

Contents

1 Introduction to Semantic Applications	1
Wolfram Bartussek, Hermann Bense, Thomas Hoppe, Bernhard G. Humm, Anatol Reibold, Ulrich Schade, Melanie Siegel, and Paul Walsh	
2 Guide for Pragmatical Modelling of Ontologies in Corporate Settings	13
Thomas Hoppe and Robert Tolksdorf	
3 Compliance Using Metadata	31
Rigo Wenning and Sabrina Kirrane	
4 Variety Management for Big Data	47
Wolfgang Mayer, Georg Grossmann, Matt Selway, Jan Stanek, and Markus Stumptner	
5 Text Mining in Economics	63
Melanie Siegel	
6 Generating Natural Language Texts	75
Hermann Bense, Ulrich Schade, and Michael Dembach	
7 The Role of Ontologies in Sentiment Analysis	87
Melanie Siegel	
8 Building Concise Text Corpora from Web Contents	95
Wolfram Bartussek	
9 Ontology-Based Modelling of Web Content: Example Leipzig Health Atlas	111
Alexandr Uciteli, Christoph Beger, Katja Rillich, Frank A. Meineke, Markus Loeffler, and Heinrich Herre	
10 Personalised Clinical Decision Support for Cancer Care	125
Bernhard G. Humm and Paul Walsh	
11 Applications of Temporal Conceptual Semantic Systems	145
Karl Erich Wolff	

12	Context-Aware Documentation in the Smart Factory	163
	Ulrich Beez, Lukas Kaupp, Tilman Deuschel, Bernhard G. Humm, Fabienne Schumann, Jürgen Bock, and Jens Hülsmann	
13	Knowledge-Based Production Planning for Industry 4.0	181
	Benjamin Gernhardt, Tobias Vogel, and Matthias Hemmje	
14	Automated Rights Clearance Using Semantic Web Technologies: The DALICC Framework	203
	Tassilo Pellegrini, Victor Mireles, Simon Steyskal, Oleksandra Panasiuk, Anna Fensel, and Sabrina Kirrane	
15	Managing Cultural Assets: Challenges for Implementing Typical Cultural Heritage Archive’s Usage Scenarios	219
	Kerstin Diwisch, Felix Engel, Jason Watkins, and Matthias Hemmje	
16	The Semantic Process Filter Bubble	231
	Christian Fillies, Frauke Weichhardt, and Henrik Strauß	
17	Domain-Specific Semantic Search Applications: Example SoftwareFinder	243
	Bernhard G. Humm and Hesam Ossanloo
