

CONTENTS

SECTION 1: RENDERING TECHNIQUES

<i>Invited Paper</i> The design of a second generation visualization environment <i>G.J. Edwards</i>	3
<i>Invited Paper</i> The use of visibility coherence for radiosity computation <i>X. Pueyo</i>	17
<i>Invited Paper</i> Characterization of object shapes by singular points: with an application to the feature extraction of human facial expressions <i>H. Saji, Y. Shinagawa, T.L. Kunii, H. Hioki, K. Hara, N. Asada, M. Yasumoto</i>	29
<i>Invited Paper</i> Automatic reconstruction of a solid from three orthographic views <i>T. Masuda, F. Yamaguchi</i>	45
<i>Invited Paper</i> Coherence in computer graphics <i>E. Gröller, W. Purgathofer</i>	61
<i>Invited Paper</i> Temporal coherence in progressive radiosity <i>D. Tost, X. Pueyo</i>	77
<i>Invited Paper</i> Computer animation procedure with rendering techniques using low cost personal computers <i>A.F. Montagu</i>	91
A distortion camera for ray tracing <i>P. Acquisto, E. Gröller</i>	105

SECTION 2: ANIMATION

<i>Invited Paper</i> An advanced environment for scientific visualization using cooperative processing for animation <i>M. Bernaschi, M. Briscolini, P. Santangelo, F. Valentini</i>	121
--	-----

Animation of railway simulator results for a mass transit railway <i>G. Digby, V.J. Strachan</i>	135
Animating architectural scenes utilizing parallel processing <i>F. Van Reeth, E. Flerackers, W. Lamotte</i>	149
Collision detection for objects modelled by CSG <i>M. Zeiller</i>	165
SECTION 3: VIRTUAL REALITY	
<i>Invited Paper</i> Control and autonomy of synthetic actors <i>D. Thalmann</i>	183
<i>Invited Paper</i> Virtual humans acting in virtual reality <i>N.M. Thalmann</i>	197
Applications of virtual reality to computer-aided building design <i>C. Bridgewater, M. Griffin</i>	213
SECTION 4: COMPUTATIONAL GEOMETRY, IMAGING AND VISUALIZATION	
<i>Invited Paper</i> Intelligent decision support of design using advanced multi-media <i>J.A. Powell</i>	221
<i>Invited Paper</i> Visualization and generation of iterated function systems <i>H. Jones, A. Campa</i>	237
Formex configuration processing <i>D. Hadker, D. Tzourmakliotou</i>	253
Highly interactive 3D geometric modeling <i>J. Liang, M. Green</i>	269
Hardware platforms for computer graphics visualization <i>F. Gareeboo</i>	281
Visual composition of concurrent applications <i>A.F. da Silva</i>	297

SECTION 5: FLUID FLOW SIMULATION AND VISUALIZATION

Invited Paper

Scientific visualization in computational fluid dynamics 315
H.-G. Pagendarm

Invited Paper

Interactive visualization techniques in CFD 331
D. Vucinic, J. Decuyper, D. Keymeulen, Ch. Hirsch

Invited Paper

An automatic digital image processing system for whole field flow measurement 347
T. Kobayashi, T. Saga

Visualization of marginal ice zone dynamics 363
M. Serrer, S.B. Savage, M. Sayed

Visualization software for injection molding 377
F. Trochu, D. Gour, M. Audet

PTV measurement of a three-dimensional particle motion in a bubbling jet mixing water vessel 389
T. Uemura, F. Yamamoto, M. Iguchi, Z. Morita, T. Usui, J. Ohta

Visualization of reacting gas flows on non-structured grids 405
C. Best, D. Roebbelen

SECTION 6: ARCHITECTURE AND URBAN PLANNING

Invited Paper

The quest for the parrot on the shoulder: knowledge about emerging design solutions and its representation in a CAD system 421
B.R. Lawson

Adding visual recognition to the capabilities of computer-aided design 431
A. Koutamanis, V. Mitossi

Reinventing the Danteum Project 447
E. Ng

Poiesis. Heuristic design and computer science. Interdisciplinary researches and experimentations about the relation between design and computer science <i>C. Talamo</i>	457
Experiences and rules in simulating architectural realities <i>S. Menoni, G. Vignati</i>	471
Studies and experiments for a laboratory of virtual construction elements <i>A. Campioli, C. Talamo</i>	489
Computer visualisation in planning control: some case studies and issues <i>A.C. Hall</i>	505
Early attempts to combine the use of video and computer in architectural education <i>M. Linzey, A. Soutar</i>	523
SECTION 7: ENGINEERING APPLICATIONS	
Satellite architecture – design of structures and mechanisms (visualization in praxis) <i>M. Hager</i>	533
A coupling approach between visualization tools and building energy analysis <i>J.M.S. Dionísio</i>	551
Visual manipulation of input probability curves in stochastic simulation models of construction materials handling systems <i>Z.B. Harun, G. Singh</i>	559
Computer assisted design of a building site <i>J.C. Lafon, S. Kezeu, T. Soulier, E. Christol, F. Lambez</i>	571
Visualization for decision making in construction planning <i>A. Retik</i>	587
EmDiSy - a personal computer program for emergency operating procedures graphical support <i>I. Šalamun, B. Mavko, A. Stritar</i>	601
Decision support system for hydroelectric power plant design <i>D. Hajduković, B. Djordjević</i>	609

Visualization of 3D scalar fields. Application to air pollution concentration fields <i>S. Ruiz, L. Cremades</i>	619
From the point to the hyperbolic paraboloid: 3D CAD for teaching and profession <i>L.F. Meyer, H. Feliciángeli, C.F. Meyer</i>	635
Authors' Index	655
