

# Estimation of the effects of climate change scenarios on future Rhine water temperature development

<b>1. Summary</b>	3
<b>2. Introduction</b>	4
<b>3. Methods</b>	5
<b>3.1 Description of the models</b>	6
3.1.1 LARSIM	8
3.1.2 SOBEK	9
3.1.3 QSim	11
<b>3.2 Model Validation</b>	13
3.2.1 Actual heat discharges	13
3.2.2 Results of the model validation	14
3.2.3 Conclusions model validation	15
<b>3.3 Data used in the scenarios</b>	15
3.3.1 Future heat discharges	17
3.3.2 Future climate	18
3.3.3 Future river discharges	20
3.3.4 Future water temperatures at model boundaries	20
<b>4 Results and Discussion</b>	21
<b>4.1 Results for Basel – Delta</b>	22
4.1.1 Temperature profile of the Rhine	22
4.1.2 Summary statistics (tabular results)	25
4.1.3 Exceeding frequency standards	25
<b>4.2 Comparison of the available models</b>	28
4.2.1 Temperature profile of the Rhine	29
4.2.2 Summary statistics (tabular results)	31
4.2.3 Exceeding frequency standards	31
<b>4.3 Conclusions</b>	32
<b>5 References</b>	34
Appendix A Tables of simulation results	36
Appendix B Description of the model LARSIM	40
Appendix C Description of the model SOBEK	44
Appendix D Description of the model QSim	51
