ZUSAMMENFASSUNG.....	21
ABSTRACT	25
1 SCIENTIFIC BACKGROUND	29
1.1 INTRODUCTION	29
1.2 ANOREXIA NERVOSA	30
1.2.1 <i>Medical issues and complications of the disease</i>	34
1.2.2 <i>Psychopharmacological treatment</i>	34
1.2.3 <i>Recovery</i>	35
1.3 PSYCHOLOGICAL ASPECTS OF ANOREXIA NERVOSA	36
1.3.1 <i>Etiopathogenetic factors</i>	36
1.3.2 <i>Personality aspects</i>	37
1.3.3 <i>Stress and Coping</i>	38
1.3.4 <i>Self-injurious behavior, suicide and mortality</i>	38
1.4 NEUROBIOLOGICAL ASPECTS OF ANOREXIA NERVOSA	40
1.4.1 <i>Structural changes</i>	41
1.4.2 <i>Structural alteration of the hippocampus</i>	43
1.4.3 <i>Neurobiological aspects concerning taste processing</i>	45
1.4.4 <i>Brain activity as a response to body images</i>	46
1.4.5 <i>Cognitive processing of taste-related stimuli</i>	47
1.4.6 <i>Viewing images of food</i>	49
1.4.7 <i>Administration of taste stimuli</i>	51
2 METHOD.....	57
2.1 OBJECTIVES	57
2.2 PARTICIPANTS	58
2.2.1 <i>Inclusion and exclusion criteria</i>	58
2.3 TEST PROCEDURE	59
2.4 MRI DESIGN	65
2.4.1 <i>Magnetic resonance measurement</i>	65
2.4.2 <i>Taste stimulation</i>	66
2.5 DATA ANALYSIS	69
2.5.1 <i>Sociodemographic, medical and psychological data</i>	69
2.5.2 <i>Structural brain data</i>	70

2.5.3	<i>fMRI data</i>	71
3	RESULTS	73
3.1	CHARACTERISTICS	73
3.1.1	<i>General characteristics</i>	73
3.1.2	<i>Health behavior</i>	74
3.1.3	<i>Weight limit</i>	75
3.1.4	<i>Psychiatric disorders in relatives</i>	75
3.1.5	<i>Co-morbid disorders</i>	75
3.1.6	<i>Medical issues/complications</i>	76
3.1.7	<i>Treatment and medication</i>	76
3.1.8	<i>Subjective health</i>	76
3.2	PSYCHOLOGICAL ASPECTS OF ANOREXIA NERVOSA	77
3.2.1	<i>Personality</i>	77
3.2.2	<i>Coping Strategies</i>	78
3.2.3	<i>Body perception</i>	79
3.2.4	<i>Eating disorder symptoms</i>	80
3.2.5	<i>Depression and anxiety</i>	81
3.2.6	<i>Obsessive-compulsive symptoms</i>	82
3.2.7	<i>Medical complaints</i>	83
3.2.8	<i>Self harm and suicidality</i>	84
3.2.9	<i>Quality of life</i>	85
3.3	NEUROBIOLOGICAL ASPECTS OF ANOREXIA NERVOSA	86
3.3.1	<i>Structural changes in overall brain volume and volume of the various brain areas</i>	86
3.3.2	<i>Volume of the hippocampal sub-structures</i>	89
3.3.3	<i>Associations between the total hippocampal volume and other brain areas, stress, and coping</i>	91
3.3.4	<i>Brain activity in response to taste stimuli: whole brain analyses</i> . 93	
3.3.5	<i>Brain activity in response to the different taste stimuli in the regions of interest</i>	95
3.3.6	<i>Associations between the brain activity in response to a taste in general and psychological aspects</i>	98
4	DISCUSSION	115
4.1	PSYCHOLOGICAL ASPECTS OF ANOREXIA NERVOSA	115
4.1.1	<i>Personality</i>	117
4.1.2	<i>Stress and coping</i>	118

4.1.3	<i>Body image</i>	119
4.2	NEUROBIOLOGICAL ASPECTS OF ANOREXIA NERVOSA	120
4.2.1	<i>Structural changes</i>	120
4.2.2	<i>Hippocampal changes and associations with psychological symptoms in AN patients</i>	121
4.2.3	<i>Brain activity as a response to a taste in general</i>	124
4.2.4	<i>Brain activity as a response to sucrose, umami, and citric acid in regions of interest</i>	126
4.2.5	<i>Associations between the brain activity as a response to a taste and psychological factors</i>	128
4.3	A CRITICAL REFLECTION OF THE CURRENT STUDY.....	130
4.4	STRENGTHS AND LIMITATIONS	132
4.5	IMPLICATIONS AND CONCLUSIONS	134
5	REFERENCES	137
6	APPENDIX	171
