

Contents

Preface		xi
Acknowledgments		xiii
Chapter 1	The Need for Analysis	1
	The Unsatisfactory State of Public Policy-Making	1
	Why Public Decision-Making So Often Fails	3
	Policy Analysis	5
	The Current State of Analysis in the Public Sector	6
	Why Analysis Has Trouble	8
	What Can Be Expected from Public Policy Analysis?	10
Chapter 2	What Sort of Problem? What Sort of Analysis?	13
	Problems Where Analysis Can Help	14
	Other Names for Policy Analysis	21
	What Policy Analysis Is Not	25
	Alternative Sources of Advice	25
	Incrementalism	26
Chapter 3	A Homely Illustration	30
	Background	30
	Concepts and Principles	31
	An Example	33

Chapter 4	A Basic Framework for Policy Analysis	43
	The Elements of Analysis	45
	The Process of Analysis	47
	The Process Illustrated	62
Chapter 5	Initiating the Analytic Process	68
	Defining the Problem	69
	Preparing an Issue Paper	71
	Organizing the Work	76
	The Work Statement	78
	Choosing the Approach	79
	Gathering the Information	82
Chapter 6	Objectives and the Measurement of Their Attainment	85
	Importance	85
	Some Difficulties with Objectives	87
	How Analysis Can Help	89
	Multiple and Conflicting Objectives	92
	The Relation of Objectives to Effectiveness	95
	Difficulties with Effectiveness	96
	Approaches to Measuring Effectiveness	101
	Taking into Account Distributional Effects	103
	Benefit Measurement in Health Programs	105
Chapter 7	Alternatives	107
	Finding the Alternatives	107
	Screening the Alternatives	111
	Desirable but Often Unspecified Characteristics	112
	Examining the Alternatives	113
	Readying the Alternatives for Implementation	115
	Concluding Remarks	115
Chapter 8	Costs	117
	The Meaning of Cost	117
	Why Costs Are Considered Easier to Measure than Benefits	119
	Identifying and Determining Costs	120
	Money as a Measure of Costs	121
	What Costs Are Relevant?	122
	External and Internal Costs	123
	Marginal Costs	124
	Cost as Output	125
	Discounting	127

Other Comments on Costs 128

Appendix. The Cost of Automobile Pollution:
A First-Order Analysis 132
by Joseph F. Coates

Chapter 9 Models 136

What Is a Model? 136

An Example of a Mathematical Model 140

The "Role" of the Model 143

Classification of Models 145

Some Characteristics of Models 150

Improving the Model 152

The Need for Nonquantitative Models in Public
Policy Analysis 153

Uncertainty 154

Miscellaneous Remarks on Models 160

Chapter 10 Quantitative Methods
and Computer Models 163

What Is Quantitative Analysis? 163

Some Limitations of Quantitative Analysis 164

Some Implications of the Limitations 167

Mathematics and Policy Analysis 169

Computers 172

Simulation 174

An Example of a Computer Simulation 175

Advantages and Drawbacks 180

Chapter 11 Qualitative Methods and Mental Models 184

Experts and the Role of Judgment 185

Scenarios and Scenario Writing 191

Operational Gaming 193

Observations on Methods 195

The Value of Games 198

Group Judgment and the Delphi Technique 203

Chapter 12 The Criterion Problem 206

Importance 206

Considerations in Selecting a Criterion 207

Suboptimization 210

Solutions to the Criterion Problem 213

Chapter 13	A Case Study in Modeling: Reducing Fire Company Response Time	222
	Background	222
	Fire Department Communications: Reducing Dispatching Delays	224
	<i>by Arthur J. Swersey</i>	
Chapter 14	A Case Study in Benefit Measurement: Public Programs to Save Lives	240
	The Decision Problem	241
	Effectiveness	246
	Estimations of Costs	250
	Benefit Measures	253
	Conclusions	258
Chapter 15	Evaluation and Experiment	262
	Evaluation to Affect Resource Allocation	266
	Evaluation to Improve Operations	269
	Experimentation	271
	Observations	273
	Concluding Remarks	276
Chapter 16	Forecasting and Planning	278
	Forecasting	279
	Planning	282
	Relation of Planning to Analysis	285
	Methods of Planning	286
	Planning and Budgeting	288
	Is Planning Worthwhile?	291
Chapter 17	Acceptance	292
	Acceptance	294
	Presentation	295
	Working with the Client	296
	“Educating” the Client	297
	Helping the Client Negotiate	299
	Clients and Decision-Makers	300
Chapter 18	Implementation	305
	Difficulties in Implementation	306
	Models of Implementation	310
	The Analyst and Implementation	312
	Concluding Remarks	317

Chapter 19	Pitfalls and Limitations	318
	Pitfalls Arising from Misconceptions	320
	Pitfalls Introduced by the Analyst	325
	Pitfalls Concerned with the Use of Analysis	334
Chapter 20	Politics, Ethics, and Guidance from Analysis	340
	Analysis and Politics	340
	Values	344
	Who Is the Real Client?	345
	Taking Uncertainty into Account in Decision- Making	349
	Ways to Increase the Value of Public Policy Analysis	352
	Where We Stand	356
	References	359
	Selected List of Rand Books	373
	Index	375
