Part I Switched Linear Systems with Dwell Time

1	Introduction	3
1.1	Switched Linear Systems with Dwell Time	4
	References	10
2	Robust Stability and Stabilization of Switched Systems with Dwell Time	13
2.1	Introduction	13
2.2	Problem Formulation	14
2.3	Time-Switching Stability	15
2.4	Stabilization	18
2.5	Generalizations	20
	2.5.1 Parameter-Dependent Lyapunov Function	20
	2.5.2 Exponential Stability	20
	2.5.3 State Jumps	21
2.6	Examples	22
2.7	Conclusions	24
	References	24
3	Robust State-Dependent Switching of Linear Systems with Dwell Time	27
3.1	Introduction	27
3.2	Problem Formulation	28
3.3	Nominal Time-Switching Stability	29
3.4	Robust Switching Stability	30
3.5	L_2 -gain	32
3.6	State Feedback	36
3.7	Examples	39
3.8	Conclusions	40
	References	41

4	Robust Control of Linear Systems via Switching	43
4.1	Introduction	43
4.2	Problem Formulation	45
4.3	L_2 -gain	46
4.4	State-Feedback Control	51
4.5	Output-Feedback Control	53
4.6	Examples	55
4.7	Conclusions	57
	References	58
5	Robust Estimation of Linear-Switched Systems with Dwell Time	61
5.1	Introduction	61
5.2	Problem Formulation	62
5.3	Covariance Analysis	64
5.4	Filtering	66
5.5	Application to Robust Filtering	70
5.6	Examples	71
5.7	Conclusions	72
	References	73
6	Stability and Controller Synthesis of Discrete Linear-Switched Systems	75
6.1	Introduction	75
6.2	Problem Formulation	77
6.3	Time-Switching Stability	79
6.4	l_2 -gain Analysis	82
6.5	State Feedback	84
6.6	Filtering	86
6.7	Examples	88
6.8	Conclusions	90
	References	91
7	Output-Dependent Switching Control of Linear Systems with Dwell Time	93
7.1	Introduction	93
7.2	Problem Formulation	94
7.3	Switching Without a Filter	95
	7.3.1 The Solution Method	97
7.4	Filter-Based Switching	98
7.5	Examples	100
7.6	Conclusions	104
7.7	Appendix: The Solution Methods	105
	References	106

8	Robust Switching-Based Fault-Tolerant Control	107
8.1	Introduction	107
8.2	Problem Formulation	109
8.3	Passive Fault-Tolerant Control	111
8.4	Active FTC with Delayed Detection and Isolation	113
8.5	Example	115
8.6	Conclusions	116
	References	116

Part II Stochastic State-Multiplicative Systems

9	Introduction and Literature Survey	121
9.1	Stochastic State-Multiplicative Noisy Systems	122
9.2	Stochastic State-Multiplicative Time Delay Systems	122
	References	125
10	Robust Vertex-Dependent Control and Filtering of Stochastic Systems	129
10.1	Introduction	129
10.2	Discrete-Time Case: Problem Formulation	131
10.3	Discrete-Time Case: The Bounded Real Lemma	132
10.4	Discrete-Time Case: State-Feedback Control	134
10.5	Discrete-Time Case: Robust Filtering	137
10.6	Discrete-Time Case: Examples	140
10.7	Discrete-Time Case: Conclusions	141
10.8	Continuous-Time Case: Problem Formulation	141
10.9	Continuous-Time Case: The Bounded Real Lemma	143
10.10	Continuous-Time Case: State-Feedback Control	145
10.11	Continuous-Time Case: Robust Filtering	148
10.12	Continuous-Time Case: Conclusions	152
	References	153
11	Robust Output-Feedback Control of Stochastic Discrete-Time Systems	155
11.1	Introduction	155
11.2	Problem Formulation	157
11.3	The H_∞ Controller for Nominal Systems	160
11.4	The H_∞ Controller for Uncertain Systems	162
11.5	Examples	164
11.6	Conclusions	168
	References	168

12	Predictor-Based Control of Systems with State-Multiplicative Noise	171
12.1	Introduction	171
12.2	Problem Formulation and Preliminaries	172
12.3	The L_2 -gain Bound	175
12.4	Time-Varying Delay	178
12.5	Examples	181
12.6	Conclusions	183
	References	183
13	Static Output-Feedback Control of Retarded Stochastic Systems	187
13.1	Introduction	187
13.2	Problem Formulation	189
13.3	Mean Square Exponential Stability	190
13.4	The Bounded Real Lemma	193
13.5	Static Output-Feedback Control	194
13.5.1	Static Output-Feedback Control—The Nominal Case	194
13.5.2	Static Output-Feedback Control—The Uncertain Case	197
13.6	Example	199
13.7	Conclusions	202
	References	202
14	H_∞ Control of Stochastic Discrete-Time Switched Systems with Dwell	205
14.1	Introduction	205
14.2	Problem Formulation	207
14.3	Stochastic Stability	208
14.4	Stochastic l_2 -gain Analysis	211
14.5	State-Feedback Control	214
14.6	Example—State-Feedback Control	218
14.7	Conclusions	220
	References	221
Part III Optimal Control of Biochemical Systems		
15	Introduction and Literature Survey	225
15.1	Introduction	226
	References	229

16	H_∞ Feedback Control Theory in Biochemical Systems	231
16.1	Introduction	231
16.2	Simple Models of Enzymatic Reactions	233
16.2.1	Simple Michaelis–Menten Enzymatic Mechanism	233
16.2.2	Simple Michaelis–Menten Enzymatic Mechanism—II	236
16.2.3	Simple Inhibitory Systems—Competitive Inhibition	237
16.2.4	Regulation via Energy Charge—Product Inhibition	239
16.2.5	Product Inhibition—Numerical Example	240
16.2.6	Random Bireactant Systems	240
16.2.7	Hexokinase I Regulation by Feedback Inhibition	242
16.3	Linear Analysis via System Uncertainty	246
16.4	Simple Unbranched Enzyme Pathways—Theoretical Considerations	247
16.4.1	Unbranched Enzyme Pathway—Open-Loop System	247
16.4.2	Unbranched Enzyme Pathway—Closed-Loop System	250
16.5	Delayed Pathways	257
16.6	Unbranched Enzyme Pathway—Linear Analysis via System Uncertainty	258
16.7	Unbranched Enzyme Pathway—Sensitivity Analysis	259
16.7.1	Open-Loop System: Sensitivity to $[E]_{total}$	260
16.8	Closed-Loop System: H_∞ Optimal Control Analysis	261
16.9	The Threonine Synthesis Pathway— H_∞ Optimal Control Analysis	264
16.9.1	The Complete Linearized Threonine Synthesis Pathway	269
16.9.2	The Threonine Synthesis Pathway—Research Procedure	270
16.9.3	The Threonine Synthesis Pathway—Numerical Results	271
16.10	Conclusions	273
	References	276
17	Feedback-Control Theory in Biochemical Systems—Various System Norms	279
17.1	Introduction	279
17.2	Optimal Control of Biochemical Systems via some System Norms	282
17.2.1	H_∞ Optimal Control	283

17.2.2	H_2 Optimal Control	284
17.2.3	Energy-to-Peak ($L_2 - L_\infty$) Optimal Control	284
17.2.4	Peak-to-Peak ($L_\infty - L_\infty$) Optimal Control	284
17.3	The Linearized Minimal Model of Yeast Glycolytic Pathway	285
17.4	The Research Procedure	287
17.5	The Glycolytic Pathway—Numerical Results	288
17.6	The Threonine Synthesis Pathway	291
17.7	The Threonine Synthesis—Controller Uncertainties	294
17.8	Conclusions	296
