

Contents of Macromol. Symp. 97

Preface

H. Sinn, W. Kaminsky

Plenary Lectures

1. Some reactions of alumoxanes 1
S. Pasynkiewicz
2. A new understanding of the co-catalytic activity of alumoxanes: The opening of a black box! 15
A. R. Barron
3. Proposals for structure and effect of methylalumoxane based on mass balances and phase separation experiments 27
H. Sinn
4. Recent development in heterogeneous metallocene catalysts 53
K. Soga, T. Arai, H. Nozawa, T. Uozumi*
5. Alumoxanes in Russia: Synthesis, properties and application 63
G. P. Belov, N. N. Korneev*
6. How to reduce the ratio MAO/metallocene 79
W. Kaminsky

Short Communications

7. Development of a method for the determination of the "free" trimethylaluminum content in methylalumoxane 91
E. Thorn-Csányi, J. Dehmel, B. Dahlke*
8. Metallocenes/methylalumoxanes: A ^{13}C NMR study of the reaction equilibria and polymerization 101
I. Tritto, M. C. Sacchi, P. Locatelli, S. X. Li*
9. The effect of aluminium compounds in the copolymerization of ethylene / α -olefins 109
H. Katayama, H. Shiraishi, T. Hino, T. Ogane, A. Imai*
10. The preparation of aluminoxane from trimethylaluminium at a defined surface of deeply cooled ice 119
H. Winter, W. Schnuchel, H. Sinn*
11. Phase separation of methylalumoxane with diethyl ether 127
W. Hagendorf, A. Harder, H. Sinn*
12. Behaviour of differently produced methylalumoxanes in the phase separation with diethyl ether and molecular weight estimations 137
*K. von Lacroix, B. Heitmann, H. Sinn**

13. α -Olefin polymerization by various alumoxanes containing isobutyl group and metallocene <i>H. Kurokawa*</i> , <i>T. Sugano</i>	143
14. MAO based catalysts for syndiotactic polystyrene (sPS) <i>R. E. Campbell, Jr.*</i> , <i>T. H. Newman</i> , <i>M. T. Malanga</i>	151
15. Copolymerization of poly(propylene) macromonomer and ethylene with metallocene catalysts <i>T. Shiono*</i> , <i>Y. Moriki</i> , <i>K. Soga</i>	161
16. Mixed cocatalyst systems in metallocene ethylene polymerization <i>W. Michiels*</i> , <i>A. Muñoz-Escalona</i>	171
17. Metallocene/MAO polymerization catalysts supported on cyclodextrin <i>D. Lee*</i> , <i>K. Yoon</i> , <i>W. Huh</i>	185
18. Ethylene polymerization with metallocene and trimethylaluminum-treated silica <i>D. Lee*</i> , <i>S. Shin</i> , <i>D. Lee</i>	195
19. The role of dormant sites in propene polymerization using methylalumoxane activated metallocene catalysts <i>S. Jüngling</i> , <i>R. Mülhaupt*</i> , <i>U. Stehling</i> , <i>H.-H. Brintzinger</i> , <i>D. Fischer</i> , <i>F. Langhauser</i>	205
20. The interaction of metallocenes with selected activators. A contribution to determine the formation of ion pairs <i>S. Gürtzgen</i> , <i>R. Rieger</i> , <i>W. Uzick*</i>	217
21. Microstructure of poly(cycloolefins) produced by metallocene/methylaluminoxane (mao) catalysts <i>M. Arndt*</i> , <i>W. Kaminsky</i>	225
