## **Contents**

| 1. | Fund                     | lamentals  | 1           |
|----|--------------------------|--|-------------|
|    | 1.1                      | Basic Definitions  | 2           |
|    | 1.2                      | Spatial Covariances of Complex Random Fields                           | 5           |
|    | 1.3                      | Spatial Spectral Representations of Homogeneous Random Fields .        | 10          |
|    | 1.4                      | Locally Homogeneous Random Fields                                      | 13          |
|    | 1.5                      | Quasi-Homogeneous Fields   | 17          |
|    | 1.6                      | Space-Time Spectral Representations of Random Fields                   | 19          |
|    | 1.7                      | Functional Treatment of Random Fields                                  | 23          |
|    | 1.8                      | Exercises  | 34          |
| 2. | Radi                     | ation and Diffraction of Random Wave Fields                            | 50          |
|    | 2.1                      | Basic Types of Statistical Wave Problems                               | 50          |
|    | 2.2                      | Random Waves in an Unbounded Homogeneous Medium                        | 54          |
|    | 2.3                      | Diffraction of Plane Wave on an Infinite Chaotic Screen                | 61          |
|    | 2.4                      | Random Field Diffraction in Simple Optical Systems                     | 75          |
|    | 2.5                      | Excitation of Fields by Random Sources                                 | 88          |
|    | 2.6                      | Exercises  | 98          |
| 3. | Ther                     | mal Electromagnetic Fields   | 1 <b>09</b> |
|    | 3.1                      | Preliminary Remarks  | 109         |
|    | 3.2                      | Stochastic Maxwell Equations   | 11 <b>2</b> |
|    | 3.3                      | Equilibrium Thermal Fluctuations in Continuous Dissipative             |             |
|    |                          | Systems  | 115         |
|    | 3.4                      | Correlation of External Thermal Sources in Electrodynamics             | 120         |
|    | 3.5                      | Generalized Kirchhoff's Law  | 123         |
|    | 3.6                      | Examples of the Use of the Generalized Kirchhoff's Law                 | 1 <b>29</b> |
|    | 3.7                      | Waveguide Form of Kirchhoff's Law                                      | 136         |
|    | 3.8                      | Thermal Radiation and Antennas   | 141         |
|    | 3.9                      | Equilibrium Thermal Fields. Equilibrium Form of the FDT                | 146         |
|    | 3.10                     | Thermal Fields in Gyrotropic Bodies                                    | 150         |
|    | 3.11                     | Thermal Fields in Media with Spatial Dispersion                        | 154         |
|    | 3.12                     | Exercises  | 162         |
| 4. | Single Scattering Theory |  | 174         |
|    | 4.1                      | Method of Small Perturbations  | 174         |
|    | 4.2                      | Mean Intensity of Scattered Fields                                     | 178         |
|    | 4.3                      | Effective Scattering Cross-Section. Applicability of Single Scattering |             |
|    |                          | Approximation  | 189         |
|    |                          |  |             |
|    |                          |  |             |
