

Contents

- v Preface
- 1–4 The quiet revolution in materials: The challenges
T F Page
- 5–12 Novel forming methods (for composites)
A Kelly
- 13–23 Multiple live-feed processing as a route for fibre management in composite materials
P S Allan and M J Bevis
- 25–32 Plastic forming operations for ceramic suspensions
J R G Evans
- 33–42 Towards improved materials from powder processing
K Kendall
- 43–52 Injection mouldable ceramic–polymer blends: Effect of some powder characteristics on the binder removal process
R E F Q Nogueira and M J Edirisinghe
- 53–60 Application of x-ray microtomography to the study of SiC/Al metal matrix composite material
T M Breunig, J C Elliott, P Anderson, G Davis, S R Stock, A Guveniler and S D Dover
- 61–66 Use of dynamic diffraction methods to study the synthesis of materials under various conditions
P Barnes, D Häusermann and S E Tarling
- 67–72 Ultrasonic characterization of oriented roll-drawn polypropylene using shear wave birefringence
R Mloszewski, D A Hutchins and J Franceur
- 73–80 Friction of exoxidized natural rubber
A D Roberts
- 81–90 Aramid fibre friction: Asbestos replacement in high friction materials?
B J Briscoe and P J Tweedale
- 91–100 Wear of aluminium-alumina metal-matrix composites by abrasion and erosion
I M Hutchings and A Wang
- 101–110 Tribology of hard coatings
R Kingswell, D S Rickerby and S J Bull

- 111–116 High temperature fretting damage to silicon nitride ceramics: Palliation by surface treatment
Z P Wang and C Ruiz
- 117–127 Ceramic rolling elements for machine tool spindle bearings
F P Wardle, S W Siu and A T Synnott
- 129–132 Development of antifriction materials of new generation
V Nikolayev and V Domoratsky
- 133–142 Study of stress relief patterns in diamondlike carbon films
S B Iyer, K S Harshavardhan and V Kumar
- 143–156 Processing and properties of ceramic fibres, with emphasis on silicon carbide
V Kalyvas, A P Kemp, B Rand, G C East, J E McIntyre, F L Riley, L F Chen and J C Ko
- 157–162 Fiberamic: A new silicon carbonitride ceramic fiber with high thermal stability
P Poirier
- 163–172 Coatings for composites—a theoretical assessment
C F Knights
- 173–183 Fabrication aspects of glass matrix composites for gas turbine applications
D A Clarke
- 185–196 Interface, matrix and fibre microstructure in SiC-reinforced glass-ceramic composites
V S R Murthy, M W Pharaoh and M H Lewis
- 197–206 Fabrication and mechanical properties of improved fibre reinforced ceramics
J J R Davies, R F Preston, R J Lee and K N Walls
- 207–216 Metal filament and ceramic fibre reinforced glass-ceramic matrix composites
I W Donald, B L Metcalfe and D J Bradley
- 217–226 Continuous fibre reinforced glass and glass ceramic matrix composites by sol-gel processing
V Gunay, P F James, F R Jones and J E Bailey
- 227–237 The role of the interface on the densification of sol-gel processed alumina and mullite fibre composites
M Chen, F R Jones, P F James and J E Bailey
- 239–245 The preparation of oxidation resistant silicon carbide–silicon carbide composites by chemical vapour infiltration (cvi)
D Bashford

- 247–259 Microstructural traceability of composites
B Bousfield
- 261–272 Applications of low and high T_C thin film devices to metrology
J C Gallop
- 273–284 Passive microwave device applications of high temperature superconductors
M J Lancaster
- 285–294 Fabrication and applications of whole-wafer Nb/Al₂O₃/Nb tunnel junctions
M G Blamire
- 295–304 Growth of as deposited thin superconducting films of YBCO using plasma assisted laser ablation
D S Misra, A A C S Lourenco and S B Palmer
- 305–317 Chemical vapour deposition (CVD) of high T_C thin films
M L Hitchman, D D Gilliland, D J Cole-Hamilton and S C Thompson
- 319–324 Growth and characterization of thin films of thallium-based superconducting oxides
H C Lai, K D Vernon-Parry and C R M Grovenor
- 325–331 Degradation and ageing in Tl₂Ba₂Ca₁Cu₂O_x high temperature superconductors
L T Romano, K D Vernon-Parry, J S Lees, J Rogers, G Fletcher, T Beales, C R M Grovenor and R T G Tilley
- 333–344 Metal complexes as materials for chemical sensors
J D Wright
- 345–354 An investigation into the viability of screen printed organic semiconductor compounds as gas sensors
A W J Cranny and J K Atkinson
- 355–361 Use of ceramic sensors in the aluminium production process
E Fazio, E Proverbio and R Cigna
- 363–364 Molecularly-doped polymers for use in electronic imaging
J Mort
- 365–372 Development and characterization of the highly magnetostrictive alloy Tb_{0.3}Dy_{0.7}Fe_{1.9} for use in sensors and actuators
D C Jiles
- 373–378 Measurement of the temperature dependency of the stress-optic coefficient of photoelastic materials
M Ayub, R C Spooncer and B E Jones
- 379–388 All fibre-optic micromechanical resonator sensor system
R M A Fatah and N A D Stokes

- 389–399 Designing ceramic components—the state of the art
R Morrell
- 401–410 A new machineable phosphate based glass ceramic
T H Wang and P F James
- 411–418 Cation environments and the mixed alkali effect in silicate glasses: An EXAFS investigation
G N Greaves, C R A Catlow, B Vessal, J Charnock, C M B Henderson, R Zhu, S Qiao, Y Wang, S J Gurman and S Houde-Walter
- 419–426 Ceramic and glass ceramic superconducting thick films
L A Blunt, M E Yakinci, D Holland, J S Abell, T Shields and F Wellhofer
- 427–434 Sialon U-phase: A new crystalline grain-boundary phase for β' -sialon ceramics
J Grins, P-O Käll, K Liddell, P Korgul and D P Thompson
- 435–440 Optical characterisation of sol-gel glasses
C McDonagh, B O'Kelly, K Devlin, Z R Tang and J McGilp
- 441–447 Crystallization studies of multicomponent AlF_3 glasses
A B Seddon and A V Cardoso
- 449–458 Oxychloride glasses for infra-red transmission
M R Sahar, M M Ahmed and D Holland
- 459–468 Glass-ceramic coatings for extended performance
D Holland, F Hong, E Logan and S Sutherland
- 469–478 Bonding of lithium zinc silicate glass-ceramics to nickel-based superalloys
B L Metcalfe and I W Donald
- 479–480 Sol-gel derived highly porous SnO_2 for semiconductor gas sensors
M Forster, J Eberle, S Strässler and G Pfister
- 481–482 Near edge structure of dopants in amorphous silicon
G N Greaves, P Stephenson, S Kalbitzer, S Pizzini and K J Roberts
- 483–484 Diamond thin films and their applications
J Mort
- 485–487 New composite tool materials based on PM high speed steels
A F Sanin, V A Domoratsky, V P Pedan, L L Scheglova and J J Dunkley
- 489–490 The use of glass coatings in HIPing of cold pressed HSS preforms
M Y Verkhovtsev, A F Sanin, V K Nikolayev, V A Domoratsky and I I Shpirka
- 491–492 Frequency response of resonant beam sensors
R M A Fatah

Contents

- 493–495 Strength degradation of ground and etched Si surfaces
D G Chetwynd and S T Smith
- 497–499 Design, construction and test of a fast light source for transient photoconductivity experiments
S M Vaezi-Nejad, D B Shiers and C Juhasz
- 501–505 Spray pyrolysis of $\text{Bi}_2\text{Sr}_2\text{CaCu}_2\text{O}_{8+\delta}$
T O'Brien and W Blau
- 507–508 Phlogopite micas as thermal actuators
L Cartz, F G Karioris and X Yang
- 509–519 Some features of the fracture behaviour of structural ceramics
A Shatalin
- 521–530 The fabrication of carbon–carbon composites using a liquid crystal matrix precursor
A J Hosty, B Rand and F R Jones
- 531–532 Author Index
- 533–534 Subject Index
