Contents

The Algebra of Recursively Defined Processes and the Algebra of Regular Processes
J.A. Bergstra and J.W. Klop 1

The Syntax and Semantics of μCRL
J.F. Groote and A. Ponse 26

A Correctness Proof of the Bakery Protocol in μCRL
J.F. Groote and H. Korver 63

Inductive Proofs with Sets, and some Applications in Process Algebra
J.J. van Wamel 87

Formal Semantics of Interworkings with Discrete Absolute Time
J. van den Brink and W.O.D. Griffioen 106

The ABP and the CABP – A Comparison of Performances in Real Time Process Algebra
J.A. Hillebrand 124

Real Time Process Algebra with Infinitesimals
J.C.M. Baeten and J.A. Bergstra 148

On the Expressiveness of ACP (Extended Abstract)
R.J. van Glabbeek 188

Definability with the State Operator in Process Algebra
J. Blanco 218

Normed BPP and BPA
J. Blanco 242

A Real Time μCRL Specification of a System for Traffic Regulation at Signalized Intersections
M.J. Koens and L.H. Oei 252

An Experiment in Implementing Process Algebra Specifications in a Procedural Language
C. Groza 280

Graph Isomorphism Models for Non Interleaving Process Algebra
J.C.M. Baeten and J.A. Bergstra 299

Process Specification in a UNITY Format
J.J. Brunekreef 319

Algebraic Specification of Dynamic Leader Election Protocols in Broadcast Networks
J.J. Brunekreef, J.-P. Katoen, R. Koymans and S. Mauw 338
