Space-Time 32
   - 2.2 Relativistic Space-Time 37

3. **Reference Frames and Astrometry** 43
   - 3.1 Introduction 43
   - 3.2 Clocks and the Temporal Aspect of Reference Frames 49
   - 3.3 Spatial Reference Directions 56
     - 3.3.1 Gravitational Compass and Geoid 56
     - 3.3.2 The Stellar Compass 59
     - 3.3.3 The Inertial Compass 65
   - 3.4 Reference Frames and Coordinate Systems 76
     - 3.4.1 Frame Induced Coordinates 76
     - 3.4.2 Coordinate Induced Frames 79
   - 3.5 Station Coordinates and the Problem of Length 80

4. **Celestial Mechanics** 85
   - 4.1 Post-Newtonian Motion of Point Masses 85
   - 4.2 Motion of Satellites 88
     - 4.2.1 Spherical Field of the Earth and the Problem of Coordinates 89
     - 4.2.2 The Gravito-Magnetic Field of the Earth 95
     - 4.2.3 The Post-Newtonian Quadrupole 96
   - 4.3 Lunar Motion 97
   - 4.4 Motion of the Planetary System 107

Bibliografische Informationen
http://d-nb.info/890365520

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4.5 Numerically Produced Ephemerides 111
4.6 Timing Observations of Pulsars in Binary Systems 113
4.7 Relativistic Motion of Extended Bodies 120
4.7.1 Translational Motion 125
4.7.2 Spin Motion 137
4.7.3 Beyond the First Post-Newtonian Approximation . . . 138

5. Geodesy 144
5.1 Post-Newtonian Gravimetry 144
5.2 Realisation of Time-Scales 148
5.2.1 Synchronisation of Earthbound Clocks by means of Portable Clocks 148
5.2.2 Comparison of Clocks: Station Clock – Satellite Clock . 150
5.2.3 Doppler Measurements in the Vicinity of the Earth . . 151
5.3 Space Methods 152
5.3.1 Laser Ranging to Satellites and the Moon 152
5.3.2 VLBI 155

Appendix 159
A.1 PPN-Metric, Christoffel Symbols and Curvature Tensor 159
A.2 The PPN Two-Body Problem 165
A.2.1 The Wagoner-Will Representation 167
A.2.2 The Brumberg Representation 170
A.2.3 The Damour-Deruelle Representation 173
A.2.4 The Solution with Osculating Elements 177
A.3 On the PPN Hill-Brown Theory 179
A.3.1 Geocentric EIH Equations for the Restricted Three-Body Problem 180
A.3.2 The Geodetic Precession as derived from the EIH Equations 183
A.3.3 The PPN Hill-Brown Calculation in the Instantaneous Geocentric System 185
A.4 On the PPN Euler Equation 191
