| Preface | xiii |
| Introduction | 1 |
| I INTRODUCTION TO EMPIRICAL ASSET PRICING | |
| 1 Stochastic Discount Factors and m-Talk | 9 |
| 1.1 The Main Equation (1.1) | 9 |
| 1.2 From the General to the Specific | 11 |
| 1.3 Arbitrage and the SDF | 11 |
| 2 State Pricing | 13 |
| 2.1 Basic Setup | 13 |
| 2.2 State Pricing with a Representative Maximizing Agent | 14 |
| 2.3 Heterogeneous Agents with Complete Markets | 15 |
| 2.4 Complete Markets, Risk Sharing, and a Constructed Representative Agent | 16 |
| 2.5 Risk-Neutral Probabilities | 17 |
| 2.6 Recovery | 18 |
| 2.7 Multiperiod m -Talk and State Pricing | 19 |
| 3 Maximization and the m-Talk Euler Equation | 23 |
| 3.1 General Statement | 23 |
| 3.2 The Consumption CAPM | 24 |
| 3.3 Finding m Using a Perturbation | 25 |
| 4 Expected Risk Premiums and Alphas | 27 |
| 4.1 General Statement | 27 |
| 4.2 The SDF Alphas and Abnormal Returns | 28 |
| 4.3 Relation to Beta-Pricing: The Maximum Correlation Portfolio | 29 |
| 4.4 Applications of Alpha | 29 |
| 4.5 Volatility Risk Premiums | 30 |

| | | |
|-----------|---|----|
| 5 | So Many Models, So Little Time | 33 |
| 5.1 | Polynomials in Consumption or Wealth | 33 |
| 5.2 | Habits and Durability | 36 |
| 5.3 | State Nonseparability | 38 |
| 5.4 | Heterogeneity | 40 |
| 5.5 | General Affine Models | 41 |
| 5.6 | Ambiguity Aversion and Knightian Uncertainty | 41 |
| 5.7 | Behavioral SDFs | 42 |
| 5.8 | Multigood Models | 43 |
| 5.9 | Representation Using Future Consumption and Returns | 44 |
| 6 | Applications of m-Talk | 45 |
| 6.1 | Real Interest Rates | 45 |
| 6.2 | Term Structure | 47 |
| 6.3 | Real and Nominal m -Talk | 49 |
| 6.4 | International m -Talk | 50 |
| 6.5 | Conditional Asset Pricing | 53 |
| 6.6 | Market Efficiency | 54 |
| 6.7 | Investment Performance Evaluation | 55 |
| 7 | Three Paradigms of Empirical Asset Pricing | 57 |
| 7.1 | Minimum Variance Efficiency | 57 |
| 7.2 | Beta Pricing | 58 |
| 7.3 | Relation among the Three Paradigms | 58 |
| II | MEAN VARIANCE MODELS | |
| 8 | Mean Variance Analysis | 65 |
| 8.1 | Deriving the Minimum Variance Frontier: The Classics | 65 |
| 8.2 | The Minimum Variance Boundary | 66 |
| 8.3 | The Hansen and Richard Representation | 72 |
| 8.4 | Generalizations, Extensions, and Evidence | 73 |
| 9 | Mean Variance Efficiency with Conditioning Information | 79 |
| 9.1 | Conditional and Unconditional Efficiency with Information | 79 |
| 9.2 | Relation to Utility Maximization | 83 |
| 9.3 | Explicit UE Solutions | 83 |
| 9.4 | Extensions | 88 |
| 9.5 | Empirical Evidence | 89 |

| | | |
|------------|---|-----|
| 10 | Variance Bounds | 95 |
| 10.1 | A Simple Development | 95 |
| 10.2 | Duality with the Usual Mean-Variance Diagram | 96 |
| 10.3 | Computing the HJ Bounds | 99 |
| 10.4 | Drawing Inferences with HJ Bounds | 100 |
| 10.5 | Related Measures and Bounds | 100 |
| 11 | Variance Bounds with Conditioning Information | 107 |
| 11.1 | Refining HJ Bounds with Conditioning Information | 107 |
| 11.2 | Empirical Application | 110 |
| 11.3 | Sampling Performance | 114 |
| 11.4 | Practical Summary | 118 |
| III | MULTIBETA PRICING | |
| 12 | Arbitrage Pricing and Factor Analysis | 123 |
| 12.1 | Overview | 123 |
| 12.2 | Limits to Arbitrage and Costly Arbitrage | 128 |
| 12.3 | Factor Analysis | 130 |
| 13 | Multibeta Equilibrium Models | 137 |
| 13.1 | Multiperiod Consumption-Investment Problems | 137 |
| 13.2 | The Classical Multibeta Model | 139 |
| 14 | Multibeta Models with Conditioning Information | 145 |
| 14.1 | Conditional and Unconditional Multifactor Efficiency | 145 |
| 14.2 | The Three Paradigms of Empirical Asset Pricing, Revisited | 149 |
| IV | EMPIRICAL ASSET PRICING TOOLS | |
| 15 | Introduction to the Generalized Method of Moments | 157 |
| 15.1 | Motivation and General Setup | 157 |
| 15.2 | Simple Examples | 159 |
| 16 | GMM Implementation | 163 |
| 16.1 | Overview | 163 |
| 16.2 | Exactly Identified Models | 164 |
| 16.3 | Linear Models | 165 |
| 16.4 | Nonlinear, Overidentified Models | 165 |
| 16.5 | One Step, Two Steps, N Steps, or More ... | 166 |
| 16.6 | Search Problems | 167 |
| 16.7 | The Asymptotic Covariance Matrix: A First Cut | 168 |

| | | |
|-----------|--|-----|
| 17 | Covariance Matrices for the GMM | 169 |
| 17.1 | Autocorrelated Moment Conditions | 169 |
| 17.2 | Optimal Weighting Matrices for Autocorrelated Moment Conditions | 174 |
| 17.3 | A Catalog of Consistent Covariance Matrices | 175 |
| 17.4 | Alternative Non-optimal Weighting Matrices | 176 |
| 17.5 | Asymptotic Variance for GMM When Non-optimal Weighting Matrices Are Used | 176 |
| 18 | GMM Tests | 179 |
| 18.1 | An Aside on Chi-Square Variables | 179 |
| 18.2 | Hansen's J-Statistic | 179 |
| 18.3 | Asymptotic Wald Tests and the Delta Method | 180 |
| 18.4 | Hypotheses about Pricing Errors | 181 |
| 18.5 | Conditional Moment Encompassing Tests | 182 |
| 18.6 | Other Tests | 183 |
| 19 | Advanced GMM | 185 |
| 19.1 | Scaling Factors in GMM | 185 |
| 19.2 | Optimal Instrument Choice | 186 |
| 19.3 | Weak Instruments | 188 |
| 19.4 | Missing Data | 189 |
| 19.5 | Simulated Method of Moments | 189 |
| 19.6 | Testing Inequality Restrictions | 190 |
| 20 | GMM Examples | 193 |
| 20.1 | Examples Illustrating the Generality of the GMM | 193 |
| 20.2 | Formulating Asset Pricing Models with GMM | 195 |
| 21 | Multivariate Regression Methods | 205 |
| 21.1 | Regression Model Restrictions | 205 |
| 21.2 | Testing Portfolio Efficiency in the Multivariate Regression Model | 208 |
| 21.3 | Economic Interpretation | 211 |
| 21.4 | Some Results from Gibbons, Ross, and Shanken | 214 |
| 21.5 | MacKinlay's Power Analysis and the Fama-French Factors | 215 |
| 21.6 | Finite-Sample Results | 217 |
| 22 | Cross-Sectional Regression | 219 |
| 22.1 | CSR Tests | 219 |
| 22.2 | Everything, Including CSR, Is a Special Case of GMM | 224 |
| 22.3 | Testing Unconditional Models with CSR Methods | 224 |
| 22.4 | Errors in the Betas | 228 |
| 22.5 | Asymptotic Distributions for CSR Coefficients | 230 |

| | | |
|-----------|--|------------|
| 22.6 | Conditional Asset Pricing with CSR | 230 |
| 22.7 | CSR versus Spread Portfolios | 231 |
| 23 | Introduction to Panel Methods | 233 |
| 23.1 | Concepts and Terminology | 233 |
| 23.2 | Firm Effects and Time Effects | 234 |
| 23.3 | Standard Errors and Clustering | 235 |
| 23.4 | Panels in GMM | 237 |
| 23.5 | How Dummy Variables Work in Panels | 239 |
| 23.6 | Predictive Panel Regressions | 243 |
| 23.7 | Random Firm Effects and Efficient Estimation | 248 |
| 23.8 | Some Results from Petersen (2009) | 249 |
| 23.9 | Differences in Differences | 250 |
| 23.10 | Regression Discontinuity | 254 |
| 24 | Bootstrapping Methods and Multiple Comparisons | 257 |
| 24.1 | Bootstrap 101 | 257 |
| 24.2 | Multiple Comparisons | 261 |
| 24.3 | Bootstrap 201: Inferences in Cross Sections | 266 |
| V | INVESTMENT PERFORMANCE EVALUATION | |
| 25 | Classical Investment Performance Evaluation | 275 |
| 25.1 | The Classical Performance Measures | 275 |
| 25.2 | Properties of the Classical Measures | 284 |
| 25.3 | The Evidence for Professionally Managed Portfolios Using Classical Measures | 288 |
| 26 | Conditional Performance Evaluation | 297 |
| 26.1 | Overview | 297 |
| 26.2 | Motivating Example | 298 |
| 26.3 | Conditional Alphas and Betas | 299 |
| 26.4 | Conditional Market Timing | 300 |
| 26.5 | Conditional Weight-Based Measures | 302 |
| 26.6 | Interpreting Conditional Performance Evidence | 303 |
| 26.7 | Conditional Market Timing Evidence | 303 |
| 26.8 | Conditional Weight-Based Evidence | 304 |
| 26.9 | Volatility Timing Evidence | 304 |
| 27 | Term Structure and Bond Fund Performance | 305 |
| 27.1 | Background | 305 |
| 27.2 | Term Structure Model Stochastic Discount Factors | 306 |
| 27.3 | Single-Factor Model Example | 308 |

| | | |
|-----------|---|------------|
| 27.4 | Addressing Interim Trading Bias | 309 |
| 27.5 | Empirical Findings | 311 |
| 28 | Investment Performance Evaluation: A Modern Perspective | 315 |
| 28.1 | Market Efficiency and Fund Performance | 316 |
| 28.2 | Troubles with Traditional Alphas | 316 |
| 28.3 | SDF Alphas and Managers' Information | 317 |
| 28.4 | The Appropriate Benchmark | 318 |
| 28.5 | Mean Variance Efficient Benchmarks Are Almost Never Appropriate Benchmarks | 319 |
| 28.6 | Justifying the Sharpe Ratio | 320 |
| 28.7 | Comments on Holdings-Based Performance Measures | 321 |
| 28.8 | An Example of Holdings-Based Performance with Risk Adjustment | 322 |
| 28.9 | Summary | 323 |
| VI | SELECTED TOPICS | |
| 29 | Production-Based Asset Pricing | 327 |
| 29.1 | Setup and Goals | 327 |
| 29.2 | Physical Investment with Capital Adjustment Costs | 329 |
| 29.3 | Investment Returns | 330 |
| 29.4 | Stock Returns and Investment Returns | 331 |
| 29.5 | True Production-Based Asset Pricing | 332 |
| 29.6 | Empirical Evidence | 333 |
| 30 | The Campbell-Shiller Approximation and Vector Autoregressions | 337 |
| 30.1 | The Campbell-Shiller Approximation | 337 |
| 30.2 | Return and Dividend Growth Predictability | 339 |
| 30.3 | Vector Autoregressions | 340 |
| 30.4 | VARs Meet Campbell-Shiller Approximations | 341 |
| 30.5 | Examples | 342 |
| 31 | Long-Run Risk Models | 345 |
| 31.1 | A Stationary Model | 346 |
| 31.2 | Interpreting the Model | 346 |
| 31.3 | A Cointegrated Model | 348 |
| 31.4 | Extensions | 349 |
| 32 | Predictability: An Overview | 353 |
| 32.1 | Predicting the Levels of Returns | 354 |
| 32.2 | Predicting Variances: Volatility Modeling | 366 |
| 32.3 | Predicting Covariances, Correlations, and Higher Moments | 375 |

| | | |
|-----------|---|------------|
| 32.4 | Predicting Cross-Sectional Differences in Returns | 378 |
| 32.5 | Behavioral Perspective | 383 |
| 32.6 | Concluding Remarks | 384 |
| 33 | Characteristics versus Covariances | 385 |
| 33.1 | The Issue | 385 |
| 33.2 | A Quick Survey of the Evidence | 386 |
| 33.3 | Interpretation | 387 |
| 34 | Volatility and the Cross Section of Stock Returns | 391 |
| 34.1 | Overview | 391 |
| 34.2 | Time Series Evidence | 393 |
| 34.3 | Cross-Sectional Evidence | 394 |
| 34.4 | Explaining a Return-Idiosyncratic Volatility Relation That Is Negative | 395 |
| 34.5 | Common Factors in Idiosyncratic Volatility | 397 |
| | Appendix | 399 |
| A.1 | Eigenvectors (\mathbf{x}) and Eigenvalues (λ) for Square Symmetric $n \times n$ Matrices A | 399 |
| A.2 | Direct Sums | 400 |
| A.3 | Gauss Code for the Generalized Method of Moments | 400 |
| A.4 | Matlab Code for the Generalized Method of Moments Contributed by Davidson Heath | 410 |
| | References | 417 |
| | Index | 451 |
