Brief Contents

Preface xix

PART ONE **Introduction 1**
CHAPTER 1 Economic Models 3
CHAPTER 2 Mathematics for Microeconomics 21

PART TWO **Choice and Demand 87**
CHAPTER 3 Preferences and Utility 89
CHAPTER 4 Utility Maximization and Choice 115
CHAPTER 5 Income and Substitution Effects 141
CHAPTER 6 Demand Relationships among Goods 183

PART THREE **Uncertainty and Strategy 205**
CHAPTER 7 Uncertainty 207
CHAPTER 8 Game Theory 247

PART FOUR **Production and Supply 295**
CHAPTER 9 Production Functions 297
CHAPTER 10 Cost Functions 325
CHAPTER 11 Profit Maximization 363

PART FIVE **Competitive Markets 399**
CHAPTER 12 The Partial Equilibrium Competitive Model 401
CHAPTER 13 General Equilibrium and Welfare 449

PART SIX **Market Power 489**
CHAPTER 14 Monopoly 491
CHAPTER 15 Imperfect Competition 525

PART SEVEN **Pricing in Input Markets 573**
CHAPTER 16 Labor Markets 575
CHAPTER 17 Capital and Time 599

PART EIGHT **Market Failure 631**
CHAPTER 18 Asymmetric Information 633
CHAPTER 19 Externalities and Public Goods 683

Brief Answers to Queries 717
Solutions to Odd-Numbered Problems 727
Glossary of Frequently Used Terms 741
Index 749

Contents

Preface xix

PART ONE **Introduction**

CHAPTER 1
Economic Models **3**

Theoretical Models 3
Verification of Economic Models 4
General Features of Economic Models 5
Structure of Economic Models 6
Development of the Economic Theory of Value 9
Modern Developments 18
Summary 19
Suggestions for Further Reading 20

CHAPTER 2
Mathematics for Microeconomics **21**

Maximization of a Function of One Variable 21
Functions of Several Variables 26
Maximization of Functions of Several Variables 34
The Envelope Theorem 36
Constrained Maximization 40
Envelope Theorem in Constrained Maximization Problems 45
Inequality Constraints 46
Second-Order Conditions and Curvature 48
Homogeneous Functions 55
Integration 58
Dynamic Optimization 63
Mathematical Statistics 67
Summary 76
Problems 77

Suggestions for Further Reading 81
Extensions: Second-Order Conditions and Matrix Algebra 82

PART TWO Choice and Demand

CHAPTER 3
Preferences and Utility 89
Axioms of Rational Choice 89
Utility 90
Trades and Substitution 92
The Mathematics of Indifference Curves 99
Utility Functions for Specific Preferences 102
The Many-Good Case 106
Summary 107
Problems 107
Suggestions for Further Reading 110
Extensions: Special Preferences 111

CHAPTER 4
Utility Maximization and Choice 115
An Initial Survey 116
The Two-Good Case: A Graphical Analysis 117
The n-Good Case 120
Indirect Utility Function 126
The Lump Sum Principle 127
Expenditure Minimization 129
Properties of Expenditure Functions 132
Summary 134
Problems 134
Suggestions for Further Reading 137
Extensions: Budget Shares 138

CHAPTER 5
Income and Substitution Effects 141
Demand Functions 141
Changes in Income 143
Changes in a Good's Price 145
The Individual's Demand Curve 148
Compensated (Hicksian) Demand Curves and Functions 151
A Mathematical Development of Response to Price Changes 156
Demand Elasticities 159
Consumer Surplus 166

Revealed Preference and the Substitution Effect 171
Summary 173
Problems 173
Suggestions for Further Reading 176
Extensions: Demand Concepts and the Evaluation of Price Indices 178

CHAPTER 6
Demand Relationships among Goods 183
The Two-Good Case 183
Substitutes and Complements 186
Net (Hicksian) Substitutes and Complements 188
Substitutability with Many Goods 189
Composite Commodities 190
Home Production, Attributes of Goods, and Implicit Prices 193
Summary 196
Problems 197
Suggestions for Further Reading 200
Extensions: Simplifying Demand and Two-Stage Budgeting 202

PART THREE Uncertainty and Strategy

CHAPTER 7
Uncertainty 207
Mathematical Statistics 207
Fair Gambles and the Expected Utility Hypothesis 208
Expected Utility 209
The Von Neumann–Morgenstern Theorem 210
Risk Aversion 212
Measuring Risk Aversion 216
Methods for Reducing Uncertainty and Risk 221
Insurance 221
Diversification 222
Flexibility 223
Information 230
The State-Preference Approach to Choice Under Uncertainty 231
Asymmetry of Information 237
Summary 237
Problems 238
Suggestions for Further Reading 241
Extensions: The Portfolio Problem 242

CHAPTER 8
Game Theory **247**
Basic Concepts 247
Prisoners' Dilemma 248
Nash Equilibrium 250
Mixed Strategies 256
Existence of Equilibrium 260
Continuum of Actions 261
Sequential Games 263
Repeated Games 270
Incomplete Information 273
Simultaneous Bayesian Games 273
Signaling Games 278
Experimental Games 284
Evolutionary Games and Learning 286
Summary 287
Problems 287
Suggestions for Further Reading 290
Extensions: Existence of Nash Equilibrium 291

PART FOUR **Production and Supply**

CHAPTER 9
Production Functions **297**
Marginal Productivity 297
Isoquant Maps and the Rate of Technical Substitution 300
Returns to Scale 304
The Elasticity of Substitution 307
Four Simple Production Functions 310
Technical Progress 314
Summary 318
Problems 319
Suggestions for Further Reading 321
Extensions: Many-Input Production Functions 322

CHAPTER 10
Cost Functions **325**
Definitions of Costs 325
Relationship between Profit Maximization and Cost Minimization 327
Cost-Minimizing Input Choices 328
Cost Functions 333
Shifts in Cost Curves 337

Short-Run, Long-Run Distinction 348
Summary 356
Problems 357
Suggestions for Further Reading 359
Extensions: The Translog Cost Function 360

CHAPTER 11
Profit Maximization 363
The Nature and Behavior of Firms 363
Profit Maximization 365
Marginal Revenue 367
Short-Run Supply by a Price-Taking Firm 372
Profit Functions 376
Profit Maximization and Input Demand 381
Summary 388
Problems 388
Suggestions for Further Reading 392
Extensions: Boundaries of the Firm 393

PART FIVE Competitive Markets

CHAPTER 12
The Partial Equilibrium Competitive Model 401
Market Demand 401
Timing of the Supply Response 405
Pricing in the Very Short Run 405
Short-Run Price Determination 407
Shifts in Supply and Demand Curves: A Graphical Analysis 412
A Comparative Statics Model of Market Equilibrium 414
Long-Run Analysis 418
Long-Run Equilibrium: Constant Cost Case 419
Shape of the Long-Run Supply Curve 421
Long-Run Elasticity of Supply 424
Comparative Statics Analysis of Long-Run Equilibrium 424
Producer Surplus in the Long Run 428
Economic Efficiency and Applied Welfare Analysis 431
Price Controls and Shortages 434
Tax Incidence Analysis 435
Summary 440
Problems 440
Suggestions for Further Reading 444
Extensions: Demand Aggregation and Estimation 445

CHAPTER 13
General Equilibrium and Welfare **449**
Perfectly Competitive Price System 449
A Graphical Model of General Equilibrium with Two Goods 450
Comparative Statics Analysis 460
General Equilibrium Modeling and Factor Prices 462
A Mathematical Model of Exchange 464
A Mathematical Model of Production and Exchange 475
Computable General Equilibrium Models 478
Summary 482
Problems 483
Suggestions for Further Reading 486
Extensions: Computable General Equilibrium Models 487

PART SIX **Market Power**

CHAPTER 14
Monopoly **491**
Barriers to Entry 491
Profit Maximization and Output Choice 493
Misallocated Resources under Monopoly 498
Comparative Statics Analysis of Monopoly 501
Monopoly Product Quality 502
Price Discrimination 504
Price Discrimination through Non-Uniform Schedules 510
Regulation of Monopoly 513
Dynamic Views of Monopoly 516
Summary 518
Problems 518
Suggestions for Further Reading 522
Extensions: Optimal Linear Two-Part Tariffs 523

CHAPTER 15
Imperfect Competition **525**
Short-Run Decisions: Pricing and Output 525
Bertrand Model 527
Cournot Model 528
Capacity Constraints 534
Product Differentiation 535
Tacit Collusion 541
Longer-Run Decisions: Investment, Entry, and Exit 545

Strategic Entry Deterrence 550
Signaling 552
How Many Firms Enter? 555
Innovation 559
Summary 561
Problems 562
Suggestions for Further Reading 565
Extensions: Strategic Substitutes and Complements 567

PART SEVEN Pricing in Input Markets

CHAPTER 16
Labor Markets 575
Allocation of Time 575
A Mathematical Analysis of Labor Supply 578
Market Supply Curve for Labor 582
Labor Market Equilibrium 583
Wage Variation 585
Monopsony in the Labor Market 589
Labor Unions 592
Summary 595
Problems 595
Suggestions for Further Reading 598

CHAPTER 17
Capital and Time 599
Capital and the Rate of Return 599
Determining the Rate of Return 601
Pricing of Risky Assets 608
The Firm's Demand for Capital 610
Present Discounted Value Criterion 613
Natural Resource Pricing 617
Summary 620
Problems 620
Suggestions for Further Reading 623

APPENDIX
The Mathematics of Compound Interest 625
Present Discounted Value 625
Continuous Time 627

PART EIGHT Market Failure

CHAPTER 18
Asymmetric Information **633**
Complex Contracts as a Response to Asymmetric Information 633
Principal-Agent Model 635
Hidden Actions 637
Owner-Manager Relationship 638
Moral Hazard in Insurance 642
Hidden Types 647
Nonlinear Pricing 648
Adverse Selection in Insurance 658
Market Signaling 665
Auctions 667
Summary 671
Problems 671
Suggestions for Further Reading 674
Extensions: Using Experiments to Measure Asymmetric-Information Problems 675

CHAPTER 19
Externalities and Public Goods **683**
Defining Externalities 683
Externalities and Allocative Inefficiency 685
Partial-Equilibrium Model of Externalities 689
Solutions to Negative Externality Problems 691
Attributes of Public Goods 695
Public Goods and Resource Allocation 697
Lindahl Pricing of Public Goods 701
Voting and Resource Allocation 704
A Simple Political Model 706
Voting Mechanisms 709
Summary 710
Problems 711
Suggestions for Further Reading 713
Extensions: Pollution Abatement 715

Brief Answers to Queries **717**
Solutions to Odd-Numbered Problems **727**
Glossary of Frequently Used Terms **741**
Index **749**
