Preface XIII

Introduction: Biologizing Culture / Culturing Biology 1

Familiar Strangers, or, When Biology Meets Culture – Disciplining Biology – Biocultures: An Interdisciplinary Synthesis? – Biology and the Research Imagination of American Cultural Studies – Subjects in Biological Difference (Race and Gender)

I. The Materialism of Biological Encounters 45

1. Embodied Encounters: Emergence and Emergency 45

On the Materialism of Biological Encounters – Biology and Human Mobility – A Culpable Biography – The "Yellow Peril" Medicalized: Chinese Immigrants and the Bubonic Plague of 1899/1900 – Biological Transit across the American Hemisphere – Yellow Fever and the Biopolitics of Location – The White Man's "Biological Burden": Empire and Disease – Cuba and the Reed Yellow Fever Commission – The Philippines and the Specter of "Colonial Burnout"

2. The Public Life of Public Diseases: Epidemics and the Mass Media 115

Public Opinion and Public Diseases – Disease Imaginaries and Narrative Form – "Dark Invaders": The Military Response Narrative – Biomedical Jeremiads, or, How Have the Revelers Fallen – From Scratch: Medical Sherlocks – Imagined Immunities for Imagined Communities – Conclusion: Biological Encounters and the Culture of Blame

II. Not Normatively Human: Cultural Grammars and the Human Body	157
1. Corporeal Norms and the Experience of Inequality	157
<i>Norms as Imaginary Grammar of Cultural Oughtness – The Normal and the Pathological: Canguilhem – Normalizing Society: Foucault – Communicative Normalization: Habermas – When Life Goes Public: Biological Normo- philia(s) – Norms and the Institutionalization of Judgment – At the Far End of the Normative Body: Late Life and Disability</i>	
2. "Age" as Cultural Norm and Form	211
<i>The Age Chill Factor: Late Life as Bio-Cultural Pathology – Normal Not to Be Normal: Gerontology and Age Studies – "New Age"? Late Life and the Promises of Molecular Biology – Apocalyptic Embodiment: The Civic Identity of Late Life – Where "Age" Is: Cultural Topographies of Late Life – "Age": Embodied Selfhood or Cultural Brand Name?</i>	
3. Exception Incorporated: Disability as Inscription of Cultural Otherness	268
<i>Oppositional Bodies, or, Disability's Challenge to Able- Bodied Normativity – The Hero's Two Bodies: Disabled Veterans – Left Behind: Disability in Veteran (Auto)Bio- graphies – "A Culture of Hope"? Disability as Media Format – Zones of Vulnerability: Disability and Environmental Exposure – Spectral Disabilities, or, What You See Is What You (Don't) Get – Markers of (Un)Certainty: "Age," "Disability" and Communicative Interaction</i>	

III. Corporeal Semiotics: The Body of the Text / the Text of the Body	325
1. Textualizing Life—an Incomplete Project	325
<i>Bodies in Emergence and Emergency – National Intimacies: The "Politics of Life" and the Religious Right – Re-Writing the Book of Life: Genomics – Finding a Text for the Book of Life – Biological Futures – Parables of the Possible: Contours of an Enhanced Life – We the People, in Order to Have More Perfect Bodies: Biotechnology and Neoliberal Governance</i>	
2. Representations and the Traces of Suffering	370
<i>Putting It in Words, or, Another Distrust in the Signifier – Emphatic Embodiment – Private Practice: Pain as Inner Experience – The We of Pain – Pain as Relationship and Relation</i>	
3. The Silent Killer: Cancer(s)	397
<i>Stories We Die By: Cancers as Story Generators – Somatics, Semantics and the Allegory of Unregulated Growth – When the Flesh Becomes Word, or, The Semiotic Model of Human Embodiment</i>	
 InConclusive: Human Biology and the Work of Cultural Critique	429
<i>Biology, American Studies and Cultural Critique – Figures of the Collective: Human Biology as Cultural Idiom and Issue</i>
