

Contents

1	Propagators and Scattering Theory	1
1.1	Introduction	1
1.2	The Nonrelativistic Propagator	2
1.3	Green's Function and Propagator	3
1.4	An Integral Equation for ψ	6
1.5	Application to Scattering Problems	12
1.6	The Unitarity of the S Matrix	20
1.7	Symmetry Properties of the S Matrix	21
1.8	The Green's Function in Momentum Representation	23
1.9	Another Look at the Green's Function	29
1.10	Biographical Notes	38
2	The Propagators for Electrons and Positrons	39
3	Quantum-Electrodynamical Processes	77
3.1	Coulomb Scattering of Electrons	77
3.2	Scattering of an Electron off a Free Proton: The Effect of Recoil	96
3.3	Scattering of Identical Fermions	131
3.4	Electron-Positron Scattering	139
3.5	Scattering of Polarized Dirac Particles	150
3.6	Bremsstrahlung	157
3.7	Compton Scattering – The Klein-Nishina Formula	177
3.8	Annihilation of Particle and Antiparticle	190
3.9	Biographical Notes	239
4	Summary: The Feynman Rules of QED	243
4.1	The Feynman Rules of QED in Momentum Space	244
4.2	The Photon Propagator in Different Gauges	248
4.3	Biographical Notes	253
5	The Scattering Matrix in Higher Orders	255
5.1	Electron-Positron Scattering in Fourth Order	255
5.2	Vacuum Polarization	257
5.3	Self-Energy of the Electron	291
5.4	The Vertex Correction	298
5.5	Biographical Notes	327

6	Two-Particle Systems	329
6.1	The Bethe–Salpeter Equation	329
6.2	Biographical Notes	359
7	Quantum Electrodynamics of Strong Fields	361
7.1	Strong Fields in Atoms	364
7.2	Strong Fields in Heavy Ion Collisions	392
7.3	The Effective Lagrangian of the Electromagnetic Field	402
7.4	Biographical Notes	424
8	Quantum Electrodynamics of Spinless Bosons	425
8.1	The Klein–Gordon Equation	426
8.2	The Feynman Propagator for Scalar Particles	427
8.3	The Scattering of Spin-0 Bosons	429
8.4	The Feynman Rules of Scalar Electrodynamics	434
	Appendix	441
	Subject Index	443
