1	Quantum Dynamics of Polariton Condensates	1
	Fabrice P. Laussy	
1.1	Introduction	2
1.2	Modeling of the Polariton Dynamics	7
1.3	Formation of Coherence in a Gas of Boson (2D Polaritons)	9
1.4	Formation of Coherence in a Fully Quantized System (0D Polaritons)	19
1.5	Propagation of Polariton Wavepackets (1D Polaritons)	26
1.6	Summary and Outlooks	35
	References	37
2	Polariton Nonlinear Dynamics: Theory and Experiments	43
	Vladimir D. Kulakovskii, Sergei S. Gavrilov, Sergei G. Tikhodeev, and Nikolay A. Gippius	
2.1	Introduction	44
2.2	Giant Stimulated LP–LP Scattering Under CW Excitation	44
2.3	Semiclassical Theory of Microcavity Nonlinearities	47
2.4	Kinetics of Stimulated Polariton Scattering: Hysteresis Behavior of LP–LP Scattering and Experimental Evidence for Dynamic Self-Organization	51
2.5	Polariton Multistability in a “Spinor” Polariton System	57
2.6	Conclusion	63
	References	64
3	Vortices in Spontaneous Bose–Einstein Condensates of Exciton–Polaritons	67
	Benoit Deveaud-Plédran and Konstantinos G. Lagoudakis	
3.1	Introduction	67
3.2	Basics of Polaritons	68

3.3	Bose–Einstein Condensation of Exciton–Polaritons	69
3.4	Vortices in Polariton Condensates	72
3.5	Half Quantum Vortices in Polariton Condensates	73
3.6	Dynamics of Vortices in Polariton Condensates	77
3.7	Conclusions and Outlook	82
	References	83
4	The Berezinskii–Kosterlitz–Thouless Phase Transition in Exciton–Polariton Condensates	85
	Georgios Roumpos and Yoshihisa Yamamoto	
4.1	Introduction	86
4.2	Two-Dimensional Bose Gas and Superfluidity	87
4.2.1	Order Parameter, Spontaneous Symmetry Breaking, and Long-Range Order	88
4.2.2	Superfluidity	90
4.2.3	Quantized Vortices	92
4.2.4	Low Dimensions and the Hohenberg– Mermin–Wagner Theorem	94
4.2.5	Two-Dimensional Bose Gas	96
4.2.6	The Berezinskii–Kosterlitz–Thouless Transition	100
4.3	Basic Characterisation of the Sample and Condensate	104
4.3.1	Major Scientific Instruments	104
4.3.2	Real-Space and Momentum-Space Spectroscopy	105
4.3.3	Condensation Characteristics	109
4.3.4	Comparison of Pumping Schemes	112
4.4	Power-Law Decay of the Spatial Correlation Function	112
4.4.1	Condensate in Real Space	113
4.4.2	Michelson Interferometer Setup	115
4.4.3	Short-Distance Decay	118
4.4.4	Long-Distance Decay	121
4.4.5	Different Detunings and Orthogonal Prism Orientation	124
4.4.6	Nonequilibrium Model	125
4.4.7	Conclusion	127
4.5	Single Vortex–Antivortex Pair	128
4.5.1	Condensate Shape in Real Space	129
4.5.2	Pinned Vortex–Antivortex Pair	131
4.5.3	Mobile Vortex–Antivortex Pair	133
4.5.4	Different Condensate Shapes	137
4.5.5	Vortex-Pair Dynamics Described by Open-Dissipative Gross–Pitaevskii Equation	139
4.6	Future Directions	142
	References	143

5 Coexisting Polariton Condensates and Their Temporal Coherence in Semiconductor Microcavities	147
D.N. Krizhanovskii, David M. Whittaker, M.S. Skolnick, K.G. Lagoudakis, and M. Wouters	
5.1 Coexisting Non-equilibrium Polariton Condensates.....	148
5.1.1 Introduction	148
5.1.2 Experimental Technique and Sample	149
5.1.3 Real and Momentum Space Imaging of Coexisting Condensates	149
5.1.4 Gross-Pitaevskii Formalism of Non- equilibrium Polariton Condensates	153
5.1.5 Conclusion	156
5.2 Effect of Interactions on Temporal Coherence of Polariton Condensates.....	157
5.2.1 Introduction	157
5.2.2 Measurement of the First-Order and the Second-Order Correlation Functions of Non-resonantly Pumped Condensates	159
5.2.3 Quantum Optical Treatment of Temporal Coherence in Non-equilibrium Polariton Condensates ...	161
5.2.4 Temporal Coherence of a Polariton Condensate Excited in the Optical Parametric Oscillation Configuration	163
5.2.5 Conclusion	169
