

Contents

Introductory Lecture	
By B. Tocquet	1
1. Transducer Needs for Low-Frequency Sonar	
By R.W. Timme, A.M. Young, and J.E. Blue (With 9 Figures)	3
2. Transducer Needs for Oceanography	
By R. Person	14
3. Transducer Needs for Petroleum Acoustics	
By B. Froelich (With 8 Figures)	22
4. Transducer Needs for Macrosonics	
By J.A. Gallego-Juarez (With 9 Figures)	35
5. Class IV Flextensional Transducers	
By G. Bromfield (With 14 Figures)	48
6. The Ring-Shell Flextensional Transducer (Class V)	
By G.W. McMahon (With 18 Figures)	60
7. Transducers for Great Depths	
By P. Dufourcq, J. Adda, M. Letiche, and E. Sernit (With 10 Figures)	75
8. Physics of Array Element Interaction Phenomena	
By R.T. Richards, J.B. Blottman III, and B. McTaggart (With 18 Figures)	86
9. Numerical Modeling of Array Interactions	
By G.W. Benthien (With 12 Figures)	109
10. Magnetostrictive Materials	
By D. McMasters (With 5 Figures)	125
11. Modeling and Characterization of the Magnetostrictive Coupling	
By F. Claeysen, R. Bossut, and D. Boucher (With 6 Figures)	132
12. A Magnetostrictive Transducer Design	
By G.A. Steel and J.R. Oswin (With 9 Figures)	152
13. Magneto-hydrodynamic and Thermoacoustic Mechanisms for Generation of Sound in Seawater	
By S.L. Garrett and T.B. Gabrielson (With 7 Figures)	162

14. A Low-Frequency, Tow-Powered Sound Source By J.E. Blue, A.L. Van Buren, and LT P.A. Semper (With 9 Figures) . . .	178
15. Electronic Needs for High-Power Transducers By G.G. Dixon and S.R. Leyland (With 16 Figures)	186
16. Electronic Systems Modeling By S. Faure and J.M. Capron (With 24 Figures)	203
17. Calibration of Underwater Acoustic Transducers at NRL/USRD By A.L. Van Buren and J.E. Blue (With 22 Figures)	221
18. Measurement Methods for Low-Frequency Transducers By C. Giangreco, S. Faure, and J.F. Rossetto (With 19 Figures)	242
19. Poster Session Abstracts	257
Subject Index	269
