

CONTENTS

Preface	v
Foreword	xi
Part I Productivity: Nature, role and sources	
<hr/>	
Chapter 1 Productivity: Concept and definition	3
1.1 What is productivity?	3
1.2 The importance and role of productivity	6
Chapter 2 Productivity improvement factors	9
2.1 Internal factors of enterprise productivity	11
Hard factors	11
Soft factors	12
2.2 External factors affecting enterprise productivity	15
Structural adjustments	16
Natural resources	19
Government and infrastructure	21
Chapter 3 Productivity analysis	23
3.1 An approach to productivity appraisal	24
Total productivity	24
Labour productivity	26
Government and public sector productivity appraisal	28
Comparing and analysing productivity	30
3.2 Productivity analysis in the enterprise	31
The Kurosawa structural approach	31
Lawlor's approach	35
Gold's approach	41
Quick productivity appraisal approach (QPA)	41
Inter-firm comparison (IFC)	50
Some problems of productivity analysis	54

Productivity management

Part II Improving productivity

Chapter 4 Managing organisation effectiveness 63

 4.1 General considerations 63

 Productivity improvement strategy 65

 The basic structure of productivity improvement 67

 Major management responsibilities 69

 4.2 Productivity Improvement Programmes (PIP): Concept and key elements 71

 Definition 71

 Programme objectives 71

 When to use productivity improvement programmes 72

 The main elements of productivity improvement programmes 72

 4.3 Organisational approaches to productivity improvement programmes 73

 Approach 1: The ILO OD/PIP approach 73

 Approach 2: The ALA performance improvement programme 75

 Case 1: The Meralco productivity improvement programme 77

 Case 2: Blue Circle Industries PLC 82

 4.4 Major variations of productivity improvement programmes 87

 Action Learning Programmes (ALP) 87

 In-plant action learning 89

 Productivity Improvement Circles (PIC) 94

 Performance Action Team process (PAT) 100

 The Inter-Firm Comparison and Business Clinic Approach (IFC/BCA) 109

Chapter 5 Productivity improvement techniques 121

 5.1 Industrial engineering techniques and economic analysis 121

 Work study 121

 Work simplification 130

 Pareto analysis 130

 Just-in-time method 131

 Management through value analysis 133

 Cost-benefit analysis 141

 Zero-based budgeting 141

 Cost-productivity allocation 142

 5.2 Behavioural techniques 145

 Organisation development 145

 Brainstorming 147

 Force-field analysis 148

 Nominal group technique 150

Part III Concentrating on vital areas

Chapter 6 Improving the use of capital resources	155
6.1 Waste reduction and energy conservation programmes	155
Some important principles	155
Energy conservation programmes	157
Energy management	159
Case study: Ewekoro Cement Works, Nigeria	165
6.2 Maintenance improvement	170
How to design a maintenance system	172
Training in maintenance improvement	174
Case study: Improving availability of shot-blasting plant (India)	174
6.3 Improving productivity through quality	180
Quality and productivity	180
Total quality control concept and quality management	181
Quality circles	189
Case study: Quality circles programme at Hughes Aircraft	195
Chapter 7 Effective human resource management	201
7.1 Management of people	201
The role of management	204
Manpower motivation	208
Workers' participation	214
Productivity training	216
Work organisation	218
Chapter 8 Productivity promotion at the national level	233
8.1 National efforts in productivity drives	234
The role of government in productivity growth	234
Education and training policy	239
National mechanisms for promoting institutional productivity	244
Productivity campaigns	253
Labour-management relations and the productivity movement	262
8.2 International co-operation and the productivity movement	267
The ILO role in productivity promotion	269
The European Association of National Productivity Centres	272
"MECOPOR" – Latin America	272
The Asian Productivity Organisation	273
Bibliography	275
Index	281
