

# Contents

<b>1</b>	<b>Introduction</b> . . . . .	1
1.1	Definition and Content of Gas Discharge . . . . .	1
1.2	History of Electrical Discharge Research . . . . .	2
1.3	Classification of the Discharge . . . . .	4
1.4	Application of the Discharge . . . . .	6
1.5	Definition and Content of Gas Insulation . . . . .	8
1.6	History and Application of Sulfur Hexafluoride . . . . .	9
1.7	Situation and Development of Environmentally Friendly Insulating Gas . . . . .	12
	References . . . . .	17
<b>2</b>	<b>Fundamentals of Gas Discharge</b> . . . . .	19
2.1	Charged Particles in the Process of Gas Discharge . . . . .	19
2.1.1	Photons . . . . .	20
2.1.2	Electrons . . . . .	21
2.1.3	Ground State Atoms (or Molecules) and Excited Atoms (or Molecules) . . . . .	22
2.1.4	Positive and Negative Ions . . . . .	25
2.2	Movement of Charged Particles . . . . .	26
2.2.1	Thermal Motion of Charged Particles . . . . .	26
2.2.2	Diffusion Motion of Charged Particles . . . . .	28
2.2.3	Drift Motion of Charged Particles . . . . .	29
2.3	Collision Interactions of Charged Particles . . . . .	34
2.3.1	Classification of Collision Between Particles . . . . .	34
2.3.2	Collision Energy Transfer . . . . .	35
2.3.3	Collision Characteristic Parameters . . . . .	36
2.3.4	Elastic Collisions of Electrons, Ions and Atoms . . . . .	38
2.3.5	Excitation and Ionization of Gas Atoms . . . . .	39
2.3.6	Gas Particle Excitation Transferring . . . . .	41
2.3.7	Disappearance of Charged Particles . . . . .	42
	References . . . . .	45

<b>3</b>	<b>Fundamental Theory of Townsend Discharge</b> . . . . .	47
3.1	Formation and Development of Electronic Avalanche . . . . .	47
3.1.1	Formation of Electronic Avalanche . . . . .	47
3.1.2	$\alpha$ Process . . . . .	50
3.1.3	$\gamma$ Process . . . . .	53
3.2	Self-Sustaining Discharge Criterion . . . . .	54
3.2.1	Gas Discharge Volt-Ampere Characteristics . . . . .	54
3.2.2	From Non-Self-Sustaining to Self-Sustaining Discharge . . . . .	57
3.2.3	The Condition of Self-Sustained Discharge . . . . .	58
3.3	Paschen's Law . . . . .	59
3.3.1	Paschen's Law . . . . .	59
3.3.2	The Impact of Impurity Gases on the Breakdown Potential . . . . .	62
3.3.3	The Impact of Electrodes on Breakdown Voltage . . . . .	67
3.3.4	The Impact of Electric Field Distribution on Breakdown Voltage . . . . .	68
3.3.5	The Impact of External Ionization Source on Breakdown Potential . . . . .	69
3.4	Townsend Discharge Experiments . . . . .	69
3.4.1	The Steady-State Townsend Experiment (SST) . . . . .	70
3.4.2	Pulse Townsend Method (PT) . . . . .	77
	References . . . . .	88
<b>4</b>	<b>Fundamental Theory of Streamer and Leader Discharge</b> . . . . .	89
4.1	Streamer Discharge Mechanism . . . . .	89
4.1.1	Basic Properties of Spark Discharge . . . . .	90
4.1.2	Streamer Discharge . . . . .	93
4.2	Long Gap and Leader Discharge . . . . .	113
4.2.1	Experimental Study on the Long Gap Discharge in Air . . . . .	113
4.2.2	Discharge Process in Non-uniform Electric Field . . . . .	114
	References . . . . .	121
<b>5</b>	<b>Theoretic Analysis Methods for Modeling Gas Discharge</b> . . . . .	123
5.1	Monte Carlo Simulation . . . . .	123
5.1.1	Introduction of General Monte Carlo Simulation . . . . .	123
5.1.2	Monte Carlo Simulation of Electron Avalanche Development . . . . .	128
5.1.3	Electron Swarm Parameters from Monte Carlo Simulation . . . . .	131
5.2	Boltzmann Equation Method . . . . .	140
5.2.1	Introduction to Boltzmann Equation Method . . . . .	140
5.2.2	Electron Swarm Parameters Calculated by Boltzmann Equation Method . . . . .	142
	References . . . . .	146

<b>6</b>	<b>Dielectric Strength of Atmosphere Air</b> . . . . .	149
6.1	Breakdown Voltage Characteristics in Uniform and Quasi-uniform Electric Fields . . . . .	150
6.1.1	Breakdown Characteristics Under Continuous Voltages . . . . .	150
6.1.2	Breakdown Characteristics Under Lightning Impulse Voltages . . . . .	154
6.1.3	Breakdown Characteristics Under Operating Impulse Voltage . . . . .	161
6.2	Breakdown Characteristics in Extremely Nonuniform Electric Fields . . . . .	164
6.2.1	Breakdown Characteristics Under Continuous Voltage . . . . .	164
6.2.2	Breakdown Characteristics Under Lightning Impulse Voltage . . . . .	168
6.2.3	Breakdown Voltage Under Operating Impulse Voltage . . . . .	176
6.3	Methods to Improve Insulation Strength in Air . . . . .	180
6.3.1	Improve the Shape of Electrodes . . . . .	180
6.3.2	Use of Electric Field Distortion by Space Charges . . . . .	182
6.3.3	Use of Barrier in Extremely Nonuniform Electric Fields . . . . .	185
6.3.4	Solid Insulating Coating Layer . . . . .	189
6.3.5	Use of High Pressure . . . . .	189
6.3.6	Use of High Vacuum . . . . .	191
6.3.7	Use of High-Dielectric-Strength Gases . . . . .	192
	References . . . . .	194
<b>7</b>	<b>Insulation Characteristics of Sulfur Hexafluoride (SF<sub>6</sub>)</b> . . . . .	195
7.1	Basic Physical and Chemical Properties of SF <sub>6</sub> . . . . .	195
7.1.1	Molecular Structure . . . . .	195
7.1.2	Gas State Parameters . . . . .	196
7.1.3	Electronegativity and Thermal Performance . . . . .	199
7.1.4	Decomposition of SF <sub>6</sub> . . . . .	201
7.2	Breakdown Characteristics of SF <sub>6</sub> . . . . .	204
7.2.1	Breakdown Characteristics in Uniform Electric Fields . . . . .	204
7.2.2	Breakdown Characteristics in Quasi-uniform Fields . . . . .	205
7.2.3	Breakdown Characteristics in Extremely Non-uniform Fields . . . . .	206
7.3	Surface Discharge Characteristics of Solid Insulators in SF <sub>6</sub> . . . . .	209
7.3.1	Effects of Electric Field Distribution . . . . .	210
7.3.2	Other Factors Affecting Solid Surface Discharge Characteristics . . . . .	212

7.4	Factors Affecting Insulation Properties of SF <sub>6</sub> . . . . .	218
7.4.1	Effects of Gas Pressure on Breakdown Voltage of SF <sub>6</sub> . . . . .	218
7.4.2	Effect of Electric Field Uniformity on Breakdown Voltage of SF <sub>6</sub> . . . . .	220
7.4.3	Effect of Polarity on Breakdown Voltage of SF <sub>6</sub> . . . . .	222
7.4.4	Effect of Surface Roughness on Breakdown Voltage of SF <sub>6</sub> . . . . .	226
	References . . . . .	229
<b>8</b>	<b>Insulating Characteristics of SF<sub>6</sub> Gas Mixtures . . . . .</b>	<b>231</b>
8.1	Improvements of Gas Mixtures on Defects of SF <sub>6</sub> . . . . .	231
8.1.1	Liquefaction Temperature . . . . .	231
8.1.2	Insulating Properties . . . . .	233
8.1.3	Cost of Gas . . . . .	237
8.1.4	Environmental Protection . . . . .	238
8.2	Mixing Characteristics of SF <sub>6</sub> Gas Mixtures . . . . .	238
8.2.1	Mixing Ratio . . . . .	238
8.2.2	Changes of Mixing Ratio with Height . . . . .	239
8.2.3	Mixing Process . . . . .	241
8.2.4	Recovery of Gas Mixtures . . . . .	241
8.3	Insulation Properties of Binary Mixtures of SF <sub>6</sub> with Other Gases . . . . .	243
8.3.1	Electrical Strength of SF <sub>6</sub> /N <sub>2</sub> Gas Mixtures . . . . .	243
8.3.2	Electrical Strength of SF <sub>6</sub> /CO <sub>2</sub> Gas Mixtures . . . . .	250
8.3.3	Contrast Between SF <sub>6</sub> /N <sub>2</sub> and SF <sub>6</sub> /CO <sub>2</sub> . . . . .	256
8.4	Other Multivariate SF <sub>6</sub> Gas Mixtures . . . . .	257
8.4.1	SF <sub>6</sub> /He and SF <sub>6</sub> /Ne Gas Mixtures . . . . .	257
8.4.2	SF <sub>6</sub> /Ar, SF <sub>6</sub> /Kr and SF <sub>6</sub> /Xe Gas Mixtures . . . . .	260
8.4.3	Gas Mixtures Consisting of SF <sub>6</sub> and Gases Containing Halogen Elements . . . . .	265
	References . . . . .	270
<b>9</b>	<b>Insulating Characteristics of Potential Alternatives to Pure SF<sub>6</sub> . . . . .</b>	<b>271</b>
9.1	Research Advances on Substitutes for SF <sub>6</sub> . . . . .	271
9.1.1	Significance of Research . . . . .	271
9.1.2	Current Research on Alternatives to SF <sub>6</sub> Gas . . . . .	274
9.2	Insulation Properties of c-C <sub>4</sub> F <sub>8</sub> and Its Gas Mixtures . . . . .	277
9.2.1	c-C <sub>4</sub> F <sub>8</sub> /CO <sub>2</sub> Discharge Characteristics and Analysis . . . . .	278
9.2.2	c-C <sub>4</sub> F <sub>8</sub> /CF <sub>4</sub> Discharge Characteristics and Analysis . . . . .	281
9.2.3	c-C <sub>4</sub> F <sub>8</sub> /N <sub>2</sub> Discharge Characteristics and Analysis . . . . .	283
9.2.4	c-C <sub>4</sub> F <sub>8</sub> /N <sub>2</sub> O Discharge Characteristics and Analysis . . . . .	285
9.2.5	The Influence of CO <sub>2</sub> , CF <sub>4</sub> , N <sub>2</sub> and N <sub>2</sub> O on the (E/N) <sub>lim</sub> of c-C <sub>4</sub> F <sub>8</sub> . . . . .	288

9.3	Insulation Performance of $\text{CF}_3\text{I}$ and Its Gas Mixtures . . . . .	289
9.3.1	Insulation Performance Analysis of $\text{CF}_3\text{I}$ . . . . .	290
9.3.2	Feasibility Analysis of $\text{CF}_3\text{I}$ and Its Gas Mixtures Used in C-GIS . . . . .	294
9.4	Insulation Performance of Other Potential Alternative Gas . . . . .	297
9.4.1	Perfluoropropane ( $\text{C}_3\text{F}_8$ ) . . . . .	297
9.4.2	Nitrous Oxide ( $\text{N}_2\text{O}$ ) . . . . .	303
