

# Contents

<b>1. Introduction</b> .....	1
1.1 Programming of the Numerical Portions of the Programs ....	3
1.2 Programming of the Input and Output .....	6
<b>2. Numerical Differentiation and Introduction into Screen Dialogue</b> .....	12
2.1 Formulation of the Problem .....	12
2.2 Mathematical Methods .....	13
2.3 Programming .....	14
2.4 Exercises .....	19
2.5 Solutions to the Exercises .....	19
<b>3. Numerical Integration</b> .....	22
3.1 Formulation of the Problem .....	22
3.2 Numerical Methods .....	23
3.2.1 The Trapezoidal Rule .....	23
3.2.2 The Simpson Rule .....	24
3.2.3 Newton-Cotes Integration .....	25
3.2.4 The Gauss-Legendre Integration .....	25
3.3 Programming .....	29
3.4 Exercises .....	33
3.5 Solutions to the Exercises .....	33
<b>4. Harmonic Oscillations with Sliding and Static Friction, Graphical Output of Curves</b> .....	35
4.1 Formulation of the Problem .....	35
4.2 Numerical Treatment .....	36
4.2.1 Transformation of the Differential Equation .....	36
4.2.2 The Euler Method .....	37
4.3 Programming .....	37
4.4 Exercises .....	41
4.5 Solutions to the Exercises .....	41
<b>5. Anharmonic Free and Forced Oscillations</b> .....	43
5.1 Formulation of the Problem .....	43
5.2 Numerical Treatment .....	44

5.2.1 Improvement of the Euler Method .....	44
5.2.2 The Runge-Kutta Method .....	46
5.3 Programming .....	47
5.4 Exercises .....	49
5.5 Solutions to the Exercises .....	50
<b>6. Coupled Harmonic Oscillations .....</b>	<b>53</b>
6.1 Formulation of the Problem .....	53
6.2 Numerical Method .....	54
6.3 Programming .....	55
6.4 Exercises .....	57
6.5 Solutions to the Exercises .....	57
<b>7. The Flight Path of a Space Craft as a Solution of the Hamilton Equations .....</b>	<b>59</b>
7.1 Formulation of the Problem .....	59
7.2 Mathematical Methods .....	63
7.2.1 Mesh Width Adaptation in the Runge-Kutta Method ..	63
7.2.2 Coordinate Transformation .....	66
7.3 Programming .....	67
7.3.1 Hamilton's Equations of Motion .....	67
7.3.2 Automatic Mesh Width Adjustment in the Runge-Kutta Method .....	69
7.3.3 Coordinate Transformation .....	71
7.3.4 Main Program .....	73
7.4 Exercises .....	79
7.5 Solutions to the Exercises .....	79
<b>8. The Celestial Mechanics Three-body Problem .....</b>	<b>81</b>
8.1 Formulation of the Problem .....	81
8.2 Mathematical Method .....	85
8.3 Programming .....	85
8.4 Exercises .....	89
8.5 Solutions to the Exercises .....	89
<b>9. Computation of Electric Fields by the Method of Successive Over-relaxation .....</b>	<b>90</b>
9.1 Formulation of the Problem .....	90
9.2 Numerical Method.....	92
9.2.1 Discretisation of Laplace's Equation .....	92
9.2.2 The Method of Successive Over-relaxation .....	93
9.3 Programming .....	95
9.4 Exercises .....	100
9.5 Solutions to the Exercises .....	100

<b>10. The Van der Waals Equation</b> .....	102
10.1 Formulation of the Problem .....	102
10.2 Numerical Method .....	104
10.3 Programming .....	106
10.4 Exercises .....	112
10.5 Solutions to the Exercises .....	113
<b>11. Solution of the Fourier Heat Conduction Equation and the “Geo-Power Station”</b> .....	115
11.1 Formulation of the Problem .....	115
11.2 Method of Solution .....	117
11.3 Programming .....	119
11.4 Exercises .....	121
11.5 Solutions to the Exercises .....	122
<b>12. Group and Phase Velocity in the Example of Water Waves</b> .....	125
12.1 Formulation of the Problem .....	125
12.2 Numerical Method .....	129
12.3 Programming .....	131
12.4 Exercises .....	134
12.5 Solutions to the Exercises .....	134
<b>13. Solution of the Radial Schrödinger Equation by the Fox-Goodwin Method</b> .....	136
13.1 Formulation of the Problem .....	136
13.2 Numerical Method of Solution .....	140
13.3 Programming .....	142
13.4 Exercises .....	144
13.5 Solutions to the Exercises .....	145
<b>14. The Quantum Mechanical Harmonic Oscillator</b> .....	149
14.1 Formulation of the Problem .....	149
14.2 Numerical Method .....	150
14.3 Programming .....	153
14.4 Exercises .....	156
14.5 Solutions to the Exercises .....	156
<b>15. Solution of the Schrödinger Equation in Harmonic Oscillator Representation</b> .....	158
15.1 Formulation of the Problem .....	158
15.2 Numerical Method .....	159
15.3 Programming .....	160
15.4 Exercises .....	163
15.5 Solutions to the Exercises .....	163

<b>16. The Ground State of the Helium Atom by the Hylleraas Method</b> .....	165
16.1 Formulation of the Problem .....	165
16.2 Setting up the State Basis and the Matrix Equation .....	167
16.3 Programming .....	172
16.4 Exercises .....	180
16.5 Solutions to the Exercises .....	180
<b>17. The Spherical Harmonics</b> .....	181
17.1 Formulation of the Problem .....	181
17.2 Numerical Method .....	184
17.3 Programming .....	185
17.4 Exercises .....	187
17.5 Solutions to the Exercises .....	188
<b>18. The Spherical Bessel Functions</b> .....	189
18.1 Formulation of the Problem .....	189
18.2 Mathematical Method .....	191
18.3 Programming .....	192
18.4 Exercises .....	195
18.5 Solutions to the Exercises .....	195
<b>19. Scattering of an Uncharged Particle from a Spherically Symmetric Potential</b> .....	197
19.1 Formulation of the Problem .....	197
19.2 Mathematical Treatment of the Scattering Problem .....	200
19.3 Programming .....	203
19.4 Exercises .....	206
19.5 Solutions to the Exercises .....	207
<b>References</b> .....	209
<b>Subject Index</b> .....	211
