1	Applications of DSP to Personal Communication Networks	1
	BER Comparison of DS-CDMA and MC-CDMA for Frequency Selective Fading Channels	3
	<i>S. Hara, T.H. Lee and R. Prasad</i>	
	Performance Enhancement of Indoor Channels Using Quasi-Coherent Combining of Multiple Antenna Signals	15
	<i>G.J.M. Janssen</i>	
	Applications of Walsh Functions and the FHT in CDMA Technology	27
	<i>E. Zehavi</i>	
	Decision Feedback Multi-User Detection for Multitone CDMA Systems	39
	<i>L. Vandendorpe and O. van de Wiel</i>	
	Blind Adaptive Interference-Cancelling Detectors for DS/SS CDMA: Algorithms and Performance	53
	<i>R. De Gaudenzi, F. Giannetti and M. Luise</i>	
	The Bootstrap Decorrelating Algorithm: A Promising Tool for Adaptive Separation of Multi-User CDMA Signals	68
	<i>Y. Bar-Ness</i>	
2	Joint Source/Channel Coding for Multimedia Applications	83
	Rate-Distortion Performance of Several Joint Source and Channel Coding Schemes for Images	85
	<i>M. Ruf and J.W. Modestino</i>	
	Bounds on the Performance of Vector Quantizers operating under Channel Errors over all Index Assignments	100
	<i>G. Ben-David and D. Malah</i>	
	Adaptive Temporal & Spatial Error Concealment Measures in MPEG-2 Video Decoder with Enhanced Error Detection	112
	<i>S. Aign</i>	
	Source and Channel Coding Issues for ATM Networks	124
	<i>V. Parthasarathy, J. Modestino and K. Vastola</i>	

	Combined Source and Channel Coding for Wireless ATM LANs	135
	<i>E. Ayanoglu, P. Pancha, A.R. Reibman and S. Talwar</i>	
3	DSP in Channel Estimation/Equalization and Modem Design	151
	Block-by-Block Channel and Sequence Estimation for ISI/Fading Channels	153
	<i>K.H. Chang, W.S. Yuan and C.N. Georghiadis</i>	
	Timing Correction by Means of Digital Interpolation	171
	<i>M. Moeneclaey and K. Bucket</i>	
	Digital Demodulator Architectures for BandPass Sampling Receivers ...	183
	<i>A.M. Guidi and L.P. Sabel</i>	
	Quadrature Phase Error and Amplitude Imbalance Effects on Digital Demodulator Performance	195
	<i>J.J. Wojtiuk and M. Rice</i>	
	Maximum-Likelihood Sequence Estimation for OFDM.....	207
	<i>A. Vahlin and N. Holte</i>	
	A New Analysis Method for the Performance of BandPass Sampling Digital Demodulators Considering IF Filter Effects	220
	<i>L.P. Sabel</i>	
	Comparison of Demodulation Techniques for MSK.....	232
	<i>U. Lambrette, R. Mehlan and H. Meyr</i>	
	Variable Symbol-rate Modem Design for Cable and Satellite TV Broadcasting	244
	<i>G. Karam, K. Maalej, V. Paxal and H. Sari</i>	
	A New Class of Carrier Frequency and Phase Estimators Suited for MPSK Modulation	256
	<i>I. Mortensen and M.L. Boucheret</i>	
4	Signal Processing in Satellite Networks.....	269
	Payload Digital Processor Hardware Demonstration for Future Mobile and Personal Communication Systems	271
	<i>A. D. Craig and F. A. Petz</i>	
	Frequency Domain Switching: Algorithms, Performances, Implementation Aspects	283
	<i>G. Chiassarini and G. Gallinaro</i>	
	Design Study for a CDMA Based LEO Satellite Network: Downlink System Level Parameters	294
	<i>S. G. Glisic, J. Talvitie, T. Kumpuläki, M. Latva-aho and J. Iinatti</i>	
	A Multi-user Approach to Combating Co-channel Interference in Narrow band Mobile Communications	308
	<i>J. Ventura-Traveset, G. Caire, E. Biglieri and G. Taricco</i>	
	Digital Radio for the World: High-Grade Service Quality Through On-Board Processing Techniques	321
	<i>G. Losquadro</i>	

5	Advanced Signal Processing Techniques	335
	Digital Equalization using Modular Neural Networks: an Overview	337
	<i>J. Cid-Sueiro and A. R. Figueiras-Vidal</i>	
	Vector Quantization Using Artificial Neural Network Models	346
	<i>A.S. Galanopoulos, J.E. Fowler, Jr., and S. C. Ahalt</i>	
	Neural Networks for Communications and Signal Processing: Overview and New Results	358
	<i>M. Ibnkahla and F. Castanie</i>	
	Transform-Domain Signal Processing in Digital Communications	374
	<i>H. Sari and P.Y. Cochet</i>	
	Fuzzy-Rule-Based Phase Estimator Suited for Digital Implementation ..	385
	<i>F. Daffara</i>	
6	Recent Applications of DSP Techniques	395
	Analog Envelope Constrained Filters for Channel Equalization	397
	<i>A. Cantoni, B. Vo, Z. Zang and K.L. Teo</i>	
	Design of All-Digital Wireless Spread-Spectrum Modems Using High-Level Synthesis	409
	<i>P. Yeung, R. Subramanian, M. Barberis and M. Paff</i>	
	Efficient VHDL Code Generation for Digital Receiver Design	423
	<i>T. Grötter, U. Lambrette and H. Meyr</i>	
	Blind Joint Equalization of Multiple Synchronous Mobile Users for Spatial Division Multiple Access	435
	<i>D.T.M. Slock</i>	
	Base-Station Antenna Arrays in Mobile Communications	447
	<i>B. Ottersten and P. Zetterberg</i>
