

# Contents

Preface	vii
List of Contributors	ix
Where is the Problem? <i>J-M Lévy-Leblond</i>	1
Experiment and Quantum Measurement Theory <i>A Zeilinger</i>	9
A Consistent Interpretation of Quantum Mechanics <i>R Omnès</i>	27
The Measurement Process in the Individual Interpretation of Quantum Mechanics <i>H Primas</i>	49
Principle of Stationarity in the Action Functional and the Theory of Measurement <i>R Fukuda</i>	69
Quantum (Statistical) Mechanics, Measurement and Information <i>R Balian</i>	89
State Vector Collapse as a Classical Statistical Effect of Measurement <i>M Cini and M Serva</i>	103
Consecutive Quantum Measurements <i>A Peres</i>	122
No-collapse Versions of Quantum Mechanics <i>Y Ben-Dov</i>	140
An Attempt to Understand the Many-worlds Interpretation of Quantum Theory <i>EJ Squires</i>	151
Uncertainty and Measurement <i>P T Landsberg</i>	161
