Preface xi

Acknowledgments xv

PART I

From the Received View to the Semantic Conception

| | |
|---|----|
| 1. Prologue | 3 |
| I. Origins of the Semantic Conception | 5 |
| II. Scientific Realism | 20 |
| III. Plan of the Book | 32 |
| 2. What's Wrong with the Received View on the Structure of Scientific Theories? | 38 |
| I. On Partial Interpretation | 38 |
| A. An Explication of the Received View | 39 |
| B. A Formal Analysis of Partial Interpretation | 41 |
| C. The Analysis Evaluated and Defended | 45 |
| D. Partial Interpretation Summarized | 54 |
| II. The Observational/Theoretical Distinction | 54 |
| A. The Entity and Attribute Dichotomy | 58 |
| B. The Term Dichotomy | 60 |
| C. Are the Dichotomies Coextensive? | 61 |
| III. The Received View versus the Semantic Conception | 62 |
| IV. Summary and Conclusion | 72 |

PART II

The Semantic Conception of Theories

| | |
|---|----|
| 3. Theories, Their Formulations, and the Operational Imperative | 81 |
| I. Theories | 82 |
| II. The Operational Imperative Reformulated | 86 |

| | |
|--|-----|
| III. Semantic Relations | 87 |
| IV. Structural Relations | 94 |
| V. The Empirical Truth of Theories | 96 |
| VI. Instrumentalist versus Realist Construals of Theories | 99 |
| VII. Experimental Methodology | 103 |
| VIII. Tenability of the Operational Imperative | 106 |
| IX. Conclusion | 111 |
| 4. Theories and Phenomena | 118 |
| I. Observation | 119 |
| II. Measurement | 123 |
| III. Experimental Testing | 133 |
| IV. Theories of the Experiment and Backgrounds to Domains | 136 |
| V. Experimental Testing and the Confirmation of Theories | 141 |
| VI. Summary | 145 |
| 5. Theoretical Laws | 152 |
| I. Introduction | 152 |
| II. Laws on the Semantic Conception of Theories | 153 |
| III. Laws of Succession, Coexistence, and Interaction | 155 |
| IV. Teleological and Functional Laws | 162 |
| V. Conclusion | 165 |

PART III

Applications of the Semantic Conception

| | |
|---|-----|
| 6. Theoretical Explanation | 173 |
| I. Philosophical Analyses of Explanation | 174 |
| II. Are All Explanations Explanations Why? | 179 |
| III. Theoretical Explanation on the Semantic Conception | 182 |
| A. <i>How Could</i> Explanations with Statistical Laws of Succession | 183 |
| B. <i>Why</i> Explanations with Deterministic Laws of Succession | 186 |
| C. <i>Why</i> Explanations with Laws of Quasi-Succession | 190 |
| D. <i>Why</i> Explanations Reconsidered | 194 |
| E. The Problem of Laws of Coexistence | 197 |
| IV. Conclusion | 198 |
| 7. Some Philosophical Problems in Biological Speciation and Taxonomy | 201 |
| I. Key Problems in Taxonomic Theory: A Historical Survey | 202 |

| | |
|--|-----|
| II. Natural Taxonomies as Factual Descriptions of Nature | 211 |
| III. Taxa, Natural Kinds, and Attributes | 215 |
| IV. Fixed Taxa Definitions and Empirical Truth | 226 |
| V. Variable Taxa Definitions and Empirical Truth | 234 |
| VI. Are Category Definitions Empirically True or False? | 245 |
| VII. Artificial Taxonomies Are Not Factually True or False | 247 |
| VIII. Natural Taxonomies as Universal Systems of Taxonomy | 250 |
| IX. Taxonomic Systems and Scientific Theories | 253 |
| X. Summary and Conclusion | 257 |
| 8. Interlevel Theories and the Semantic Conception | 266 |
| I. Interlevel Biomedical Theories of the Middle Range | 267 |
| A. Nonuniversality | 267 |
| B. The "Interlevel" Condition | 268 |
| C. Theories as Series of Overlapping Models | 269 |
| II. Concluding Comments | 274 |
| 9. Theoretical Perspectives on Closure | 278 |
| I. Counterfactual Confusions | 280 |
| II. Goal-directed Theories | 284 |
| III. A Psychiatric Example | 285 |
| IV. Conclusion | 292 |

PART IV

Toward a Quasi-Realistic Theory of Scientific Knowledge

| | |
|--|-----|
| 10. Kuhn's and Feyerabend's Relativisms | 301 |
| I. Empiricist Views of Scientific Knowledge | 303 |
| II. Feyerabend's Views | 310 |
| III. Kuhn's Views | 321 |
| IV. Kuhn and Feyerabend as the Last Defenders of Moribund Empiricism | 328 |
| V. Toward a Viable Epistemology of Science | 331 |
| 11. Scientific Realism | 338 |
| I. Epistemology and Scientific Realism | 340 |
| II. Conceptual Devices | 346 |
| III. Is There a Philosophical Problem of Scientific Realism? | 350 |
| 12. Conclusive Reasons and Scientific Knowledge | 354 |
| I. Dretske's Analysis of Conclusive Reasons | 355 |
| II. Whether Conclusive Reasons Are Necessary for Knowing That | 358 |

| | |
|---|-----|
| III. Whether Having a Conclusive Reason Is Sufficient for Knowing That | 362 |
| IV. A Modified Dretsikian Analysis | 363 |
| V. Some Alternative Views Briefly Considered | 376 |
| VI. Scientific Objectivity | 381 |
| 13. Why Science Is Not Really Inductive | 388 |
| I. Induction and the Practice of Science | 389 |
| II. How Good a Model Is Standard Inductive Logic? | 394 |
| III. Induction and Methodology | 403 |
| IV. Induction as a Philosophical Tool | 405 |
| V. Conclusion | 411 |
| 14. Epilogue | 414 |
| I. Changing Problems | 414 |
| II. Recent, Current, and Future Research Emphases | 418 |
| A. The Abstract Structure of Theories | 419 |
| B. Types of Theories | 422 |
| C. The Physical Interpretation of Theories | 422 |
| D. Uses of Theories | 423 |
| III. Emphases That Should Guide Future Research | 425 |
| A. Models versus Theories | 425 |
| B. Individuation of Theories | 426 |
| C. The Relations between Theories, Observation, and Knowledge | 427 |
| D. Historical Studies of Earlier Views | 428 |
| IV. Why Research on These Problems Is Important | 429 |
