

# Contents

## I. Tools

<b>1</b>	Fluctuations of Interfaces and Fronts M. Kardar	<b>3</b>
<b>2</b>	Introduction to Multifractality S. Roux and A. Hansen	<b>17</b>
<b>3</b>	Statistical Theory of Fragmentation S. Redner	<b>31</b>

## II. Diffusion-Limited Aggregation Model

<b>4</b>	Theory and Simulation of Diffusion-Limited Growth J. Kertész	<b>51</b>
<b>5</b>	Growth Patterns and Fronts: Fluid Flow Experiments J. Feder, F. Boger, L. Furuberg, E. Hinrichsen, T. Jøssang, K. J. Måløy and U. Oxaal	<b>63</b>
<b>6.1</b>	From Flow to Fracture and Fragmentation in Colloidal Media 1: Non-Newtonian Fingering and Visco-Elastic Fracturing H. Van Damme and E. Lemaire	<b>83</b>
<b>6.2</b>	From Flow to Fracture and Fragmentation in Colloidal Media 2: Local Order and Fragmentation Geometry H. Van Damme and M. Ben Ohoud	<b>105</b>

## III. Statistical Fracture Models

<b>7</b>	Simple Stochastic Models for Material Failure P. Meakin, G. Li, L.M. Sander, H. Yan, F. Guinea, O. Pla and E. Louis	<b>119</b>
----------	---	------------

<b>8</b> Scaling Theory of the Strength of Percolation Networks P.M. Duxbury and Y. Li	141
<b>9</b> Scaling in Fracture H.J. Herrmann and L. de Arcangelis	149

## IV. Rheology and Fracture

<b>10</b> Micromechanics of Brittle Deformation Processes D. Krajcinovic	167
<b>11</b> Fracture Mechanics and Solid Adhesion D. Maugis	187
<b>12</b> Damage Evolution, Instability and Fracture in Ductile Solids A. Needleman	219
<b>13</b> Aspects of Nonlinearity and Selforganisation in Plastic Deformation E.C. Aifantis	239

## V. Materials and Applications

<b>14</b> Granular Media: Effects of Disorder D. Bideau, E. Guyon and L. Oger	255
<b>15</b> Cracking and Fracture of Concrete: Size Effect or Scaling Law? P. Acker, P. Rossi and J-M. Torrenti	269
<b>16.1</b> The Phenomenology of Earthquake Occurrence L. Knopoff	279
<b>16.2</b> The Modeling of Earthquake Occurrence L. Knopoff	289

<b>Index</b>	301
