

Table of Contents

A Model of Case-Based Reasoning for Solving Problems of Geometry in a Tutoring System	1
<i>Eugène Chouraqui, Carlo Inghilterra</i>	
Modelling Children's Informal Arithmetic Strategies	17
<i>Roshni Devi, Tim O'Shea, Sara Hennessy, Ronnie Singer</i>	
Cognitive Interpretation of Microworld Operations	36
<i>Tommy Dreyfus, Baruch Schwarz</i>	
Calculus Revisited	46
<i>Maurizio Falcone</i>	
Computer Aided Proofs in School Geometry	63
<i>Régis Gras, Italo Giorgiutti</i>	
A Cognitive Analysis of Geometry Proof Focused on Intelligent Tutoring Systems	82
<i>Dominique Guin</i>	
Modelling Geometrical Knowledge: The Case of the Student	94
<i>Celia Hoyles</i>	
Intelligent Microworlds and Learning Environments	113
<i>Jean-Marie Laborde</i>	
A Constructivist Model for Redesigning AI Tutors in Mathematics	133
<i>Richard Lesh, Anthony E. Kelly</i>	
The Influence of Interactive Tools in Geometry Learning	157
<i>Heinz Schumann</i>	
Socratic Tutoring with Software: An Example and a Prospectus	188
<i>Judah L. Schwartz</i>	

Students' Constructions and Proofs in a Computer Environment – Problems and Potentials of a Modelling Experience	203
<i>Rudolf Strässer</i>	
Some Hyperbolic Geometry with CABRI-Géomètre	218
<i>Marie-France Thibault, Robert La Barre</i>	
Micro-Robots as a Source of Motivation for Geometry	231
<i>Martial Vivet</i>	
Complex Factors of Generalization Within a Computerized Microworld: The Case of Geometry	246
<i>Michal Yerushalmy</i>	
Contributors and Participants	263
