

Contents

1	Flipping the Debate	1
1.1	Consciousness and Evolution	3
1.2	Non-reductive Naturalism	8
1.3	The Externalist Thesis	19
2	Our Animal Mind	29
2.1	Mind and Consciousness	30
2.2	Sentient Creatures	35
2.3	The Thinking Animal	41
2.4	The Self-Reflective Animal	55
3	Subjectivity in a Biological Perspective	69
3.1	What It Is like to Be Something	71
3.2	Perspectives of Perception	78
3.3	The Subjective Quality of Experiences	84
3.4	Perception of Colors	90
3.5	No Hard Problem	100

4	A Difference That Makes No Difference	107
4.1	The Knowledge Argument	108
4.2	The Conceivable Zombies	114
4.3	Necessary a Posteriori Truth	120
4.4	Two-Dimensional Semantics	127
4.5	How to Save Physicalism	134
5	Why Identity Is Not Enough	145
5.1	Physicalism	147
5.2	The Refutation of Eliminativism	154
5.3	The Question of Multiple Realizability	164
5.4	A Structural Identity Theory	167
5.5	The Mind-Body Problem	172
5.6	Conclusion	176
6	Functionalism, Mechanisms, and Levels of Reality	183
6.1	Machine Functionalism	185
6.2	Levels of Functional States	193
6.3	Emergent Properties	203
6.4	Mechanisms	209
6.5	Mechanisms and Causal Exclusion	214
7	The Environment Is What Matters	225
7.1	One System or Many Systems	229
7.2	Flock Behavior	233
7.3	Evolutionary and Functional Explanations	242
7.4	Extrinsic Properties	244
7.5	The Brain and Its Surroundings	250
8	Understanding Consciousness	259
8.1	The Experiencing Organism	261
8.2	Visual Sensations	275
8.3	Conceptually Formed Experiences	281
8.4	The Nature of Consciousness	287
8.5	Authoritative Self-knowledge	293

Epilogue	305
Bibliography	313
Index	325
