Preface xi

GaAs on Si: Device Applications

M. van Rossum, J. De Boeck, M. De Potter, and G. Borghs

Introduction	1
Substrate Considerations	2
Majority-Carrier Devices	7
Minority-Carrier Devices	11
Conclusions	18

Ion Beam Synthesis in Silicon

A. H. van Ommen

Introduction	25
The Ion Implantation Process	27
Buried SiO ₂ Layers in Si	28
Buried Monocrystalline CoSi ₂ Layers in Si	44
Conclusions	66

Ion Beam Processing of Chemical Vapor Deposited Silicon Layers

S. U. Campisano, C. Spinella, and F. Priolo

Introduction	71
Ion Beam Effects	71
Epitaxy of Deposited Layers	77
Polycrystal Formation	81

Technology and Devices for Silicon Based Three-Dimensional Circuits

J. Götzlich

Introduction	87
3D-Technology	89
Device Characteristics	103
Features of 3D-Circuits	109
Demonstrators	115
Conclusions	117

Integrated Fabrication of Micromechanical Structures on Silicon

J. C. Greenwood

Introduction	123
Mechanical Properties of Silicon	124
Thermal Properties	126
Fabrication Techniques	126
Etching	127
Anisotropic Etching	129
Boron Doped Etch Stop	132
Electrochemical Etch Stop	133
Embedded Layers	133
Surface Microstructures	134
Bonding of Layers	137
Electrostatic Bonding	139
Oxide Bonding	139
Bonding to Metals	140
Conclusion	140

Micromachining of Silicon for Sensors

R. M. Langdon

Introduction	143
Physical Properties of Silicon	144
Transduction Techniques	144
Fabrication Techniques	146
Pressure Sensors	150
Accelerometers	153
Microresonator Sensors	158
Optical Microresonator Sensors	166
Conclusions	169

Integrated Photonic Circuits on Silicon

S. Valette, J. P. Jadot, P. Gidon, S. Renard, G. Grand,

A. Fournier, A. M. Grouillet, P. Phillippe, H. Denis,

E. Desgranges, L. Mulatier, and C. Erbeia

Introduction	173
Hybrid or Monolithic Approach for optoelectronics: That is the question	174
About the Hybrid Approach Material Competitors	176
Silicon Based Technologies developed at LETI	179

Planar and Channel waveguide Properties of IOS Technologies	190
Field of Activities	198
Integrated Optical Spectrum Analyser (IOSA)	199
Integrated Optical Sensors	217
Optical Communication Applications	227
Optical Memories	231
Conclusion	234
Principles and Implementation of Artificial Neural Networks	
<i>R. C. Frye and E.A. Rietman</i>	
Introduction	241
Binary Networks	244
Analog Networks	253
Miscellaneous Networks	260
Future VLSI Networks	261
Conclusions	263
List of Participants	269
Index	273
