

Contents

Preface	ix
1 Introduction	1
1.1 The Impact of Higher Energy Prices	
1.2 The Structure of Energy Demand	
1.3 Energy and the Macroeconomy	
1.4 The Need for an International Study	
1.5 The Plan of the Book	
1.6 A Word on Units of Measurement	
2 Models of Sectoral Energy Demand	22
2.1 The Residential Sector	
2.2 The Industrial Sector	
2.3 Energy Demand in the Transportation Sector	
Appendix: Demand Models for Other Fuels and Sectors of Use	
3 The Estimation of Energy Demand Models	66
3.1 Methodological Issues in the Estimation of Demand Models	
3.2 The Data	
4 The Residential Demand for Energy	104
4.1 Estimation of the Energy Price Aggregator	
4.2 The Translog Model of Consumption Expenditures	
4.3 The Translog Model of Fuel Expenditures	
4.4 Summary of Results and Comparison with Other Studies	
Appendix: Logit Models of Residential Fuel Shares	
5 The Industrial Demand for Energy	168
5.1 Estimation of the Translog Fuel-Share Model	
5.2 The Aggregate Price Index for Energy	
5.3 Estimation of the Factor-Share Model	

5.4	Summary of Results and Comparison with Other Studies	
	Appendix: Logit Models of Industrial Fuel Shares	
6	The Transportation Demand for Energy	225
6.1	The Demand for Motor Gasoline	
6.2	The Demands for Other Fuels	
7	Energy Demand in the Developing Countries	248
7.1	Energy Use in the Developing vs. the Developed Countries	
7.2	Some Empirical Estimates of Demand Elasticities	
7.3	The Future of the Developing Countries as Energy Consumers	
8	Higher Energy Prices and Economic Growth	266
8.1	Energy and the Macroeconomy	
8.2	The Future Price and Availability of Energy	
	References	283
	Index	297
