

Contents

<i>Series Preface</i>	vii
<i>Preface</i>	ix
1. Introduction	1
A. Perspective	1
B. Forest Ecosystems	3
C. Forest Stress	6
2. Air Pollution	8
A. Pollutant Materials	9
B. Pollutant Deposition	13
C. Air Pollution Interaction with Forests	20
D. Book History	23
<i>SECTION I: FOREST FUNCTION AS SOURCES AND SINKS FOR AIR CONTAMINANTS—CLASS I INTERACTIONS</i>	
3. Role of Forests in Major Element Cycles: Carbon, Sulfur, and Nitrogen	55
A. Carbon Pollutants	57
B. Sulfur Pollutants	66
C. Nitrogen Pollutants	70
D. Summary	76

4. Forests as Sources of Hydrocarbons, Particulates, and Other Contaminants	83
A. Volatile Hydrocarbons	83
B. Particulates	89
C. Forest Fires	96
D. Summary	106
5. Forests as Sinks for Air Contaminants: Soil Compartment	113
A. Forest Soils as Particulate Sinks	114
B. Forest Soils as Sinks for Atmospheric Gases	133
C. Summary	142
6. Forests as Sinks for Air Contaminants: Vegetative Compartment	147
A. Forest Vegetation as a Sink for Particulate Contaminants	147
B. Forest Vegetation as a Sink for Gaseous Contaminants	160
C. Summary	171
7. Class I Summary: Relative Importance of Forest Source and Sink Strength and Some Potential Consequences of these Functions	181
A. Forests as Sources of Pollutants	182
B. Forests as Sinks for Air Pollutants	192
<i>SECTION II: FORESTS ARE INFLUENCED BY AIR CONTAMINANTS IN A SUBTLE MANNER—CLASS II INTERACTION</i>	
8. Forest Tree Reproduction: Influence of Air Pollutants	209
A. Pollen Production and Function	209
B. Flower, Cone, and Seed Production	214
C. Seedling Development	218
D. Summary	220
9. Forest Nutrient Cycling: Toxic Ions	225
A. Heavy Metal Ion Toxicity	227

B. Hydrogen Ion Acidity and Toxicity	247
C. Aluminum Toxicity	253
D. Manganese Toxicity	260
E. Summary	260
10. Forest Nutrient Cycling: Leaching and Weathering	269
A. Vegetative Leaching	269
B. Soil Leaching	277
C. Soil Weathering	282
D. Summary	284
11. Forest Nutrient Cycling: Rhizosphere and Symbiotic Microorganisms	292
A. Rhizosphere	292
B. Fungal Symbionts	297
C. Bacterial Symbionts	302
D. Other Nitrogen-Fixing Organisms	307
E. Summary	307
12. Forest Tree Metabolism: Carbon Dynamics	313
A. Photosynthesis	313
B. Constraints on Photosynthesis	315
C. Photosynthetic Suppression: Forest Tree Seedlings or Cuttings	315
D. Photosynthetic Suppression: Forest Tree Saplings	323
E. Photosynthetic Suppression: Large Forest Trees	330
F. Photosynthetic Response to Air Contaminants: Mechanism of Suppression	332
G. Carbon Allocation	334
H. Respiration	335
I. Summary	336
13. Forest Biotic Agent Stress: Air Pollutants and Phytophagous Forest Insects	347
A. Sulfur Dioxide	348
B. Oxidants	349
C. Fluoride	356
D. Acid Deposition	357
E. Trace Metals	359
F. Summary	360

14. Forest Biotic Agent Stress: Air Pollutants and Disease Caused by Microbial Pathogens	366
A. Sulfur Dioxide	369
B. Ozone	373
C. Fluoride	378
D. Particulates	378
E. Summary	390
15. Forest Abiotic Agent Stress: Symptomatic Foliar Damage Directly Caused by Air Contaminants	398
A. Limitations on Generalizations Concerning Direct Air Pollutant Influence on Trees	399
B. Sulfur Dioxide	405
C. Nitrogen Oxides	408
D. Ozone	410
E. Peroxyacetylnitrate	415
F. Fluoride	417
G. Trace Metals	419
H. Acid Deposition	423
I. Other Air Contaminants	424
J. Summary	426
16. Class II Summary: Forest Responds by Exhibiting Alterations in Growth, Biomass, Species Composition, Disease, and Insect Outbreaks	435
A. Forest Growth Reduction Caused by Air Pollution	436
B. Altered Succession and Species Composition	459
C. Altered Forest Pest Influence	464
D. Case Study: Response of a Forest Ecosystem to Air Pollution	467
E. Summary	474
<i>SECTION III: FOREST ECOSYSTEMS ARE INFLUENCED BY AIR CONTAMINANTS IN A DRAMATIC MANNER— CLASS III INTERACTIONS</i>	
17. Forest Ecosystem Destruction: A Localized Response to Excessive Air Pollution	485
A. Sulfur Dioxide	486
B. Fluorides	493
C. Other Pollutants	494
D. Summary	495

18. Forest Dieback/Decline: A Regional Response to Excessive Air Pollution Exposure	501
A. Some Concepts of Forest Morbidity and Morality	501
B. Forest Dieback/Decline	502
C. Red Spruce Decline in North America	510
D. Summary	518

SECTION IV: GLOBAL ATMOSPHERIC STRESS AND FOREST RISK ASSESSMENT

19. Alterations in Global Radiation Fluxes: Implications for Forest Health	527
A. Global-Scale Air Contaminants	527
B. Global Pollutant Regulation of Atmospheric Radiation Fluxes	532
C. Forest Ecosystem Impact of Increased Ultraviolet Radiation at the Surface of the Earth	539
D. Forest Ecosystem Impact of Increased Carbon Dioxide and Altered Global Climate	543
E. Conclusions	551
20. Forest Quality and Air Quality: Forest Health Risk and Future Needs	558
A. Fundamentals of Forest Health	558
B. Relative Importance of Specific Air Pollutants to Forest Ecosystems	566
C. Relative Importance of Air Pollutants for Specific Forest Regions: United States Summary of Risk	576
D. Future Needs	584
E. Conclusion	600
Index	611
