VISION

1 **'BARTIN applied to visual inspection of axisymmetric engineering parts'**
D W McMichael
Defence Research Agency, UK

6 **'A practical view based 3D object recognition system'**
A C Evans,N A Thacker and J E W Mayhew
University of Sheffield, UK

11 **'Neural network paradigm for visual pattern recognition'**
S J Bye
Telecom Australia Research Lab, Australia
A Adams
University of Tasmania, Australia

16 **'Labelling images with a neural network'**
W P J Mackeown and B T Thomas
University of Bristol, UK
W A Wright and P Greenway
British Aerospace PLC, UK

21 **'Target recognition in infra-red imagery using neural networks and machine learning'**
M A Green, T M Brookes and A D Hughes
British Aerospace (Systems & Equipment)Limited, UK
A A Crowe, W A Wright and A K Patel
British Aerospace Plc, UK

26 **'An original approach for the localization of objects in images'**
R Vaillant, C Monrocq and Y Le Cun
Thomson-CSF/LCR, France

31 **'Unsupervised feature extraction by hypothesis of feature centres'**
Ms M Chan and T J Hall
King's College London, UK

36 **'A hardware polynomial feature net for handprinted digit recognition'**
A Rao and R S Gaborski
Eastman Kodak Company, USA
P G Anderson
Rochester Institute of Technology, USA
K S Jaiswal
Arizona State University, USA

ARCHITECTURE

41 **'Neural network validation: An illustration from the monitoring of multi-phase flows'**
C M Bishop
AEA Technology, UK

46 **'Comparing parameters selection methods and weights rounding techniques to optimize the learning in neural networks'**
J-F Grandin, B Braban, C Ledoux and A Halioua
Thomson CSF RCM, France

51 **'On recurrent neural networks and representing finite-state recognizers'**
M W Goudreau* and C L Giles+
NEC Research Institute, Inc., USA
* also Princeton University, USA
+also University of Maryland, USA

56 **'Cascadability and in-situ learning for VLSI multi-layer networks'**
J Tombs, L Tarassenko and G Cairns
University of Oxford, UK
A Murray
University of Edinburgh, UK

ANALYSIS

61 **'An adaptive Bayesian network for low-level image processing'**
S P Luttrell
Defence Research Agency, UK

66 **'Neural computing: A new route to software reliability'**
D Partridge and N Sharkey
University of Exeter, UK

71 **'Comparison of the performance of vector quantiser training algorithms'**
J V Black
DRA Malvern, UK

76 **'Improved generalization and network pruning using adaptive laplace regularization'**
P M Williams
University of Sussex, UK

81 **'Improving generalisation with Ockham's networks: Minimum description length networks'**
G D Kendall and T J Hall
King's College London, UK

86 **'A Hebbian/anti-Hebbian network which optimizes information capacity by orthonormalizing the principal subspace'**
M D Plumbley
King's College London, UK

91 **'A novel unsupervised classification method'**
J Schmidhuber and D Prelinger
Technische Universitat Munchen, Germany

95 **'Novel 'Topographic' nonlinear feature extraction using radial basis functions for concentration coding in the 'Artificial Nose''**
D Lowe
Defence Reseach Agency, UK

100 **'Valid generalization in radial basis function networks and modified kanerva models'**
S B Holden
Cambridge University, UK

MEDICAL

105 **'A comparison of neural network architectures for cervical cell classification'**
S J McKenna, I W Ricketts, A Y Cairns and K A Hussein
University of Dundee, UK

110 **'Ultrasonic tissue characterization using neural networks'**
Th E Schouten, M K Gebbinck, J M Thijssen
and J T M Verhoeven
Katholieke Universiteit Nijmegen, Netherlands

113 **'Realization of physiological eye movements by automatic selection of control laws using artificial neural network'**
H Wakamatsu
Tokyo Medical and Dental University, Japan
M Kuwano and H Suda
Fukui University, Japan

APPLICATIONS

118 **'Neural network system for tactical asset allocation in the global bond markets'**
C Diamond, J Shadbolt, M Azema-Barac and A N Refenes
ECONOSTAT Ltd, UK

123 **'Experience with artificial neural network models for short-term load forecasting in electrical power systems: A proposed application of expert networks'**
A-U Asar and J R McDonald
University of Strathclyde, UK
W Rattray
Scottish Power, UK

128 **'Central auditory model for spectral processing'**
Y Gao and J-P Haton
CRIN/INRIA, France
T Huang
Chinese Acadmeny of Sciences, China

133 **'Investigating the recognition of false patterns in backpropagation networks'**
G C Vasconcelos, M C Fairhurst and D L Bisset
University of Kent at Canterbury, UK

138 **'Speaker identification using radial basis functions'**
M W Mak, W G Allen and G G Sexton
University of Northumbria at Newcastle, UK

143 **'Nonlinear noise filtering with neural networks: Comparison with Wiener optimal filtering'**
T Fechner
Daimler Benz AG Research Institute, Germany

148 **'Complex-valued radial basis function networks'**
S Chen, P M Grant, S McLaughlin and B Mulgrew
The University of Edinburgh, UK

153 **'Neural Nets for first break detection in seismic reflection data'**
C H Dimitropoulos and J F Boyce
King's College London, UK

CONTROL AND ROBOTICS

158 **'Analysing recurrent dynamical networks evolved for robotic control'**
P Husbands, I Harvey and D Cliff
University of Sussex, UK

163 **'Robot path planning using VLSI resistive grids'**
G F Marshall* and L Tarassenko
University of Oxford, UK
*Also Defence Research Agency, UK

168 **'Minimum variance control of a class of nonlinear plants with neural networks'**
S Bittanti and L Piroddi
Politecnico di Milano, Italy

172 **'Neural networks performing system identification for control applications'**
O Sorensen
Aalborg University, Denmark

177 **'A neural network motion predictor'**
H Meng and P D Picton
The Open University, UK

POSTER PAPERS

182 **'Stochastic analysis and comparison of Kohonen SOM with optimal filter'**
H Yin and N M Allinson
University of York, UK

186 **'Learning and prediction of nuclear radioactive properties with artificial neural networks'**
S Gazula
University of Miami, USA

191 **'An 'introspective' network that can learn to run its own weight change algorithm'**
J Schmidhuber
Technische Universitat Munchen, Germany

195 **'Using prototypes to solve problems in neural net classifiers'**
C Decaestecker
Universite Libre de Bruxelles, Belgium

200 **'Scene segmentation of natural images using texture features and back-propagation'**
B Sridhar, A Phatak and G Chatterji
NASA Ames Research Center, USA

205 **'On-line adaption in robot control'**
D A Fraser, F Azhar and K Althoefer
King's College London, UK

210 **'Neural network for modelling and control of fed batch fermentation process'**
N A Jalel, D Tsaptsinos and J R Leigh
University of Westminster, UK

215 **'Towards a neural network based system for skin cancer diagnosis'**
R T J Bostock and A J Harget
Aston University, UK
E Claridge
University of Birmingham, UK
P N Hall
Wardsley Hospital, UK

220 **'Modelling of a fermentation process using a time-delay neural network'**
D Tsaptsinos and J R Leigh
University of Westminster, UK

224 **'Minimisation of torque ripple in a switched reluctance motor using a neural network'**
D S Reay, T C Green and B W Williams
Heriot-Watt University, UK

229 **'Neural network based fingerprint classification'**
K Moscinska and G Tyma
Silesian Technical University, Poland

233 **'Variable bit rate block truncation coding for image compression using Hopfield neural networks'**
G Qiu, M R Varley and T J Terrell
University of Central Lancashire, UK

238 **'Target classification using neural and classical techniques'**
A K Patel, W A Wright and P R Collins
British Aerospace Plc, UK

243 **'A stochastic reverse interpolation algorithm for real-valued function learning'**
Y Guan, T G Clarkson, J G Taylor and D Gorse
King's College and University College, London, UK

247 **'Dynamic DBP learning algorithm for real time applications'**
Y Jin, A G Pipe and A Winfield
University of the West of England, UK

252 **'A probabilistic approach which provides a modular and adaptive neural network architecture for discrimination'**
C Monrocq
Thomson-CSF LCR, France

257 **'Neural network based dynamic models'**
B Pataki
Technical University of Budapest, Hungary

262 **'External stimuli in optimised attractor neural networks for sparsely coded patterns'**
A N Burkitt
Australian National University, Australia

267 **'Parallel learning algorithms for principal component extraction'**
B Freisleben
University of Darmstadt, Germany

272 **'Modular connectionist architectures for multi-patient ECG recognition'**
S Farrugia, H Yee and P Nickolls*
The University of Sydney, Australia
*Telectronics Pacing Systems, Australia

277 **'Decentralized Hopfield neural network applied to maintenance scheduling of generating units in power systems'**
K Yoshimoto, K Yasuda and R Yokoyama
Tokyo Metropolitan University, Japan
B J Cory
Imperial College, UK

282 **'Neural network processing of scattered light measurements in the detection of immiscible water pollutants'**
P R Smith, D A Green, R Naimimohosses
and H Thomason
Loughborough University of Technology, UK

286 **'A connectionist approach to SDH bandwidth management'**
S J Bye
Telecom Australia Research Lab, Australia

291 **'LSP speech synthesis using backpropagation networks'**
G C Cawley and P D Noakes
University of Essex, UK
