

CONTENTS

SECTION 1 - SOLID MECHANICS

Three-Dimensional Fracture Mechanics Weight Functions from Singular Fields	3
<i>R. Bains, M.H. Aliabadi, D.P. Rooke</i>	
Analysis of the Contact Problem Between Elastoplastic 2-D Bodies by Means of the BEM	15
<i>M. Alcantud, M. Doblaré, L. Gracia, J. Dominguez</i>	
A Combined Finite Element Boundary Element Approach for Three-Dimensional Stress Analysis	31
<i>J.L. Wearing, M.A. Sheikh, O. Rahmani</i>	
Shape Differentiation of Regularized BIE: Application to 3-D Crack Analysis by the Virtual Crack Extension Approach	43
<i>M. Bonnet</i>	
On Boundary Integral Inequalities in Contact Problems and Fracture Mechanics	57
<i>H.D. Bui</i>	
A Boundary Element Method for Stress Analysis of Bolted Joints in Structures	69
<i>L. Ulmet</i>	
The Accuracy of the Variational Approach to Shape Design Sensitivity Analysis	83
<i>Z. Zhao, R.A. Adey</i>	
A Relative Displacement Fundamental Solution for Unbounded Media - A BEM Formulation in Terms of Nodal Forces and Displacements	95
<i>M. de Azeredo</i>	
Calculation of the Displacement Vector of a Fluid-Loaded Stiffened Cylindrical Shell Under Constraints	109
<i>P.O. Mattei</i>	

SECTION 2 - DYNAMICS

Boundary Element Method in Bending and Eigenvalue Problems of Anisotropic Plates <i>G. Shi</i>	123
Forced Flexural Vibrations of Beams Using a Time-Stepping Boundary Element Method <i>E. de Langre, F. Arisa, D. Guilbaud</i>	139
Boundary Element Method for some Nuclear Power Reactor Problems <i>A. Alujevic, D. Beader, M. Najzer, P. Skerget, A. Trkov</i>	151
Propagation of Vibrations in a Layer of Ground <i>D. Habault</i>	169
Analysis of Stress Waves by Indirect BEM <i>H. Antes, G. Tröndle</i>	179
A BEM Formulation of the Dynamic Elastic-Plastic Structural Problem via Variational Principle <i>T. Panzeca, C. Polizzotto, M. Zito</i>	193
Vibration Isolation Studies in Non-homogeneous Soil <i>D.E. Beskos, K.L. Leung, I.G. Vardoulakis</i>	205
Variational Integral Method in the Time Domain for Elastic Scattering Problems <i>E. Becache</i>	219

SECTION 3 - FLUID FLOW

Evaluation of Extrudate Swell with Surface Tension by a Boundary Element Method <i>D.I. Graham</i>	233
Application of the BEM to Free Surface Seepage from Canals to Anisotropic Soils <i>E. Bruch, A. Lejeune, B. Mergeai</i>	249
A 3-D Direct BE Code to Solve the Diffraction of Water Waves <i>R. Rangogni, E. Ghisolfi</i>	261
Numerical Determination of Wind Pressures on 2-D Structures <i>N. Bazeos, D.E. Beskos</i>	269
Numerical Evaluation of the Drag Experienced by Spheres Falling Through Cylinders <i>D.I. Graham</i>	283

Including Total Flow Boundary Conditions in the BEM with Applications to Groundwater Flow <i>L.E. Coates</i>	299
Boundary-Domain Integral Method for the Laminar and Turbulent Flow <i>P. Skerget, A. Alujevic, Z. Rek, I. Zagar, B. Namestnik, M. Hribersek</i>	311
Aerodynamics of Airfoils in Shear Flows - A Numerical Study <i>M. El-Refae</i>	327
SECTION 4 - THERMAL PROBLEMS	
Direct and Inverse Potential Problems by BEM <i>R. Pasquetti, C. Le Niliot</i>	339
Solution of a Transient Heat Conduction Problem by a BEM Code Involving Only Boundary Integrals <i>B. Ould Sidi Fall, J.P. Barrand</i>	353
Treatment of Multi-dimensional Stefan Problems by the Alternating Phase Truncation Boundary Element Method <i>B. Sarler, A. Alujevic, G. Kuhn</i>	371
A Boundary Element Method Approach to the Thermal Modelling of Microelectronic Components and Packages <i>M. Driscart, G. De Mey</i>	393
SECTION 5 - ELECTROSTATICS AND ELECTROMAGNETICS	
The Boundary Element Method for Magnetostatic Problems Using a Distributed Array Processor <i>A.J. Davis</i>	407
Hybrid Finite Elements/Boundary Equations Method for the Analysis of Magnetic Fields Created by Complex Geometries in a Uniform External Field <i>X. Brunotte, G. Meunier</i>	417
A Problem in Magnet Design <i>G.T. Symm</i>	431
The BEM Analysis of Transient Eddy Currents in Non-homogeneous Regions <i>A. Krawczyk</i>	441

Recent Developments of Boundary Integral Method for Electromagnetism	451
<i>J.C. Sabonnadière, G. Meunier, A. Nicolas, L. Krähenbühl</i>	

SECTION 6 - NUMERICAL ASPECTS

BEM Using B-Splines	467
<i>J.J.S.P. Cabral, L.C. Wrobel, C.A. Brebbia</i>	
Residue Interpolation for Error Estimation in p-Adaptive Hierarchical Collocation Boundary Elements	483
<i>P. Parreira</i>	
Integral Equation Failure with the Poisson Equation	499
<i>L.E. Coates</i>	
Singular Integration on Isoparametric and Hierarchic Boundary Elements	507
<i>R.N.L. Smith, S.H. Crook</i>	
An Alternative Technique for Reducing Domain Integrals to the Boundary	517
<i>C. Alessandri, A. Tralli</i>	
Extremal Principles, Iteration and BEM for Mixed Problems	531
<i>G. Rieder</i>	
The Dual Reciprocity Boundary Element Method for the Helmholtz Equation	543
<i>P.W. Partridge, C.A. Brebbia</i>	
Accuracy of Boundary Element Computations	557
<i>R.A. Adey, A. Elzein</i>
