

## CONTENTS OF MAKROMOL. CHEM., MACROMOL. SYMP. 35/36

C. Pichot

Preface

1. M. E. Adams, B. S. Casey, M. F. Mills, G. T. Russel, D. H. Napper, R. G. Gilbert*	High-conversion emulsion, dispersion and suspension polymerization ..	1
2. M. Nomura*, K. Takahashi, K. Fujita	A kinetic and mechanistic study of the early stage of emulsion copolymerization of styrene and methyl methacrylate .....	13
3. J. C. de la Cal, M. E. Adams, J. M. Asua*	Parameter estimation in emulsion copolymerization .....	23
4. J. Bartoň	Emulsion copolymerization kinetics with polar monomers .....	41
5. J. M. Asua, V. S. Rodriguez, C. A. Silebi, M. S. El-Aasser*	Miniemulsion copolymerization of styrene-methyl methacrylate: effect of transport phenomena .....	59
6. C. K. Ober	Dispersion copolymerization in non-aqueous media .....	87
7. F. Candau*, D. Collin, F. Kern	Properties of copolymer latexes prepared in inverse microemulsion.....	105
8. B. W. Brooks	Basic aspects and recent developments in suspension polymerization ...	121
9. P. Trijasson*, T. Pith, M. Lambla	Hydrophilic polyelectrolyte gels by inverse suspension .....	141
10. C. Kiparissides	Prediction of the primary particle size distribution in vinyl chloride polymerization .....	171
11. H. Tobita, A. E. Hamielec*	Modelling emulsion copolymerization: crosslinking kinetics .....	193
12. G. Storti*, G. Polotti, P. Canu, S. Carrá, M. Morbidelli	Modelling of molecular weight distribution and microstructure of copolymers prepared in emulsion .....	213
13. G. H. J. van Doremale*, A. M. van Herk, A. L. German	Chemical composition distribution of styrene-methyl acrylate emulsion copolymers .....	231

14.	G. Arzamendi, J. M. Asua*	
	Copolymer composition control during the emulsion copolymerization of vinyl acetate and methyl acrylate .....	249
15.	J. Guillot	
	Modelling and simulation of emulsion copolymerization of monomers of different polarities. Relationship kinetics-microstructure-properties ..	269
16.	G. A. Bootle*, J. E. Lye, R. H. Ottewill	
	Scattering studies of the morphology of copolymer colloidal particles ..	291
17.	M. Okubo	
	Control of particle morphology in emulsion polymerization .....	307
18.	C. Pichot	
	Recent developments in the functionalization of latex particles .....	327
19.	S. A. Chen*, S. T. Lee, S. J. Lee	
	Kinetics and mechanism in emulsifier-free emulsion copolymerization ..	349
20.	S. Magnet, J. Guillot*	
	Synthesis of reactive latexes by copolymerization of methyl acrylamidoglycolate methyl ether (MAGME) with styrene and butyl acrylate .....	367
21.	R. David*, F. Henry, C. Pichot	
	Dielectric characterization of latex suspensions by microwave spectroscopy with using mixture laws .....	381
22.	L. Rios-Guerrero	
	Film formation: aspects on the coalescence of latex particles .....	389
23.	J. Y. Cavaille*, J. Perez	
	Polymer physics and characterization by mechanical measurements ....	405
24.	A. Zosel*, W. Heckmann, G. Ley, W. Mächtle	
	Influence of chemical heterogeneity on structure and properties of emulsion copolymers .....	423
25.	V. L. Dimonie, M. S. El-Aasser*, J. W. Vanderhoff, L. A. Settlemeyer	
	Effect of alkyl substitution of Dowfax™ surfactants in styrene-butadiene emulsion copolymerization .....	447
26.	I. Piirma	
	Polymeric surfactants in emulsion polymerization .....	467
27.	J. W. Vanderhoff*, N. J. Earhart, V. L. Dimonie, M. S. El-Aasser	
	Batch emulsion copolymerization of 50/50 vinyl acetate/n-butyl acrylate using poly(vinyl alcohol) emulsifier .....	477
28.	A. R. Goodall*, M. J. Greenhill-Hooper	
	Characterization of partially hydrolysed poly(vinyl acetate)s for use as stabilisers in suspension polymerization .....	499

29.	A. L. L. Palluel, M. J. Westby, C. W. A. Bromley, S. P. Davies*, A. J. Backhouse Novel aqueous dispersion polymers.....	509
30.	F. Epron*, F. Henry, O. Sagnes Chemical synthesis and dielectric characterization in microwave domain of polypyrrole latexes.....	527
31.	C. H. M. Caris, R. P. M. Kuijpers, A. M. van Herk, A. L. German* Kinetics of (co)polymerization at the surface of inorganic submicron particles emulsion-like systems.....	535
	Pannel discussion.....	549

\* In papers with more than one author the asterisk indicates the name of the author to whom inquiries should be addressed.
