

# CONTENTS

## INTRODUCTION

### SECTION 1 - FABRICATION TECHNIQUES AND SIMULATION

Some Aspects of Computer Aided Engineering of FRP Bridges 3  
*A.A. Mufti, L.G. Jaeger, B. Bakht*

Process Simulation in Filament Winding of Composite Structures 19  
*G. Di Vita, M. Farioli, M. Marchetti*

Modelling the Interply-Slip Process During Thermoforming of Thermoplastic Composites using Finite Element Analysis 39  
*R. Scherer, N. Zahlan, K. Friedrich*

### SECTION 2 - ADVANCED DESIGN TECHNIQUES

Computer Aided Design of Adhesively Bonded Systems 55  
*R.D. Adams*

Design of Laminates with Specified Mechanical Properties 69  
*W. Zhang, K.E. Evans*

Non-Linear Stress Analysis of Bonded Stepped Scarf Composite Joints using a Microcomputer 83  
*W.P. Tiu, R. Krafft, P. Garnatz*

Structural Design of Composite Sandwich Vessels 101  
*J. Rasmussen, J. Baatrup*

Applications of Computer Aided Geometric Modelling for Textile Structural Composites 127  
*C.M. Pastore, Y.J. Cai*

Design of Composite-Metal Joints 143  
*H. Janssens, D. Van Gemert*

Computer Aided Design of Thermoplastic Composite Structures	161
<i>N. Zahlen, F.J. Guild</i>	

### **SECTION 3 - FINITE ELEMENT ANALYSIS**

The Use of Computers in the Evaluation of Three Dimensional Stress Effects in Composite Materials Products	171
<i>O. Hayden Griffin, Jr.</i>	

Three Dimensional Finite Element Formulation for Stress Analysis of Anisotropic Laminate Structures	189
<i>Q. Huang, S.V. Hoa, T.S. Sankar</i>	

Finite Element Aided Design of Laminated and Sandwich Plates (FEAD-LASP)	201
<i>A. Ghazal, S. Aivazzadeh, G. Verchery</i>	

Derivation and Assessment of Laminated and Sandwich Plate Finite Elements	213
<i>S. Aivazzadeh, C. Saad Bouh, S. El Sheikh, H. Honarmand, G. Verchery</i>	

A Finite Element Program for the Analysis of Composite Structures with Mixed Finite Elements	227
<i>F. Zidani, S. Aivazzadeh, G. Verchery</i>	

A Three Dimensional Finite Element Analysis of Edge Effects in Composite Materials	239
<i>R. Barboni, P. Gaudenzi</i>	

Finite Element Analysis of Ships' Propeller Shaft Bracket made from Composite Materials	249
<i>R.A. Sheno, F.L.M. Violette</i>	

### **SECTION 4 - EXPERIMENTATION**

Identification of the Complex Moduli of Composite Materials by a Mixed Numerical/Experimental Method	267
<i>H. Sol</i>	

Fundamental Acoustic Transmission/Radiation Analysis of Laminated Plates	281
<i>C.A. Rogers</i>	

Tri Dimensional Calculation of Stratified Composite Plates  
Elastically Loaded in Bending: Experimental Verification  
*C. L'excellent, D.O. Nwokoye* 293

Automatisation of C-Scan Data Acquisition 315  
*D. Van Hemelrijck, H. Sol, W.P. de Wilde, A.H. Cardon  
F. de Roey, L. Schillemans, F. Boulpaep*

Computer Aided Torsion Test 325  
*B. Férent, A. Vautrin*

## SECTION 5 - FAILURE ANALYSIS

The Use of the Hoffman Yield Criterion in Finite Element  
Analysis of Anisotropic Composites 341  
*J.C.J. Schellekens, R. de Borst*

Non Linear Behavior of Damaged Woven Fabric Ceramic  
Composites 361  
*V. Arnault, B. Lebon, P.M. Lesne, J. Renard*

Buckling of Composite Torispherical and Hemispherical  
Domes 375  
*F. Levy, G.D. Galletly, J. Mistry*

A Numerical Investigation of Buckling/Material Failure  
Modes in CFRP Dome Closures 395  
*J. Blachut, G.D. Galletly*

A General Failure Criterion for the Analysis of Fibre-  
Reinforced Composite Laminae 413  
*K.W. Neale, P. Labossière*

A Simplified Analytical Model for Impact/Penetration  
Process in Thick Fiber-Reinforced Composites 429  
*S. Langlie, W. Cheng*

## SECTION 6 - OPTIMISATION TECHNIQUES

The Maximum Stiffness Design of Rectangular Symmetric  
Angle-Ply Laminates 451  
*B. Qian, R. Reiss, W. Aung*

Filament Wound Composite Pressure Vessels: Computer  
Aided Optimisation and Manufacturing 465  
*P.M.J.W. Martin*

FEMAC, a Finite Element Program for Microcomputers and Composites <i>J. Daoust</i>	475
Optimum Design of Laminated Composite Structures <i>H. Fukunaga, G.N. Vanderplaats</i>	493
Analysis and Optimum Design of Geodesically Stiffened Composite Panels <i>J.L. Phillips, Z. Gürdal</i>	509
Analysis and Optimization of Simple Composite Structures <i>A. Miravete</i>	529
A Finite Element Analysis of the Effect of Stacking Sequence on the Failure Mode of Bonded Composite Single Lap Joints <i>K.C. Kairouz, F.L. Matthews</i>	549
Design of Stacking Sequences of Laminated Plates for Thermoelastic Effects <i>N. Kandil, G. Verchery</i>	565
