

Contents

1	Introduction	1
2	Theoretical Background	5
2.1	Thermoacoustic Instability	5
2.2	Dynamical Systems Theory	6
3	Experimental Setup	9
3.1	Burner Test Rig	9
3.2	Operating Conditions	10
3.3	Data Acquisition	11
4	Results and Discussion	15
4.1	Determination of the System's Stability Characteristics	15
4.2	Single Frequency Excitation in the Bistable Region	20
4.3	Noise Induced Response in the Stable Region	22
4.3.1	Analyses in the Time Domain	22
4.3.2	Analyses in the Frequency Domain	31
5	Conclusion	37
	Bibliography	41
