1	Description of Persistent Depressive Disorders	1
1.1	Terminology	1
1.2	Definition	2
1.3	Epidemiology	5
1.3.1	Gender and Sex Differences	7
1.3.2	Age	8
1.3.3	Ethnicity and Cultural and Socioeconomic Differences	9
1.4	Course and Prognosis	10
1.4.1	Dysthymic Disorder: Course	10
1.4.2	Major Depressive Disorder: Course	11
1.4.3	Onset Age	11
1.4.4	Impact of Treatment on Clinical Course	12
1.5	Differential Diagnosis	12
1.6	Comorbidities	14
1.7	Diagnostic Procedures and Documentation	14
1.7.1	Diagnostic Interviews	15
1.7.2	Clinician Rating Scales	17
1.7.3	Self-Report Scales	18
1.7.4	Scales Assessing Constructs Related to PDD	22
2	Theories and Models of Persistent Depressive Disorders	24
2.1	Biological Models	24
2.1.1	Genetics	24
2.1.2	Monoamine Hypothesis	25
2.1.3	Serotonin	25
2.1.4	Dopamine	26
2.1.5	Brain-Derived Neurotrophic Factor	26
2.1.6	Neuroendocrine Models	26
2.1.7	Glutamate	28
2.1.8	Brain Structure	28
2.2	Psychological Models	29
2.2.1	Interpersonal Models	30
2.2.2	Learning and Behavioral Models	30
2.2.3	Cognitive and Integrative Models	32
2.2.4	Mindfulness-Based Models	35
3	Diagnosis and Treatment Indications	37
3.1	Motivation or Readiness to Change	37
3.2	Longitudinal Life Course	39
3.3	Symptom Severity and Suicide Risk	39
3.4	Onset Age	40
3.5	Trauma History	41
3.6	Co-Occurring Disorders or Medical Comorbidities	42

4 Treatment 44

4.1 Methods of Treatment 45

4.1.1 Interpersonal Psychotherapy 45

4.1.2 Cognitive Behavior Therapy 48

4.1.3 Cognitive Behavioral Analysis System of Psychotherapy 51

4.1.4 Mindfulness-Based Cognitive Therapy 65

4.1.5 Pharmacotherapy 67

4.2 Variations and Combinations of Methods 69

4.3 Problems in Carrying Out Treatments 71

4.4 Multicultural Issues 73
