

TABLE OF CONTENTS

PREFACE

Albert I. Hermalin	xi
--------------------------	----

ACKNOWLEDGEMENTS	xiii
------------------------	------

I. INTRODUCTION

1. OVERVIEW	
John A. Ross and Regina McNamara	1
Introduction	
Recent survey activity	
Current developments	

II. DEMAND AND NEED ESTIMATES

2. THE MEASUREMENT OF UNMET NEED FOR FAMILY PLANNING IN DEVELOPING COUNTRIES	
Charles F. Westoff and Anne R. Pebley	11
The concept of unmet need	
Desired family size	
Exposure to risk	
Postpartum infecundability	
Magnitude of unmet need	
Components of unmet need	
Types of unmet need	
The demographic significance of unmet need	
Alternative measures of unmet need	
Discussion	
3. A TIME MODEL TO MEASURE CONTRACEPTIVE DEMAND	
Dorothy L. Nortman and Gary L. Lewis	37
Identifying the infecund	
Currently pregnant and breastfeeding women	
Identifying potential birth spacers and limiters	
Description of the model	
CPS findings	
Future pregnancy desires	

Contraceptive use patterns
Model findings
Limitations of the model

III. POLICY AND PLANNING

4. THE POLICY UTILIZATION OF WFS
RESEARCH IN KOREA
Sung-Yeal Koo 75
- Surveys related to the family planning
program in Korea
Fertility and family planning surveys
Other surveys related to the program
Review of WFS research in Korea
The 1974 Korean National Fertility Survey (KNFS)
Research based on the KNFS
Policy implications of second-stage analyses
Policy utilization of survey results
Overview of program design and management
Utilization of WFS research results
Limitations in the utilization of the WFS results
Conclusions
5. STERILIZATION: MOTIVATION, SATISFACTION, AND
DEMOGRAPHIC IMPACT IN MAHARASHTRA
Vaijayanti Bhate 89
- Available data on sterilization
Study objectives
Importance of acceptor motivation and
satisfaction studies
Maharashtra as a case study
Use of service statistics as a frame for
follow-up surveys
The sample
The questionnaire
Acceptor motivation
Side-effects and satisfaction
Demographic impact of sterilization
Scope and limitations of motivation and
satisfaction surveys
6. THE USE OF SURVEYS FOR PROGRAM GUIDANCE IN INDONESIA
Pudjo Rahardjo, Haryono Suyono,
John A. Ross, and Nancy Piet-Pelon 111
- The administrative context
Modular approach to program assessment
through surveys
Background

- Selection of variables
- Ease of data processing
- The four modules
- The sampling frame
- Conclusion
- Development of a new urban program
 - The female survey
 - A profile of women in Jakarta
 - Subgroups
 - The Puskesmas (health center) and other service points
 - Method choice
 - Knowledge about sources of advice or supplies
 - Opinions about service facilities
 - The male survey
- Other survey resources
- Summary

IV. DETERMINANTS OF USE AND NON-USE

7. A MODEL FOR THE COMPARATIVE ANALYSIS OF
WFS CONTRACEPTIVE USE DATA
Barbara Entwisle, Albert I. Hermalin, and
William M. Mason 127
 - A micro model of reproductive behavior
 - Measuring contraceptive use
 - Socioeconomic characteristics
 - Early outcomes
 - Adjustment variables
 - Representations of the model
 - Macro hypotheses
 - Conclusion

8. FERTILITY PREFERENCES AND CONTRACEPTIVE
USE IN THE PHILIPPINES
Thomas W. Pullum, George E. Immerwahr,
and Josefina V. Cabigon 147
 - The determinants of desired family size
 - Actual family size
 - Age-related variables
 - Socioeconomic variables
 - Contraceptive use by women who want
no more children
 - Access
 - Motivation
 - Perceived fecundity
 - Child mortality
 - Other factors
 - Analysis of contraceptive use
 - Summary of findings on contraceptive use

Reasons given for discontinuation or
non-use of family planning methods
Discussion

9. SELECTED CHARACTERISTICS OF "EXPOSED" WOMEN
WHO WANTED NO MORE CHILDREN BUT WERE NOT
USING CONTRACEPTIVES
Gwendolyn Johnson-Acsadi and Maurice Szykman 175

Introduction
Potential limiters
Family planning status of potential limiters
Not-using potential limiters compared with all
currently married women
Not-using and using potential limiters compared
Demographic factors associated with non-use
among potential limiters
Age
Family size and number of sons
Excess fertility
Family planning factors associated with
current non-use
Breastfeeding and postpartum abstinence
Past contraceptive practice
Intention to use in the future
Knowledge of family planning
Knowledge of a family planning outlet
Travel time to a family planning outlet
Attitudinal factors
Attitudes towards birth regulation
Reasons given for not using a contraceptive
Summary and conclusions

V. AVAILABILITY OF SERVICES

10. HOW FAMILY PLANNING AVAILABILITY AFFECTS
CONTRACEPTIVE USE: THE CASE OF THAILAND
Apichat Chamratriithirong and Peerasit Kamnuansilpa..219

Source of data
Measures of availability
Perceived availability
Identification of sources
Travel time
Education
Transportation method and difficulty
Actual availability
User sources
Number of outlets
Distance to tambol and district center

Multivariate analysis
 Effect of number of sources on fertility
 Summary and discussion

11. PERCEPTION OF FAMILY PLANNING SERVICE AVAILABILITY IN RURAL MALAYSIA Noor Laily bt. Abu Bakar, Boon Ann Tan, Nai Peng Tey, and Yuzuru J. Takeshita	237
---	-----

Background
 The data
 Community availability of service outlets
 Perceived accessibility to nearest or preferred
 service outlets
 The working hypothesis
 The analysis
 Bivariate analysis
 Multiple Classification Analysis
 Logit analysis
 Methodology
 Predictors
 Test for interactions
 The full model
 Service availability and contraceptive use
 Concluding remarks

VI. THE INTERVIEW

12. THE PRESENCE OF OTHERS DURING THE INTERVIEW AND THE REPORTING OF CONTRACEPTIVE KNOWLEDGE AND USE John B. Casterline and V.C. Chidambaram	267
---	-----

Data on presence of others
 Cross-national comparisons
 Factors associated with presence of others
 Effect of the presence of others on the
 reporting of contraception
 Knowledge and use of contraception
 Method-specific analysis
 Discussion of the results
 The impact of omission of presence for
 analysis of use
 Concluding remarks
