

Table of Content

Foreword	V
Acknowledgements	VII
Abstract	IX
Table of Content	XI
List of Figures	XV
List of Tables	XVII
List of Abbreviations	XIX
Part I: Fundamentals	1
1 Introduction	3
1.1 Motivation	3
1.2 Research Goals and Central Research Questions	7
1.3 Structure of Thesis	8
2 Related Work	11
2.1 CSCW and Information Infrastructures	11
2.2 The Public and its Formation.....	16
2.3 Application Domain of Crisis Management	22
2.4 Emergent Citizen Groups in Crisis Management	24
2.5 IT Support for Citizens during Crisis Management.....	31
2.6 Research Gap.....	32
3 Research Approach	35
3.1 Design Case Studies as Methodological Framework.....	35
3.2 Research Field	37
Part II: Collected Findings	39
4 Researching Public's Formation through Modern ICT Infrastructures ^(JCSCW)	41
4.1 Introduction	41
4.2 Theoretical Background: Publics, Communities and CSCW	44
4.3 Research Gap and Approach.....	53
4.4 Potential Methodologies for Detecting Shared Issues as Early Indicators for Publics.....	55
4.5 Towards an Operational Model of the Transformation from Publics into Communities.....	60
4.6 Practical Implications for Researching the Formation of Publics and their Transformation	65

4.7	Conclusion	72
5	Examining Individual's Activities 'in the Wild' ^(PUC)	75
5.1	Introduction	75
5.2	Related Work	78
5.3	Empirical Study: Capturing and Researching People's Behavior in the Wild	88
5.4	Concept of an Approach for Detecting and Assigning Activities to the Context.....	100
5.5	Implementation of the Technical Research Framework PartS.....	105
5.6	Evaluation.....	116
5.7	Discussion and Conclusion.....	120
6	Dynamic Quality Assessment of Citizen-Generated Content ^(TŌCHI)	127
6.1	Introduction	127
6.2	Related Work on Information Quality of Citizen-Generated Content	130
6.3	Research Approach.....	136
6.4	Empirical Study: The Use of Social Media for Situation Assessment in Emergencies.....	137
6.5	A Concept for Dynamic Quality Assessment in Social Media	142
6.6	Implementation of the Application 'Social Haystack'	150
6.7	Evaluation.....	153
6.8	Discussion and Conclusion.....	160
7	Structuring Citizen-Generated Content in Social Media ^(CHI)	165
7.1	Introduction	165
7.2	Related Work: Volunteers and Social Media.....	166
7.3	The Study Case: European Floods 2013	171
7.4	Empirical Study: Use of Social Media during the European Floods in Germany 2013	172
7.5	XHELP: Development of a Cross-Social-Media Application for Volunteers.....	175
7.6	Evaluation with Volunteers and Citizens.....	180
7.7	Discussion of Design Requirements	184
7.8	Conclusion:.....	185
8	Alignment of Physical and Digital Activities of Citizens ^(CHI)	189
8.1	Introduction	189

8.2	Social Media, Crowdsourcing and Mobile Crowd Sensing in Emergencies.....	190
8.3	Crowdsourcing Systems within Emergencies.....	191
8.4	Empirical Study: Integration of Activities of Volunteers and others during Emergencies	193
8.5	CrowdMonitor: A Concept for Assessing the Physical and Digital Activities of Citizens	200
8.6	Evaluation of CrowdMonitor.....	203
8.7	Discussion and Conclusion.....	207
Part III: Conclusion	209
9	Analysis.....	211
9.1	Operational Model for Publics-based Research.....	211
9.2	Practical and Methodological Challenges for Researching Publics..	212
9.3	Design Challenges for Examining and Understanding Information Infrastructures.....	216
9.4	Design and Implementation of Novel ICT Tools.....	222
9.5	Evaluation.....	240
10	Support for the Research of Information Infrastructures	247
10.1	Design Characteristics and Implications.....	247
10.2	Methodological Reflection on Publics-based Research on a Micro-vs. Macro-Level.....	252
10.3	Information Infrastructures and Infrastructuring	253
11	Summary and Outlook	255
References	259
