

Contents

1	Introduction	1
2	Intuitive Data	5
2.1	Cases and intuitions	5
2.2	Intuitions and ordinary usage	11
2.3	Shared intuitions?	12
3	Experimental Data	17
3.1	Error-possibility effects	18
3.1.1	Basic data	18
3.1.2	Subject, speaker, assessor? Assessor!	22
3.1.3	Some constraints	24
3.1.4	Summary	27
3.2	Pragmatic effects	28
3.2.1	The canonic paradigm	29
3.2.2	The evidence-seeking paradigm	39
3.2.3	The retraction paradigm	43
3.2.4	Summary	44
3.3	Experiments and ordinary usage	45
4	Insensitivism	47
4.1	Basic assumptions	48
4.2	Insensitivism	50
4.2.1	The metaphysical aspect of insensitivism	50
4.2.2	The semantic aspect of insensitivism	52
4.3	Insensitivism as a default theory	54
5	Error-Possibility Effects: Standard Accounts	59
5.1	Contextualism	60
5.2	Anti-intellectualism	63
5.3	The moderate conversational implicature account	67
5.3.1	Conversational implicatures	68
5.3.2	MCIA and direct knowledge utterances	70
5.3.3	MCIA and assessments of knowledge utterances	72
5.3.4	Conclusion	73
5.4	The skeptical loose use account	74
5.5	A doxastic account	76
5.6	The epistemic focal bias account	79
5.7	Conclusion	81

6	Error-Possibility Effects: The Subadditivity Account	83
6.1	Subadditivity	83
6.2	The threshold principle	87
6.3	Explaining error-possibility effects	89
6.3.1	The subadditivity account	90
6.3.2	Extensions: stability, realness, vivacity, focus	93
6.3.3	Some predictions	94
6.4	Subadditivity vs. availability	97
6.5	Supplementary explanations	98
6.6	Situating the account	100
6.7	Conclusion	101
7	Pragmatic Effects: Standard Accounts	103
7.1	Contextualism	103
7.2	Anti-intellectualism	105
7.3	The moderate conversational implicature account	108
7.3.1	MCIA and required evidence ratings	108
7.3.2	MCIA and retraction	111
7.3.3	Conclusion	112
7.4	The skeptical loose use account	113
7.5	A doxastic account	115
7.6	The heuristic proxy account	121
7.7	Conclusion	125
8	Pragmatic Effects: The Asymmetric Loss Account	127
8.1	Loss functions and their effects	127
8.2	Explaining pragmatic effects	131
8.2.1	Pragmatic effects on retraction	132
8.2.2	Pragmatic effects on required evidence ratings	135
8.3	Some nice predictions	138
8.4	Recalcitrant data	140
8.4.1	Believing, hoping, guessing	140
8.4.2	Canonic studies	142
8.5	Situating the account	146
8.6	Conclusion	147
9	Conclusion	149
