LIST OF ILLUSTRATIONS / *xiii*

LIST OF TABLES / *xix*

PREFACE / *xxi*

CONTRIBUTORS / *xxv*

PART I • NEWTON AND HALLEY

1. Newton, Halley, and the System of Patronage
Richard S. Westfall and Gerald Funk / 3
2. Newton, Halley, and the Royal Observatory
Derek Howse / 14
3. Newton, Halley, and the Paris Observatory
Suzanne Débarbat / 27

PART II • NEWTON

4. “Such an Impertinently Litigious Lady”: Hooke’s “Great Pretending” vs. Newton’s *Principia* and Newton’s and Halley’s Theory of Comets
David Kubrin / 55
5. Halley’s Two Essays on Newton’s *Principia*
I. Bernard Cohen / 91
6. Newton’s “Sleeping Argument” and the Newtonian Synthesis of Science and Religion
James E. Force / 109
7. Newton as Alchemist and Theologian
B.J.T. Dobbs / 128

PART III • HALLEY

8. Halley and the Dimensions of the Solar System

Albert Van Helden / 143

9. Halley, Surveyor and Military Engineer: Istria, 1703

Alan H. Cook / 157

10. Captain Edmond Halley, F.R.S., Royal Navy, and the Practice of Navigation

*D. W. Waters / 171*11. The Royal Patrons of Edmond Halley, with Special Reference
to His Maps*Norman J. W. Thrower / 203*

12. Halley and the Barometer

W. R. Albury / 220

PART IV • COMETS

13. The Ancient History of Halley's Comet

F. Richard Stephenson / 231

14. Halley, Delisle, and the Making of the Comet

Simon Schaffer / 254

15. Newton and the Ongoing Teleological Role of Comets

Sara Schechner Genuth / 299

16. The Comet of 1680–1681

Eric G. Forbes / 312

17. Edmond Halley: His Interest in Comets

*David W. Hughes / 324*18. The First International Halley Watch: Guiding the Worldwide Search for
Comet Halley, 1755–1759*Craig B. Waff / 373*

Illustrations

Frontispiece Portrait of Newton by Charles Jervas / *ii*

Frontispiece Portrait of Halley by Thomas Murray / *iii*

3.1 Title page, Newton's *Principia* (1687), with autograph dedication from Halley to J. D. Cassini / *28–29*

3.2 Page of calculations by J. D. Cassini, on the last page of the *Principia*, presented to him by Halley / *30*

3.3 Excerpt from the 1687 *Principia* / *31*

3.4 Earth measurements from J. Picard's *La Mesure de la Terre* / *32*

3.5 Page from Cassini's notebook, 15 January 1682, reporting latitude determination by Halley / *34*

3.6 Letter of 1686 to Cassini from Halley, autograph / *35*

3.7 Title page of Newton's *Principia* by the Marquise du Chastellet (1756) / *37*

3.8 Return of a comet in 1607, by Ismaël Bouilliau, Senior / *40*

3.9 Comet "Halley" in Picard's notebook of observations made at the Paris Observatory, 1682 / *41*

- 3.10 Comet “Halley” in Cassini’s notebook, 1682 / 42
- 3.11 Comet “Halley” in the notebook of Cassini III, 1759 / 44
- 3.12 Comet “Halley” in a manuscript by Bailly, 1759 / 45
- 3.13 Comet “Halley” in a manuscript by Messier / 46
- 3.14 “Route of Comet Halley,” presented to King Louis XV by Messier / 47
- 3.15 Portrait of Newton in the Paris Observatory / 48
- 3.16 Effigy of Halley in an allegorical painting by Edmond-Louis Dupain (1882) of the Transit of Venus in the Paris Observatory / 49
- 9.1 General map of the head of the Adriatic / 159
- 9.2 The harbor at Buccari at the present / 160
- 9.3 The harbor of Trieste, as surveyed by Halley / 163
- 9.4 Entrance to the harbor of Buccari, showing probable sites of batteries erected by Halley / 166
- 10.1 Royal Observatory, Greenwich, by Francis Place (1676) / 173
- 10.2 Title page of the *Practical Navigator* by John Seller (1672) / 181
- 10.3 An English merchantship by T. Flessier (ca. 1665) / 185
- 11.1 Halley’s southern hemisphere star chart (1678) / 205
- 11.2 Cartouche from Halley’s Atlantic Chart of Magnetic Variation (1701) / 211
- 11.3 Cartouche from Halley’s World Chart of Magnetic Variation (1702) / 212

- 11.4 Inset with poem from Halley's World Chart / 213
- 11.5 Original capstone of Halley's tomb, Royal Observatory, Greenwich / 216
- 13.1 Plot of deviations of dates of perihelion for Halley's Comet for period since 700 B.C. / 233
- 13.2 Computed motion of Halley's Comet in 12 B.C. / 236
- 13.3 Frequency by decades of Chinese astronomical records (other than solar eclipses) in the *Han-shu* / 239
- 13.4 Accuracy of recording dates of astronomical events in Chinese history (former Han dynasty) / 240
- 13.5 Apparent daily motion of Halley's Comet around the time of perihelion, 87 B.C. / 246
- 13.6 Apparent daily motion of Halley's Comet around the time of perihelion, 164 B.C. / 249
- 13.7 Apparent daily motion of Halley's Comet around the time of perihelion, 240 B.C. / 251
- 17.1 Copper medallion of Newton with Halley's Comet (ca. 1780) / 326
- 17.2 Percentages of Halley's professional life spent in various pursuits / 327
- 17.3 Title page of pamphlet warning of calamities expected after appearance of comet of 1680 / 330
- 17.4 Apian, woodcut showing the 1531 apparition of Halley's Comet, from *Cometographia* (1668) / 331
- 17.5 Hevelius's ideas as to the origin and orbits of planets, from *Cometographia* (1668) / 333
- 17.6 Hevelius's drawing of Halley's Comet, 8 September 1682, from *Annus Climacterius* (1685) / 334

- 17.7 Dörffel's diagram of the comet of 1680–81 / 336
- 17.8 Gadbury's prophecies concerning the comet of 1664 / 337
- 17.9 Flamsteed's diagram of the comet of 1680 / 339
- 17.10 Page from Halley's notebook with his observations of the comet of 1682 / 344
- 17.11 Orbit of the comet of 1680, from Newton's *Principia* (1687) / 348
- 17.12 Visible apparitions of Halley's Comet in the last two thousand years / 350
- 17.13 Title page of the original English version of Halley's *Synopsis* (1705) / 354
- 17.14 Halley's tables of the orbital elements of twenty-four comets / 356
- 17.15 Diagram of the inner portion of the orbit of Halley's Comet in 1682 / 357
- 17.16 Orbits of the twenty-four comets, in Halley's table from Le Monnier's *La théorie des comètes* (1743) / 358
- 17.17 Frontispiece of Whiston's *Astronomical Lectures* (1715) / 361
- 18.1 Thomas Barker's table of likely first-appearance locations of Halley's Comet / 381
- 18.2 Dirk Klinkenberg's table of expected positions of Halley's Comet, assuming a perihelion date of 14 February 1757/58 / 382
- 18.3 Barker's diagram overlaying the orbit of Halley's Comet over the Earth's orbit / 384
- 18.4 Benjamin Martin's broadside illustrating the orbit of Halley's Comet over the Earth's orbit / 385

- 18.5 T. Jamard's celestial map (1757) representing the orbital paths of the comets seen in 1531, 1607, and 1682 / 387
- 18.6 Philippe Bauche's geographical representation of positions on the Earth where the comets of 1531, 1607, and 1682 were seen overhead / 388
- 18.7 Joseph Delisle's table of positions of the comet based on suppositions of first visibility / 398
- 18.8 Delisle's celestial map / 400

Tables

13.1 Astronomical observations recorded in Chinese history ca. 164 and 87
B.C. / 237

13.2 Cometary records from the *Shi-chi* during the Warring States period and
Ch'in dynasty / 242

17.1 Orbital elements of Halley's Comet / 359

17.2 Edmond Halley, his life and his comets / 365
