

I Agricultural production	8	II Economic regions in transition	40
The field of tension between nutrition and food provision for a growing world population		Contributing factors and consequences	
Introduction to the topic		Introduction to the topic	
Agriculture in the tropics – the basis for an adequate supply of food for a growing global population?	10	The changing economy	42
Subsistence farming in the tropics – a centuries-old tradition		Spatial and structural change in old industrial regions	
The milpa-solar system in Yucatán, Mexico – a tradition with a promising future?	12	The Ruhr region – a coal and steel district in transition	44
Plantation farming in the tropics – producing for the global market		CentrO in Oberhausen – an example of successful structural change?	46
Banana cultivation in Colombia – who profits?	14	Location factors and decisions regarding location	
Conflicts resulting from the expansion of large-scale monocultures		Agonising choices	48
Soybean cultivation in Argentina – economic success with side effects?	16	The secondary sector – innovative and global	
Farmland in the tropics – scarce and coveted		The German textile industry – ensuring viability through innovation	50
Land grabbing as a contribution to food security?	18	Volkswagen, a global player – building a future with new production sites?	52
The rise of genetic engineering		Clusters – hotspots of innovation	
Increasing yields through genetic engineering – a reasonable and effective approach?	20	Silicon Valley – a high-tech location with a bright future?	54
The changing structure of US agriculture		Tertiarisation of the economy	
From family farm to large-scale agroindustrial operation	22	The Frankfurt am Main region – a centre of the service sector	56
Irrigation farming as the trigger for far-reaching structural processes in agriculture – the Great Plains (USA)	24	Introduction to the topic	58
Increasing agricultural productivity by specialisation and intensification?		Countries and regions in global competition	
Industrial poultry production on the rise	26	Special economic zones for the promotion of economic growth	
The agricultural industry alters regions – the Oldenburger Münsterland	28	The free trade zone in Shanghai (China)	60
Greenhouse cultivation in the Netherlands	30	Specialisation in specific industries	
Intensification in the oceans as well?		Hyderabad (India): an IT location	62
Can aquacultures contribute to food security?		Strategies employed to influence trade	
The example of salmon breeding in Norway	32	Free trade and protectionism	64
Agribusiness or small-scale farming operations?		Topic overview	
Who ensures food security for humanity?	34	The essentials in brief	66
Topic overview		SKILL CHECK	67
The essentials in brief	36	EXAMINATION TRAINING	
SKILL CHECK	36	The changing automobile industry – the example of the USA	68
EXAMINATION TRAINING			
Is agribusiness economically and ecologically sustainable?			
The example of tomato cultivation in California	38		

III Population development and migration	70	IV Global disparities	92
Causes of spatial problems		The challenge of unequal regional development	
Introduction to the topic		Introduction to the topic	
Migration on a global scale	72	Global development – global disparities	94
Crossing borders – international migration		Comparing levels of development	
The causes of migration	74	Economic indicators	96
Immigration – always in search of work	76	Social and multidimensional indicators	98
Emigration – migration as an opportunity for development	78	Underdeveloped countries, fast-developing countries, countries of the South – differences	100
The borders of Europe	80	Different countries – different preconditions for development	
Global population growth		A Sahel nation with a colonial heritage – Mali	102
More and more people every day	82	Mineral resources as a potential stimulus for development – Chile	104
A model of population development	84	Extreme disparities within national borders	
Ageing and shrinking populations – demographic change in industrialised countries	86	Fragmentation in India	106
Growth – demographic changes in developing countries	88	Causes of underdevelopment	
Topic overview		Different theories – different answers	108
The essentials in brief	90	Balancing global disparities	
SKILL CHECK	91	Strategies and ideas for development cooperation	110
		“Development from below”	
		Microcredits for the rural poor – Bangladesh	112
		Development through industrialisation	
		Expanding the secondary sector – South Korea	114
		Tourism as a development driver in a developing country	
		An island becomes a tourist destination – Phuket (Thailand)	116
		The conflict between mass tourism and sustainable tourism	118
		Balancing regional disparities	
		Driving growth by promoting regional economic development – China	120
		Model approaches to promoting regional growth	122
		Topic overview	
		The essentials in brief	124
		SKILL CHECK	125
		EXAMINATION TRAINING	
		Causes of underdevelopment – the example of Niger	126

V Towns and cities as complex settlement areas **128**

Between tradition and progress

Introduction to the topic

Towns and cities – historical legacy and present-day living space **130**

Historical-genetic town development in Europe

Cologne – of supra-regional importance for 2000 years **132**

Cologne – rising from the ruins **134**

Functional structure of towns and cities in Central Europe

Cologne – one city, many functions **136**

Social-spatial structure of towns and cities in Central Europe

Boomtown Munich **138**

Models of urban development in Germany

Urban models of the Chicago School – are they applicable to Germany? **140**

The central business district as a focal point for services

In Bremen's inner city **142**

Urban tourism as an economic factor

Hamburg as a travel destination **144**

Urban development in North America

The history of settlement in North America **146**

Functional differentiation and suburbanisation – Chicago **148**

Ethnic and social segregation – Los Angeles **150**

Topic overview

The essentials in brief **152**

SKILL CHECK **153**

EXAMINATION TRAINING

Historical-genetic development and functional transformation of cities – the example of Regensburg **154**

VI Metropolisation and marginalisation **156**

Unavoidable processes in the context of worldwide urbanisation?

Introduction to the topic

The world of cities **158**

Causes of the growth of megacities

The pull of cities – China **160**

Primate cities – predominance in all fields

Unipolar orientation in South Korea – the Seoul Metropolitan Area **162**

Marginalisation in megacities

Fragmentation – slum districts and gated communities in Buenos Aires **164**

Megacities – with high vulnerability

Threats from natural and anthropogenic dangers – Tokyo **166**

Solution strategies in megacities and metropolises

The fields of action of traffic, emissions and marginalisation **168**

Topic overview

The essentials in brief **170**

SKILL CHECK **171**

EXAMINATION TRAINING

Problems of megacities – the example of Lagos (Nigeria) **172**

VII The city, a good place for all to live in?	174	VIII Goods and services – always available?	202
Problems and strategies for future-oriented urban development		The importance of logistics and freight transport	
Introduction to the topic		Introduction to the topic	
The city as living space: different demands – different functions	176	Goods and services in a global world economy	204
Former port areas – problems and perspectives		Global sourcing – a challenge for logistics and freight transport	
The revitalisation of London’s East End	178	Transport chains in global freight traffic	206
Population loss and solution concepts		Markets must be accessible	
Wittenberge – a shrinking town		Ports adapt themselves – Singapore	208
Problem solving through clearance	180	The transformation of the international air transport network	210
A large city in decline?		Shopping worldwide, day and night – the World Wide Web	
Detroit – a shrinking city	182	Leipzig, a goods mail order centre	212
New cities for the millions		Call centres – networking of global services	
Founding new cities in China	184	Calling Manila – services around the clock	214
Spatial development and regional planning in Germany		The ecological rucksack in goods transport	
The point-axial spatial concept	186	Where are we going?	216
State development plan, North Rhine-Westphalia	188	The world in process of globalisation	
METHOD: One spatial area – different evaluations		Networked thinking – globalisation	218
Multi-perspective spatial evaluation with the use of new media	190	Topic overview	
Multi-perspective spatial evaluation of Cologne’s Riehl and Niehl districts	192	The essentials in brief	220
Global cities – modern centres of the world economy		SKILL CHECK	221
New York – global city number one?	194	EXAMINATION TRAINING	
Modern cities – sustainable planning concepts?		Ports as hubs for goods transport – the example of Duisburg	222
Fujisawa – an “intelligent” town within a town	196		
Lavasa – a multifunctional city	198		
Topic overview		Appendices	224
The essentials in brief	200	The university entrance diploma exam and long essay	
SKILL CHECK	201	The written university entrance diploma exam (Abitur) (skills and operators)	224
		The oral university entrance diploma exam (Abitur)	226
		Long essay (Facharbeit)	228
		Index	230
		Image Sources	232
