Energy Planning in a Dynamic World: Overview and Perspective	1
<i>William F. Kieschnick and John L. Helm</i>	

1. SUPPLY, DEMAND, AND REAPPRAISAL

Energy in Retrospect: Is the Past Prologue?	21
<i>Alvin M. Weinberg</i>	
Energy Efficiency: Its Potential and Limits to the Year 2000	35
<i>John H. Gibbons and Peter D. Blair</i>	
Implications of Continuing Electrification	52
<i>Chauncey Starr</i>	

2. ENVIRONMENTAL ISSUES

Global Environmental Forces	75
<i>Thomas C. Schelling</i>	
Regional Environmental Forces: A Methodology for Assessment and Prediction	85
<i>Thomas E. Graedel</i>	
The Automobile and the Atmosphere	111
<i>John W. Shiller</i>	

3. EVOLVING VULNERABILITIES AND OPPORTUNITIES

Managing Volatility in the Oil Industry	145
<i>John F. Bookout</i>	
The Uncertain Future Role of Natural Gas	165
<i>William T. McCormick, Jr.</i>	
European Natural Gas Supplies and Markets	173
<i>Henrick Ager-Hanssen</i>	
Future Consequences of Nuclear Nonpolicy	184
<i>Richard E. Balzhiser</i>	

4. IMPLICATIONS FOR STRATEGY

Energy, Environment, and Development	205
<i>William D. Ruckelshaus</i>	
What to Do About CO ₂	213
<i>John L. Helm and Stephen H. Schneider</i>	
Achieving Continuing Electrification	238
<i>Wallace B. Behnke, Jr.</i>	
Regional Approaches to Transboundary Air Pollution	246
<i>Peter H. Sand</i>	
Efficiency, Machiavelli, and Buddha	265
<i>Robert Malpas</i>
