Preface .....	xv

## Prologue

1. A Historical Introduction to the Bacterial Chromosome • *Karl Drlica and Monica Riley* ..... 3
2. Conditional Mutations in Prokaryotes • *Douglas E. Berg* ..... 15

## Primary Structure: Genetic and Physical Maps

3. Correlation between the Physical and Genetic Maps of the *Escherichia coli* K-12 Chromosome • *Yuji Kobara* ..... 29
4. Constructing Encyclopedias of Genomes • *Donna L. Daniels* ..... 43
5. Genetic Mapping Using Large-DNA Technology: Alignment of *Sfi*I and *Avr*II Sites with the *Not*I Genomic Restriction Map of *Escherichia coli* K-12 • *Guy Condemine and Cassandra L. Smith* ..... 53
6. Replication and the Transcriptional Organization of the *Escherichia coli* Chromosome • *Bonita J. Brewer* ..... 61
7. Comparative Genetics of *Escherichia coli* and *Salmonella typhimurium* • *Monica Riley and Kenneth E. Sanderson* ..... 85
8. Patterns of Gene Linkages in *Pseudomonas* Species • *B. W. Holloway, S. Dharmsthiti, V. Krishnapillai, A. Morgan, V. Obeyesekere, E. Ratnaningsih, M. Sinclair, D. Strom, and C. Zhang* ..... 97
9. Genetic Map of *Bacillus subtilis* 168 • *Patrick J. Piggot* ..... 107
10. The *Streptomyces* Genome • *David A. Hopwood and Tobias Kieser* ..... 147
11. Genetic and Physical Mapping of the Chromosome of *Staphylococcus aureus* NCTC 8325 • *Peter A. Pattee* ..... 163

## Configuration of DNA

12. Intracellular Organization of the Bacterial Genome • *Eduard Kellenberger* .... 173
13. Biology and Chemistry of Z DNA and Triplexes • *R. D. Wells, S. Amirhaeri, J. A. Blabo, D. A. Collier, A. Dobrman, J. A. Griffin, J. C. Hanvey, W.-T. Hsieh, A. Jaworski, J. E. Larson, M. J. McLean, A. Rabmouni, M. Rajagopalan, M. Shimizu, F. Woblrab, and W. Zacharias* ..... 187
14. Roles of DNA Topoisomerases in Bacterial Chromosome Structure and Function • *Karl Drlica, Gail J. Pruss, Richard M. Burger, Robert J. Franco, Li-Shan Hsieh, and Brenda A. Berger* ..... 195
15. Electrophoretic Analysis of Large DNA: Application to the Structure and Dynamics of the *Escherichia coli* Chromosome • *Cassandra L. Smith, Guy Condemine, and Steve Ringquist* ..... 205

16. The Family of Repetitive Extragenic Palindromic Sequences: Interaction with DNA Gyrase and Histonelike Protein HU • *Young Yang and Giovanna Ferro-Luzzi Ames* ..... 211
17. Modulation of Transcription by Altered Torsional Stress, Upstream Silencers, and DNA-Binding Proteins • *Robert J. Thompson, John P. Davies, Gene Lin, and Gisela Mosig* ..... 227
18. Role of HU Protein in Transitional DNA Coiling • *David E. Pettijohn and Yvonne Hodges-Garcia* ..... 241
19. Regulation of HU Protein Synthesis in *Escherichia coli* • *Josette Rouviere-Yaniv, Eliette Bonnefoy, Olivier Huisman, and Anna Almeida* ..... 247
20. Physiological Characterization of Deletion Mutants of the *hupA* and *hupB* Genes in *Escherichia coli* • *Fumio Imamoto and Yasunobu Kano* ..... 259

### Chromosome Replication and Segregation

21. Priming and Growth Rate Regulation: Questions Concerning Initiation of DNA Replication in *Escherichia coli* • *Judith W. Zyskind* ..... 269
22. Replication Timing and Copy Number Control of *oriC* Plasmids • *Alan C. Leonard, Patrick W. Theisen, and Charles E. Helmstetter* ..... 279
23. Comparative Anatomy of *oriC* of Eubacteria • *Naotake Ogasawara, Masaki Q. Fujita, Shigeki Moriya, Takuya Fukuoka, Makoto Hirano, and Hiroshi Yoshikawa* ..... 287
24. *tus* and the Terminators: Inhibition of Replication in *Escherichia coli* • *Peter L. Kuempel, Anthony J. Pelletier, and Thomas M. Hill* ..... 297
25. Termination of Chromosome Replication in *Bacillus subtilis* • *R. G. Wake* ..... 307
26. The Bacterial Equivalent of Mitosis • *Moselio Schaechter* ..... 313

### Recombination and Major Genetic Change

27. Gene Rearrangements, a Force for Evolutionary Change; DNA Sequence Arrangements, a Source of Genetic Constancy • *L. Nicholas Ornston, Ellen L. Neidle, and John E. Houghton* ..... 325
28. Recombination between rRNA Genes in *Escherichia coli* and *Salmonella typhimurium* • *Charles W. Hill, Steve Harvey, and Jane Antal Gray* ..... 335
29. Recombination Events That Rearrange the Chromosome: Barriers to Inversion • *Michael J. Mahan, Anca M. Segall, and John R. Roth* ..... 341
30. Replication Termination, Nondivisible Zones, and Structure of the *Escherichia coli* Chromosome • *Vincent François, Jacqueline Louarn, José-Emilio Rebollo, and Jean-Michel Louarn* ..... 351
31. Genetic Rearrangements in *Bacillus subtilis* • *C. Anagnostopoulos* ..... 361
32. Cooption of Prophage Genes: New Data on the Kim Prophage Region of the *Escherichia coli* Chromosome • *Jean-Pierre Bouché, Samir Béjar, and Kaymeuang Cam* ..... 373

### Global Responses to Stress

33. SOS Functions • *Andrew T. Thliveris, Don G. Ennis, L. Kevin Lewis,*

- and David W. Mount* ..... 381
34. Sporulation, a Comprehensive Stress Response Which Leads to Differentiation • *Issar Smith, Eugenie Dubnau, Nand Gaur, Mark Lewandoski, Joyce Weir, Kettly Cabane, and Gopal Nair* ..... 389
35. Heat Shock Response of *Escherichia coli* • *Costa Georgopoulos, Debbie Ang, Anna Maddock, Satish Raina, Barbara Lipinska, and Maciej Zylicz* ..... 405
36. Environmental Influences on DNA Supercoiling: a Novel Mechanism for the Regulation of Gene Expression • *C. F. Higgins, C. J. Dorman, and N. Ni Bhriain* ..... 421

#### Cryptic Genetic Information

37. Mechanisms of Activation of the Cryptic *bgl* Operon of *Escherichia coli* K-12 • *Jane Lopilato and Andrew Wright* ..... 435
38. Imprinting as a Mechanism for the Control of Gene Expression • *David S. Thaler, John R. Roth, and Luisa Hirschbein* ..... 445

#### Epilogue

39. Epilogue • *Allan Campbell* ..... 459
- Index ..... 465
