Preface	xi
Acknowledgments	xv
Part I	1
1 An Overview of the Proof	3
1.1 First Reductions	3
1.2 The Quick Proof	6
1.3 Norm Varieties and Rost Varieties	9
1.4 The Beilinson–Lichtenbaum Conditions	14
1.5 Simplicial Schemes	16
1.6 Motivic Cohomology Operations	19
1.7 Historical Notes	21
2 Relation to Beilinson–Lichtenbaum	23
2.1 $BL(n)$ Implies $BL(n - 1)$	24
2.2 $H90(n)$ Implies $H90(n - 1)$	26
2.3 Cohomology of Singular Varieties	28
2.4 Cohomology with Supports	31
2.5 Rationally Contractible Presheaves	34
2.6 Bloch–Kato Implies Beilinson–Lichtenbaum	37
2.7 Condition $H90(n)$ Implies $BL(n)$	39
2.8 Historical Notes	41
3 Hilbert 90 for K_n^M	42
3.1 Hilbert 90 for K_n^M	42
3.2 A Galois Cohomology Sequence	45
3.3 Hilbert 90 for ℓ -special Fields	48
3.4 Cohomology Elements	50
3.5 Historical Notes	53
4 Rost Motives and H90	54
4.1 Chow Motives	54
4.2 \mathfrak{X} -Duality	56

4.3	Rost Motives	59
4.4	Rost Motives Imply Hilbert 90	61
4.5	Historical Notes	64
5	Existence of Rost Motives	65
5.1	A Candidate for the Rost Motive	66
5.2	Axioms (ii) and (iii)	67
5.3	$\text{End}(M)$ Is a Local Ring	70
5.4	Existence of a Rost Motive	71
5.5	Historical Notes	74
6	Motives over S	76
6.1	Motives over a Scheme	76
6.2	Motives over a Simplicial Scheme	77
6.3	Motives over a Smooth Simplicial Scheme	79
6.4	The Slice Filtration	82
6.5	Embedded Schemes	84
6.6	The Operations ϕ_i	86
6.7	The Operation ϕ^V	90
6.8	Historical Notes	94
7	The Motivic Group $H_{-1,-1}^{BM}$	95
7.1	Properties of $\bar{H}_{-1,-1}$	95
7.2	The Case of Norm Varieties	100
7.3	Historical Notes	101
	Part II	103
8	Degree Formulas	105
8.1	Algebraic Cobordism	105
8.2	The General Degree Formula	107
8.3	Other Degree Formulas	109
8.4	An Equivariant Degree Formula	112
8.5	The η -invariant	114
8.6	Historical Notes	117
9	Rost's Chain Lemma	119
9.1	Forms on Vector Bundles	120
9.2	The Chain Lemma when $n = 2$	122
9.3	The Symbol Chain	126
9.4	The Tower of Varieties P_r and Q_r	129
9.5	Models for Moves of Type C_n	133
9.6	Proof of the Chain Lemma	135

9.7	Nice G -actions	137
9.8	Chain Lemma, Revisited	140
9.9	Historical Notes	143
10	Existence of Norm Varieties	144
10.1	Properties of Norm Varieties	144
10.2	Two ν_{n-1} -varieties	147
10.3	Norm Varieties Are ν_{n-1} -varieties	151
10.4	Existence of Norm Varieties	153
10.5	Historical Notes	156
11	Existence of Rost Varieties	158
11.1	The Multiplication Principle	159
11.2	The Norm Principle	161
11.3	Weil Restriction	162
11.4	Another Splitting Variety	163
11.5	Expressing Norms	168
11.6	Historical Notes	171
	Part III	173
12	Model Structures for the \mathbb{A}^1-homotopy Category	175
12.1	The Projective Model Structure	176
12.2	Radditive Presheaves	182
12.3	The Radditive Projective Model Structure	186
12.4	$\bar{\Delta}$ -closed Classes and Weak Equivalences	190
12.5	Bousfield Localization	194
12.6	Bousfield Localization and $\bar{\Delta}$ -closed Classes	196
12.7	Nisnevich-Local Projective Model Structure	199
12.8	Model Categories of Sheaves	205
12.9	\mathbb{A}^1 -local Model Structure	207
12.10	Historical Notes	211
13	Cohomology Operations	213
13.1	Motivic Cohomology Operations	213
13.2	Steenrod Operations	217
13.3	Construction of Steenrod Operations	219
13.4	The Milnor Operations Q_i	220
13.5	Q_n of the Degree Map	223
13.6	Margolis Homology	225
13.7	A Motivic Degree Theorem	228
13.8	Historical Notes	230

14	Symmetric Powers of Motives	232
14.1	Symmetric Powers of Varieties	232
14.2	Symmetric Powers of Correspondences	235
14.3	Weak Equivalences and Symmetric Powers	238
14.4	S^G of Quotients X/U	241
14.5	Nisnevich G -local Equivalences	245
14.6	Symmetric Powers and Shifts	248
14.7	Historical Notes	252
15	Motivic Classifying Spaces	253
15.1	Symmetric Powers and Operations	253
15.2	Operations on $H^{1,1}$	256
15.3	Scalar Weight	258
15.4	The Motive of $(V-0)/C$ with $V^C = 0$	259
15.5	The Motive $S_{\text{tr}}^{\ell}(\mathbb{L}^n)$	264
15.6	A Künneth Formula	268
15.7	Operations of Pure Scalar Weight	269
15.8	Uniqueness of βP^n	271
15.9	Historical Notes	276
	Glossary	277
	Bibliography	283
	Index	293
