

Contents

Part One: Semantics Formalisms

Martin v. d. Berg

Dynamic Semantics

Alan Black

Using a Computational Situation-Theoretic Language to Investigate Contemporary Semantic Formalisms

Robin Cooper

Towards a General Semantic Framework

Jens-Erik Fenstad

Experiences with the Framework of Situation Semantics

Hideyuki Nakashima

Situated Dialog

Part Two: Syntax-Interface / Underspecified Representations

Jan-Tore Lønning

Constraints on Unification-Based Semantics

Sebastian Millies, Manfred Pinkal

Linking One Semantic Interpretation System to Different Syntactic Formalisms

Massimo Poesio

Inferring the Semantic Scope of Operators

Stephen Pulman

Quasi-Logical Form

Uwe Reyle

Dealing with Ambiguities by Underspecification: Construction, Representation and Deduction

Mark Steedman

The Interaction of Syntax and Semantics in CCG

Robert Moore *Session Summary*

Part Three: Knowledge Processing and Semantics Formalisms

Wolfgang Wahlster

Semantic Representation Languages and/or Knowledge Representation Languages

Hans Kamp

Discourse Representation Theory as a Knowledge Representation Formalism

Chung-Hee Hwang, Reinhart Schubert

Meeting the interlocking needs of LF-computation, deindexing, and inference: An organic approach to general NLP

John Nerbonne

Natural Language Semantics and Compiler Technology

Bernd Mahr

E-theory as a semantic tool for natural language reconstruction and processing

Part Four: Non-Monotonic Reasoning and Semantics Formalisms

Bernhard Nebel, Espen Vestre

Belief Revision Methods: Formal Properties and Applications in NLP

Jeffrey Pelletier

Psychologically-oriented investigations into nonmonotonic reasoning

Richmond Thomason

Non-monotonic Formalisms for Natural Language Semantics

Frank Veltman

The Framework of Update Semantics

Henk Zeevat

Update Semantics and Discourse Grammar

Christopher Habel, Manfred Krifka

Session Summary
