

Table of Contents

1 ULTRA-PRECISION DISPLACEMENT METROLOGY

Investigation and Compensation of the Non-linearity of Heterodyne Interferometers W. Hou and G. Wilkening.....	1
Technology and Application of Grating Interferometers in High-precision Measurement A. Teimel.....	15
Silicon as a Length- and Angle Ruler in Nanotechnology J. Stümpel and P. Becker.....	31

2 HIGH-PRECISION SENSOR SYSTEMS

Electron Tunnel Sensors T.W. Kenny and W.J. Kaiser.....	39
Diode Lasers for Industrial Length Measurements A. Abou-Zeid.....	50

3 THREE-DIMENSIONAL METROLOGY

Paving the Way to Thermally Stable Coordinate Measuring Machines K.-H. Breyer and H.G. Pressel.....	56
Towards Quadrilateration using Steel Ball Retroreflectors J.M. Burch.....	77
Testing of Algorithms for Coordinate Measuring Machines D. Palanivelu, Y. Hari, K. Chen, J. Yang, J. Raja and R. Hocken.....	82

4 HIGH-PRECISION MACHINE DESIGN AND MANUFACTURE

Experiences in the Development of Ultra Stiff CNC Aspheric Generating Machine Tools for Ductile Regime Grinding of Brittle Materials K. Carlisle and P. Shore.....	85
Development of High-precision Aspheric Grinding/Turning Machine T. Osaka, K. Unno, A. Tsuboi, Y. Maeda and K. Takeuchi.....	95
Design and Testing of a Self Coupling Hydrostatic Leadscrew A.H. Slocum.....	103

5 TECHNIQUES AND EQUIPMENT FOR MACHINE PERFORMANCE TESTING

Application of Contisure for the Verification of the Contouring Performance of Precision Machines
M. Burdekin and W. Jywe.....106

An Evaluation of Ultra-precise Machine Tool Contouring Performance: The Low Amplitude Sine Tracking (LAST) Test
M. Gerchman and D. Youden.....124

Examination of High Precision Slow-motion Feed-drive Systems for the Sub-micrometre Range
M. Weck and T. Bispink.....128

6 HIGH-PRECISION MACHINING PROCESSES AND MATERIALS

The Influence of the Crystallographic Structure of the Substrate Material on Surface Quality and Cutting Forces in Micromachining
W. König and N. Spenrath.....141

Mirror Surface Grinding by Metal Bonded Super-abrasive Wheel with Electrolytic In-process Dressing
H. Ohmori, I. Takahashi and T. Nakagawa.....153

Result of Non-linear Mixing in Precision Machining
R. Haberland and G. Pfeifer.....166

7 MACHINE AND PROCESS CONTROL

Micropositioning for Submicron Electron Beam Lithography
H. Bohlen and W. Kulcke.....174

Refinements in Postprocess Gaging with Feedback in the Production of Diamond Turned Optics
J.W. Roblee, Y.L. Chen, K.B. Becker and K.H. Fiedler.....186

8 NON-CONVENTIONAL PROCESSES FOR INDUSTRIAL APPLICATIONS

Evaluation of Silicon Wafer Polishing Pads - Rheological Behaviour of Polishing Pads and Improvement of Wafer Flatness
Y. Samitsu, T. Yoshida, N. Yasunaga,
T. Ohmoto and S. Horie.....192

High Aspect Ratio Laser Machining of Composite Ceramics
R.T. Kerth.....202

Particle Beam Figuring - an Ideal Tool for Precision Figuring of Optics?
M. Weiser, C. Kübler, K.H. Fiedler
and K.F.Beckstette.....209

9 WIDER APPLICATIONS OF ULTRA-PRECISION TECHNOLOGIES

- Some Aspects of Ultra-precision Sciences and Engineering in Medicine and Biosciences
D.W. Robinson.....215
- Microelectronic and Nanoelectronic Interfacing Techniques for Biological Systems
P. Connolly, S. Britland, I. Hussain, W. Monaghan, G.R. Moores and J. Shen.....225
- Cutting Experiments in a Computer using Atomic Models of a Copper Crystal and a Diamond Tool
T. Inamura.....231

10 NEW DEVELOPMENTS IN PRECISION ENGINEERING

- Precision Aspheric Generators for Off-axis X-ray Mirrors and Asymmetric Aspheric Lenses
S. Moriyama.....243
- Design and Modeling of a Linear Microactuator
P. Cheung, R. Horowitz and R. Howe.....255
- Photon Scanning Tunneling Microscopy and Reflection Scanning Microscopy
J.P. Goudonnet, L. Salomon, N. Cerre, F. De Fornel and T.L. Ferrell.....266

11 MISCELLANEA

- Design and Performance Considerations of the Continuous Four-roll Bender: A Precision Machine for the Roller Bending of Plates
M. Hua, K. Baines and D.H. Sansome.....277
- Application of Variable Parametric Programming in Precision Machining Processes
V. Phung.....290
- Micromachining of Hydraulic Elements
J. Kopac and M. Zakelj.....299
- An Interferometer for Measurement of Grating and Index Scale
M. Sawabe, H. Noguchi and T. Makino.....308

12 SHORT REPORTS

- Ultraprecision Machining - A Theoretical Analysis of the Mechanisms of Surface Formation
G. Spur and G. Byrne.....311

A Stylus Profilometer with one Nanometre Precision E.W. Palmer.....	313
An Infinite-stiffness Aerostatic Bearing with an Exhaust-control Restrictor H. Mizumoto, T. Matsubara, H. Yamamoto K. Okuno and M. Yabuya.....	315
Analysis of Dynamic Coefficients for Multirecess Hydrostatic Journal Bearings with Journal Rotation by Finite Element Method Y. Tian and M. Bonis.....	317
Measurement of Sub Surface Damage in Silicon Wafers H.K. Tönshoff, E. Brinksmeier and H. Seibt.....	319
Absolute Laserrefractometer D. Frölich, H.-P. Meiser, D. Frerking.....	321
Accuracy Average Effect of Linear Motion Ball Guides System for NC Machines - Theoretical Analysis S. Shimizu and N. Furuya.....	324
Accuracy Average Effect of Linear Motion Ball Guides System for NC Machines - Experimental Verification S. Shimizu and H. Koshiishi.....	325
Investigation of the Geometrical Properties of CCD Line Image Sensors J. Tschirnich, F. Gehring, D. Hantke, H. Philipp and G. Sparrer.....	326
Optical Linewidth Measurement on Masks and Wafers in the Micrometre and Submicrometre Range M. Czaske, W. Mirandé and M. Fraatz.....	328
Absolute Flatness Testing K.E. Elssner, J. Grzanna, G. Schulz and A. Vogel.....	330
Kinetic Factors in Electropolishing T. Hryniewicz.....	332
Precise Performance Tests of Machine Tools with the use of a Computerised Measuring System J. Jedrzejewski and W. Kwaśny.....	335
The Real Contact Area Measurement by Means of Scanning Profilometry J. Kaczmarek and T. Klimczak.....	337
High-efficiency Polishing of Polycrystalline Diamond T. Kuriyagawa and K. Syoji.....	339
A Differential Laser Autocollimation Probe for On-Machine-Measurement S. Kiyono, Y. Asakawa, O. Kamada and T.Kume.....	340

A New Method of Angle Measurement Based on Internal Reflection Effect P.S. Huang, S. Kiyono and O. Kamada.....	341
An Ultra-fine Infeed Controller P. Langenbeck.....	342
Intercomparison Flatness Measurements on a Granite Surface Plate F. Lüdicke and F.-W. Pietsch.....	343
Is it Possible to use Carbide Tools for Ultra-precision Cutting? Z.C. Luo, R.Y. Chen and J.W. Xiong.....	344
The Straightness Error Compensation Based on the P-integrator Learning Control in High Precision Lathe L. Shengyi, L. Jiancheng and J. Li.....	345
The Research of Super-precision Grinding Control System for Axial Dimension of Hydro Servo Valve Rod L. Shengyi, W. Shimin, T. Bingyang.....	347
Bluntness of the Tool and Process Forces in High-precision Cutting D.A. Taminiou, F.A.C.M. Habraken and J.H. Dautzenberg.....	349
Design of High Performance Externally Pressurized Gas Bearings J.M. Wang and P.H.J. Schellekens.....	350
Mechanisms and Models of Diamond Turning: Theoretical Analysis and Experimental Investigation S. Xiong.....	352
Effect of Crystallographic Orientation on Micro-deformation Processing W.B. Lee.....	354
Long Travel Optical Servo Probe Y. Okazaki, K. Mitsui and N. Odagiri.....	355
A New Optical Profilometer for Optical Smooth Surfaces H. Fritz and K. Körner.....	356
Precision Engineering of Aspherical Optical Surfaces for Silicate Glass Components H. Lammert.....	358
Investigations on Single Crystal Diamond Tools for the Ultra-Precision Manufacturing Process G. Hunsalz, U. Flechsig and D. Kürsten.....	360
Micro-positioning Stage of 6 Degree-of-freedom with Nanometer Resolution S. Asano and T. Goto.....	362

Measurement of Flatness of Technical Surfaces Using Anamorphic Planinterferometer L. Nyársik.....	363
Measurement of Gap and Parameters in the Polishing Process of Optical Glass R. Haberland and U. Blume-Werry.....	364
Results of Contactless Measurement of Lubricant Film Thickness in Precision Ball Bearings R. Haberland and J. Bethke.....	366
Acceleration and Distance Sensors for Machine Vibration Measurement R. Haberland and G. Lauer.....	369
Design and Manufacture of Ultra-Precision Three-Axis Test System with Air Bearing Supports S. Dong, Z. Wang and Z. Yuan.....	371
Computersimulation for Determining the Machined Surface Using Process Parameters in Single Point Diamond Turning F. Schillke, I. Stobbe.....	373
Dynamical Behaviour of an Ultra-Precision Turning Machine A. Hill, W. Tischer.....	375
Advanced Wheel Conditioning Technique for Form Wheel Diamond Grinding of Ceramic and Glass Materials P. Shore, P. Comley and D.G. Jones.....	377
13 APPENDIX	
Some Observations on Tool Wear in Single Point Diamond Turning of Stainless Steel C.J. Evans, R.L. Lundin, R.S. Polvani and D.D. Stewart.....	381
High Resolution Optical Spectroscopy P.J. Moyer and M.A. Paesler.....	384
Consequence of Orientation on the Single Crystal Diamond Cutting Tool K. Uegami and K. Tamamura.....	392
Ceramics in Finish Machining S. Gowri, K. Narayanasamy and R. Krishnamurthy.....	403
Separation of Correction of the Dynamic Error of the Grating Type Single-flank Mesh Gear Tester B. Yongxin and L. Chao.....	415
14 AUTHOR INDEX.....	416
