

Contents

Introduction — 1

1 Preliminaries — 5

- 1.1 Some definitions and notation — 5
- 1.2 Endomorphisms and homomorphisms of modules — 10
- 1.3 Discrete valuation domains — 18
- 1.4 Primary notions of module theory — 31

2 Basic facts — 45

- 2.1 Free modules — 45
- 2.2 Divisible modules — 48
- 2.3 Pure submodules — 53
- 2.4 Direct sums of cyclic modules — 57
- 2.5 Basic submodules — 61
- 2.6 Pure-projective and pure-injective modules — 67
- 2.7 Complete modules — 72

3 Endomorphism rings of divisible and complete modules — 81

- 3.1 Examples of endomorphism rings — 82
- 3.2 Harrison–Matlis equivalence — 83
- 3.3 Jacobson radical — 88
- 3.4 Galois correspondences — 98

4 Representation of rings by endomorphism rings — 107

- 4.1 Finite topology — 108
- 4.2 Ideal of finite endomorphisms — 110
- 4.3 Characterization theorems for endomorphism rings of torsion-free modules — 115
- 4.4 Realization theorems for endomorphism rings of torsion-free modules — 123
- 4.5 Essentially indecomposable modules — 129
- 4.6 Cotorsion modules and cotorsion hulls — 134
- 4.7 Embedding of category of torsion-free modules in category of mixed modules — 142

5 Torsion-free modules — 151

- 5.1 Elementary properties of torsion-free modules — 152
- 5.2 Category of quasihomomorphisms — 154

- 5.3 Purely indecomposable and copurely indecomposable modules — 163
- 5.4 Indecomposable modules over Nagata valuation domains — 174

6 Mixed modules — 183

- 6.1 Uniqueness and refinements of decompositions in additive categories — 184
- 6.2 Isotype, nice, and balanced submodules — 193
- 6.3 Categories Walk and Warf — 203
- 6.4 Simply presented modules — 211
- 6.5 Decomposition bases and extension of homomorphisms — 220
- 6.6 Warfield modules — 229

7 Determinity of modules by their endomorphism rings — 243

- 7.1 Theorems of Kaplansky and Wolfson — 244
- 7.2 Theorems of a topological isomorphism — 253
- 7.3 Modules over completions — 261
- 7.4 Endomorphisms of Warfield modules — 266

8 Modules with many endomorphisms or automorphisms — 275

- 8.1 Transitive and fully transitive modules — 275
- 8.2 Transitivity over torsion and transitivity mod torsion — 282
- 8.3 Equivalence of transitivity and full transitivity — 288

9 Appendix — 297

- 9.1 Isomorphic automorphism groups of p -adic torsion-free modules — 297
- 9.2 Isomorphism theorems for radicals — 301
- 9.3 Miscellaneous results — 306

Bibliography — 309

Symbols — 325

Index — 327
