

# CONTENTS

## CHAPTER 1

### **GAS-PHASE ORGANOMETALLIC CHEMISTRY OF TRANSITION METAL HYDRIDES**

1

*P. B. Armentrout and L. S. Sunderlin (Salt Lake City, USA)*

- 1.1. Introduction and scope 1
- 1.2. Diatomic transition metal hydrides 2
- 1.3. Homoleptic transition metal hydrides 30
- 1.4. Transition metal hydride complexes 34
- 1.5. Hydrides of transition metal clusters 48
- 1.6. Summary and outlook 56
- Acknowledgments 57
- References 57

## CHAPTER 2

### **MATRIX STUDIES OF TRANSITION METAL HYDRIDES**

65

*R. L. Sweany (New Orleans, USA)*

- 2.1. Matrix isolation of stable hydrides 66
- 2.2. Hydrides formed in situ 79
- 2.3. Conclusion 95
- References 96

## CHAPTER 3

### **TRANSITION METAL HYDRIDES: STRUCTURE AND BONDING**

103

*C. W. Bauschlicher, Jr., and S. R. Langhoff (Moffet Field, USA)*

- 3.1. Introduction 103
- 3.2. Qualitative features of transition metal bonding 104
- 3.3. Methods 105
- 3.4. Results and discussion 108
- 3.5. Conclusions 123
- References 124

vii

## CHAPTER 4

**THEORETICAL STUDIES OF OXIDATIVE  
ADDITION AND REDUCTIVE ELIMINATION  
OF HYDROGEN AND ALKANES**

127

*P. J. Hay (Los Alamos, USA)*

- 4.1. Introduction 127
  - 4.2. Oxidative addition to  $d^{10} ML_2$  and related systems 128
  - 4.3. Addition of  $H_2$  and  $CH_4$  to  $d^8 ML_4$   
and related complexes 136
- Acknowledgments 146  
References 146

## CHAPTER 5

**TRANSITION METAL DIHYDROGEN COMPLEXES:  
THEORETICAL STUDIES**

149

*J. K. Burdett, O. Eisenstein, and S. A. Jackson (Chicago, USA;  
Orsay, France)*

- 5.1. Introduction 149
  - 5.2. Qualitative description of  $M-(H_2)$  bonding 150
  - 5.3. More-detailed form of the orbitals 158
  - 5.4. Polyhydrogen structures with one metal atom 166
  - 5.5. Interactions between nonbonded hydride centers 173
  - 5.6. Binuclear polyhydrogen molecules 174
  - 5.7. Conclusions 180
- Acknowledgments 181  
References 181

## CHAPTER 6

**HYDROGEN TRANSFER FROM TRANSITION  
METAL HYDRIDES: THEORETICAL ASPECTS**

185

*N. Koga and K. Morokuma (Okazaki, Japan)*

- 6.1. Introduction 185
- 6.2. Hydride migration to coordinated olefin 187
- 6.3. Hydride migration to coordinated formaldehyde 203
- 6.4. Hydride migration to carbon dioxide 206
- 6.5. Hydride migration to carbonyl ligand 211
- 6.6. Hydride migration to coordinated carbene 226
- 6.7. Acidity of hydrogen in transfer 227

6.8. Conclusion	229
References	230

## CHAPTER 7

**THEORETICAL STUDIES OF THE  
PHOTOCHEMISTRY OF TRANSITION  
METAL HYDRIDES**

235

*C. Daniel and A. Veillard (Strasbourg, France)*

7.1. Introduction	235
7.2. Theoretical methods	237
7.3. Excited states of the reactants	240
7.4. Potential-energy surfaces and reaction mechanisms	244
7.5. State correlation diagrams	248
7.6. Conclusion	256
References	257

## CHAPTER 8

**ISOTOPE EFFECTS IN REACTIONS  
OF TRANSITION METAL HYDRIDES**

263

*R. M. Bullock (Upton, USA)*

8.1. Introduction	263
8.2. Proton transfer reactions	264
8.3. Spectroscopic studies of equilibrium isotope effects	267
8.4. Hydrogen atom transfer from metal hydrides	269
8.5. Formation of metal hydrides by hydrogen atom transfer reaction	277
8.6. Insertion of alkenes into M—H bonds	277
8.7. $\beta$ -Hydride elimination from metal alkyl complexes	278
8.8. Reactions of metal alkyl hydride complexes	283
8.9. Isotope effects in C—H bond activation	287
8.10. Reactions of H <sub>2</sub> with metal complexes	294
8.11. Reductive elimination of H <sub>2</sub> from MH <sub>2</sub>	296
8.12. Formation and reactions of M( $\eta^2$ -H <sub>2</sub> ) complexes	297
8.13. Insertion of CO <sub>2</sub> into an M—H bond	297
8.14. Insertion of CO into an M—H bond	298
8.15. $\alpha$ -Elimination and $\alpha$ -insertion reactions	298
8.16. Protonation reactions of organometallic complexes	300
8.17. Isotopic effects on spectral properties of metal hydrides	301
8.18. Conclusions	303
Acknowledgements	304
References	304

## CHAPTER 9

**ACIDITY OF HYDRIDO TRANSITION METAL  
COMPLEXES IN SOLUTION**

309

*S. S. Kristjánssdóttir and J. R. Norton (Fort Collins, USA)*

- 9.1. Introduction 309
- 9.2. Thermodynamic acidity 313
- 9.3. Kinetic acidity 334
- Acknowledgments 351
- References 351

## CHAPTER 10

**NUCLEOPHILIC REACTIVITY OF TRANSITION  
METAL HYDRIDES**

361

*J. A. Labinger (Pasadena, USA)*

- 10.1. Definition of hydridic character 361
- 10.2. Tests of nucleophilicity 362
- 10.3. Hydridic character of anionic transition metal hydrides 364
- 10.4. Hydridic character of early transition metal hydrides 369
- 10.5. Other examples of nucleophilic hydrides 374
- 10.6. Conclusion 377
- References 377

## CHAPTER 11

**SUMMARY AND CONCLUSIONS**

381

*A. Dedieu (Strasbourg, France)***INDEX**

389
