1 LANGUAGE COMMUNITIES, REGIONS AND COUNTRIES: THE GEOGRAPHY OF NEWTONIANISM

List of Illustrations	xi
Series Editor's Preface <i>Elinor Shaffer</i>	xii
Acknowledgements	xv
List of Contributors	xvii
Timeline: European Reception of Isaac Newton, 1642–1900	xxv
Editors' Introduction <i>Scott Mandelbrote and Helmut Pulte</i>	1
1 The Reception of Newton in the French-Speaking Lands <i>John Bennett Shank</i>	13
2 Newton in the German-Speaking Lands <i>Thomas Ahnert</i>	41
3 Newton's Reception in the Low Countries <i>Eric Jorink and Huib Zuidervaart</i>	59
4 The Reception of Newtonian Natural Philosophy in Scandinavia <i>Helge Kragh</i>	101
5 The Reception of Newton in Finland and the Baltic States <i>Maija Kallinen</i>	117
6 Newton in the Iberian Peninsula <i>Antoni Malet</i>	129
7 Newton in Italy <i>Massimo Mazzotti</i>	159
8 The Hungarian Reception of Newton <i>Gábor Á. Zemplén</i>	179
9 The Reception of Newtonianism in the Greek-Speaking Regions in the Eighteenth Century <i>Kostas Gavroglu and Manolis Patiniotis</i>	201

Contents

10 Better than a Samoyed: Newton's Reception in Russia <i>Simon Werrett</i>	217
Bibliography (Volume 1)	231
2 THEMES AND AREAS OF STUDY: THE CONTENT OF NEWTONIANISM	
11 The Reception of Newton's Method of Series and Fluxions in Eighteenth-Century Europe <i>Niccolò Guicciardini</i>	281
12 Newton's Algebra <i>Jaqueline Stedall</i>	295
13 Influence of Newton's <i>Principia</i> on the Development of Continuum Mechanics and Rigid Body Dynamics on the Continent <i>Gleb K. Mikhailov</i>	311
14 Newton's Celestial Mechanics and Gravitational Theory <i>Michael Nauenberg</i>	325
15 The Reception of Newton's Principles of Mechanics and Concept of Force <i>Eric Watkins</i>	341
16 'Tis Much Better to do a Little with Certainty': On the Reception of Newton's Methodology <i>Helmut Pulte</i>	355
17 Newton's Work in French Mathematics and Mathematical Physics, 1780–1830 <i>Ivor Grattan-Guinness</i>	385
18 The Reception of Newton's Optical Work <i>Alan E. Shapiro</i>	403
19 The Reception of Newton's Theory of Matter and his Atomism <i>Catherine Wilson</i>	433
20 Newton, Newtonianism and the Roles of Experiment <i>Friedrich Steinle</i>	451
21 The Persistence of Mechanical Imagery: Electricity and Magnetism in a Newtonian World <i>Roderick W. Home</i>	479
22 Chemistry and Alchemy <i>Lawrence M. Principe</i>	501

23	The Impact of Newton on Biology on the Continent in the Eighteenth Century <i>Peter McLaughlin</i>	513
24	Newton and the Evidences of the Christian Religion <i>Scott Mandelbrote</i>	531
25	Newton in Poetry <i>Simone De Angelis</i>	561
26	Newtonian Biography 1727–1822 <i>Robert Iliffe</i>	579
	Bibliography (Volume 2)	595
3	RIVALS, FRIENDS AND CRITICS: INDIVIDUAL AND GROUP RESPONSES TO NEWTONIANISM	
27	Newton’s Impact on the Enlightenment <i>Mordechai Feingold</i>	649
28	The Popularization of Newtonianism in the Eighteenth Century <i>Andreas Kleinert</i>	697
29	Newton and Huygens <i>Rienk Vermij</i>	711
30	Newton and Leibniz <i>Herbert Breger</i>	723
31	Newton’s Influence on the Mathematicians and Physicists of the Bernoulli Family and on Jacob Hermann <i>David Speiser-Bär and Diarmuid Ó Mathúna</i>	735
32	Newton and Wolff <i>Thomas Ahnert</i>	749
33	Maupertuis and Newton <i>Mary Terrall</i>	759
34	Emilie du Châtelet <i>Sarah Hutton</i>	769
35	Voltaire and Newton <i>François De Gandt</i>	777
36	Newton in the <i>Encyclopédie</i> of Diderot and d’Alembert: Perceptions and Debates over Newton’s Theories during the French Enlightenment <i>Koffi N. Maglo</i>	791
37	Newton in the Collegio Romano: Borgondio to Boscovich (1713–45) <i>Ugo Baldini</i>	813

Contents

38	Women Readers of Newton in Eighteenth-Century Italy <i>Marta Cavazza</i>	841
39	Newton and Euler <i>Sébastien Maronne and Marco Panza</i>	861
40	Lavoisier and Newton <i>Marco Beretta</i>	879
41	Newton and Kant on Absolute Space: From Theology to Transcendental Philosophy <i>Michael Friedman</i>	891
42	No Longer the Focal Point: Goethe and Newtonianism <i>Myles W. Jackson</i>	909
43	Hegel and Newton <i>Wolfgang Bonsiepen</i>	919
44	Fruitful Misinterpretations: Mach and Einstein on Newton <i>Klaus Hentschel</i>	931
	Bibliography (Volume 3)	941
	Index (Volumes 1, 2, 3)	981
